

YASHVI MODI

Full Stack Developer

USA | +1 (945)-246-9711 | Email: yashvi@myworkmails.com | [LinkedIn](#)

SUMMARY

Highly skilled and results-driven Full Stack Developer with 4+ years of experience designing, developing, and deploying scalable enterprise applications using Java, Python, Spring Boot, Angular, React, REST APIs, and microservices architecture. Strong expertise in cloud platforms (AWS, Azure, GCP), database engineering (SQL & NoSQL), and DevOps automation (Docker, Kubernetes, Jenkins). Adept at delivering secure, high-performing solutions aligned with Agile/Scrum practices. Proven record of reducing release cycles, improving application performance, and enhancing customer experiences in financial services and technology consulting domains.

PROFESSIONAL EXPERIENCE

Software Engineer | Compunnel Inc. | USA

Aug 2024 – Current

- Designed, developed, and deployed enterprise-grade full stack applications using Java (Spring Boot, Hibernate) and Python (Flask, Pandas) on AWS cloud, enabling real-time data processing across multiple client platforms and reducing system latency by 28%.
- Developed full-stack web applications using React.js (frontend) and Python (backend), with seamless integration to Azure Cosmos DB for scalable and secure cloud data handling.
- Created and maintained unit and integration tests using Jest, React Testing Library, and PyTest, achieving 85%+ test coverage and reducing production defects.
- Implemented and optimized RESTful APIs, collaborated in Agile teams, and supported CI/CD workflows via GitHub Actions and Azure DevOps, streamlining release cycles by 35%.
- Enhanced application performance by applying cloud-native design principles and debugging tools, ensuring high availability and scalability across distributed systems.
- Partnered with cross-functional teams to align software solutions with business requirements, improving feature delivery timelines and end-user satisfaction.

Web Developer | University of Texas at Dallas | USA

Sept 2022 – Dec 2022

- Collaborated on the Cosmo Research Project, developing sustainable solutions for smart vehicle technologies and transportation infrastructures to enhance safety, reduce emissions, and improve urban mobility.
- Utilized PHP, HTML, CSS, JavaScript, and CMS platforms to design and deploy web solutions addressing real-world urban transportation challenges.
- Assisted in the integration of smart vehicle technologies and data-driven approaches, enhancing vehicle safety, operational efficiency, and equitable transport access.
- Designed responsive and accessible web interfaces to ensure cross-browser compatibility and optimized usability for diverse research stakeholders.
- Supported research teams in prototyping, testing, and validating digital solutions, enabling scalable implementation of innovative mobility technologies.

Full Stack Developer | IBM | India

Oct 2019 – July 2022

- Engineered and enhanced Java J2EE, Spring MVC, and Hibernate applications integrated with Python (Flask/Django) APIs, improving backend throughput and data consistency.
- Redesigned legacy architectures into microservices using Docker and Kubernetes on AWS/Azure, improving scalability, fault tolerance, and deployment speed.
- Developed ETL workflows with Spring Batch, Python, and Apache Spark for automated data ingestion and real-time analytics delivery.
- Built responsive web interfaces with Angular, React, and JavaScript, elevating user experience and optimizing client-side performance.
- Implemented automated unit, integration, and regression testing with JUnit, PyTest, and Selenium to ensure code reliability and faster CI/CD cycles.
- Optimized SQL and NoSQL databases (Oracle, MySQL, MongoDB) to improve query performance and support high-volume transactions.
- Deployed and maintained cloud-native applications on AWS and Azure using Terraform and Ansible, driving consistent infrastructure automation within Agile/Scrum environments.

TECHNICAL SKILLS

- Languages:** Java, Python, JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL, PL/SQL
- Frameworks & Tools:** Spring Boot, Django, Flask, Hibernate, JPA, Angular, React, Node.js, Express.js
- Cloud Platforms:** AWS (EC2, Lambda, S3, RDS), Azure, GCP
- Databases:** MySQL, PostgreSQL, Oracle, MongoDB, Cassandra, Redis
- DevOps & CI/CD:** Jenkins, Git, GitHub Actions, Maven, Gradle, Docker, Kubernetes, Terraform
- Testing Tools:** JUnit, PyTest, Mockito, Selenium, Postman, Cucumber, JMeter
- Other:** Agile/Scrum, Jira, Confluence, Microservices, API Security (OAuth2, JWT), ELK Stack, Log4j

Education

Master of Science, Computer Science | University of Texas at Dallas, USA

Aug 2022 – May 2024

Bachelor of Computer Engineering | Gujarat Technological University, India

June 2017 – June 2021

Certification

AZ - 900 Azure Fundamentals (Microsoft), Machine Learning By Sandford
