EDUCATION

Master's in Data Science

May 2023-Dec 2024

Florida Atlantic University,Florida

Coursework: data mining and machine learning ,social networks/big data analytics,reinforcement learning..

Bachelors in Computer Science and Engineering

Aug 2016-Jul 2020

New Horizon College of Engineering,Bangalore

Coursework: python,data sctructures,fundamentals in data science,hadoop programing

TECHNICAL SKILLS

Programming and Data Analysis: Java, HTML, CSS, Python, SAS, R, Statistical Analysis, Financial Analysis, Pricing Analysis.

Data Reporting and DBMS: Tableau, Power BI (DAX), MySQL, PostgreSQL, MongoDB (NoSQL), Cloud (AWS, Azure)

Big Data, ETL, and Additional Skills: Spark, Databricks, Microsoft Excel (VBA), Snowflake, SAP (ERP), Git, SharePoint.

Competencies: Jira, Problem Solving, Team Collaboration, Effective Communication, Presentation Skills.

WORK EXPERIENCE

Associate Data Analyst | Cognizant, India

Jul 2020-April 2023

- Designed and implemented ETL (Extract, Transform, Load) workflows using SQL and cloud-based tools like AWS Glue to consolidate data from multiple databases, ensuring data is cleaned, standardized, and stored in a centralized data warehouse.
- Performed correlation and statistical analyses, including linear regression and A/B testing, using Excel and SQL to assess automobile service costs, pricing strategies, and profitability, leading to a 12% increase in profit margins and a 10% reduction in operational costs.
- Created and deployed dashboards in SAS and Power BI, delivering visual insights that supported stakeholders in strategic decision-making.
- Conducted exploratory data analysis (EDA) in Python, focusing on KPIs such as service time, cost, and customer satisfaction scores, achieving a 20% reduction in average service time and a 15% improvement in customer satisfaction.

Data Scientist Intern | Cognizant, India

Feb 2020- Jun2020

- Collected, consolidated, and transformed data from multiple sources such as service logs, customer feedback, and sales records to ensure accurate analysis.
- Implemented machine learning clustering techniques to identify and group distinct customer segments, driving a 25% improvement in customer retention and a 30% growth in repeat service bookings.
- Contributed to the development of a machine learning model designed to optimize targeted marketing efforts and personalize service strategies for each customer segment.

PROJECTS

Detection of Face Mask | *Python, TensorFlow, Keras, Machine Learning*

- Designed and implemented a real-time face mask detection system leveraging Python, TensorFlow, and Keras.
- Trained a Convolutional Neural Network (CNN) model on a large dataset of masked and unmasked face images, achieving an accuracy of 95%.
- Deployed the system to monitor public and workplace environments, enhancing safety protocols by effectively identifying individuals without face masks.

Image Classifiers Using Neural Networks | *Python, TensorFlow, Keras*

| [GitHub](#)

- Developed image classification models using neural networks to classify handwritten digits (MNIST) and clothing items (Fashion MNIST).
- Built and trained multi-layer perceptrons (MLPs) and Convolutional Neural Networks (CNNs) using TensorFlow and Keras, achieving 98% accuracy on MNIST and 92% accuracy on Fashion MNIST.
- Visualized model predictions and performance metrics using Matplotlib, providing insights into misclassified examples and overall accuracy.

Autonomous Delivery Drones | *Python, ROS, Reinforcement Learning, Computer Vision*

| [GitHub](#)

- Developed an autonomous drone system for package delivery, leveraging reinforcement learning to optimize navigation and decision-making in dynamic environments.
- Integrated computer vision techniques using OpenCV and YOLO for object detection, package handling, and precise landing zone identification.
- Trained and fine-tuned the reinforcement learning model in simulated environments using Gazebo, achieving a 96% success rate in delivery tasks during real-world testing.

HONOUR'S AND CERTIFICATIONS

- AWS Data Engineering
- Python
- SQL
- java script
