

Sohel

Email: sohel.md2926@gmail.com

Phone#: 9402874836

Professional Summary:

- With over **4+ years** of professional experience as a Java Developer in Object Oriented development, implementation and maintenance of web and distributed Enterprise applications using **Java/J2EE** technologies.
- Hands-on experience in the **Spring Framework, Spring Core (IOC Container, Dependency Injection and AOP), Spring MVC, Spring Templates, Data Access (Transactions, JDBC, and ORM) and Spring Boot** Technologies
- Strong experience in **MVC architecture** and design implementation using **Spring and JSP**.
- Experience with various frameworks in **spring** such as **Spring AOP, spring transaction Management, Spring Data, Spring Batch, Spring Boot and Spring Cloud**.
- Hands-on experience working with **Java 11/8** features like streams and Lambda expressions, which results in writing the code in Declarative approach.
- Experience with **Hibernate** and in using **Hibernate Connection Pooling, HQL, Collections, Hibernate Caching, Hibernate Transactions, Optimistic Locking**.
- Experience of developing data models using **Hibernate POJO's**, configuring **Hibernate persistence layer**.
- Expertise in **IDEs** for software development like **NetBeans, STS and Eclipse**.
- Experience in developing front end applications using **HTML5, CSS3, JavaScript, JQuery, Bootstrap, XML, XHTML, DHTML, SAAS, LESS, DOM, Ajax**.
- Experience in **XML** technologies such as **XSL, XSLT, XML schemas, XPath, XSL-FO** and parsers like **SAX, DOM**.
- Experience with various J2EE design patterns like Singleton, Factory, Abstract Factory, DAO, MVC, and Façade & Business Delegate in the development of enterprise applications.
- Experience in **Core Java** features like **Multi - threading, concurrency, Stream's and Filters API, Lambda functions and Functional interface programming**.
- Experience with Cloud Computing Service environment like **(AWS) Amazon Web Services (EC2, EBS, S3 and ELASTIC SEARCH)**.
- Experience on Web Application Servers, **IBM WebSphere, JBOSS, Apache Tomcat, and WebLogic** including configuration, administration and documentation.
- Expertise in implementing various well-known Object-Oriented/J2EE Design Patterns and Session, Entity, Message Driven **Enterprise Java Beans (EJB)**.
- Experience in working with **Log4J** for logging, debugging and error tracing.
- Experience in producing & consuming **SOAP** based & **Restful** web services using **WSDL, SOAP, JAX-WS, JAX-RS, AXIS, CXF, SOAUI** and implemented **RestAPI** using **micro service** architecture.
- Experience with **MongoDB** development (reports, schema design, map reduce functions) and migrations from **SQL** relational databases to **NoSQL** databases like **MongoDB, Cassandra and CouchDB**.
- Experience working in **agile** methodology and involved in scrum meetings every day to discuss the Sprint status, technical difficulties and blockers.
- Excellent communication, interpersonal and analytical skills and a highly motivated team player with the ability to work independently.

Technical Skills:

Languages	Java 11/8/7/6, PL/SQL
Java/J2EE Technologies	Java, JDBC, JNDI, JMS, JSTL, Java Beans, RMI, Java Multithreading, Generics and Collections, EJB, Tiles
Methodologies	Agile, Waterfall
Frameworks	Spring, Spring Boot, Hibernate, MVC
Design & GUI Tools	Eclipse, NetBeans, RAD
App servers	IBM WebSphere, Apache Tomcat, BEA Web Logic, JBoss
Databases/Tools	Oracle, SQL Server, My-SQL, PL/SQL Developer
Design/Version Control	GitHub, GIT
Operating Systems	Windows, Linux, UNIX

Professional Experience:**Client: Mechanics Bank, Walnut Creek, CA.****Nov 2022 – Till Date****Role: Java/J2EE Developer****Responsibilities:**

- Involved in **software development life cycle (SDLC)**, which includes requirement gathering, design, coding and testing.
- Used **Java 11** features in developing the code like Lambda expressions, creating resource classes, fetching documents from database.
- Developed the application using **spring Framework** which is based on the **MVC** design pattern.
- Involved in developing the applications using **Spring Framework** for Dependency Injection.
- Designed and developed **Micro services** business components using **Spring Boot**. Consumed **REST** based Micro services with Rest template based on **RESTful APIs**.
- Used **Spring Boot** which is radically faster in building cloud **Micro services** and develop spring based application with very less configuration.
- Used complete annotation driven approach to develop the application using **Spring Boot** and was also involved in setting up the spring bean profiling.
- Used **Hibernate** mappings, relationships between tables and entity classes to access and update information in the database.
- **Hibernate Query Language (HQL)** was used to perform various queries in the database
- Integrated and developed UI components with business components and developed web pages using **HTML5, CSS3, JQuery and JavaScript**.
- Developed user interface by using the **React.JS** for **Single Page Application (SPA)** development.
- Used **Node.js** for building web applications with client-server architecture, where both can initiate communication in two-way connections and allow them to exchange data.
- Worked on **Java Messaging Services (JMS)** for developing messaging services. Implemented different types of messaging prototypes using **JMS**.
- Used **J2EE** design patterns like **Value Object Pattern, Session Façade, Singleton, Factory and DAO**.
- Involved in designing and deploying multitude applications utilizing **AWS stack (Including EC2, Route53, S3, RDS, Dynamo DB, SNS, SQS, IAM)** focusing on high-availability, fault tolerance, and auto-scaling in AWS CloudFormation.
- Used **Log4j** to capture the log that includes runtime exceptions.
- Used **JUnit**, a test framework which uses annotations to identify methods that specify a test.
- Used **Log4J** to log messages depending on the messages type and level.
- Implemented **SOAP Services (JAX-WS)** to interact with external systems like Fidelity.
- Designed database and created tables, written the complex **SQL** Queries and **stored procedures** as per the requirements.
- Involved in analysis, design, and Implementation applying the **agile methodology**.
- Involved in Unit integration, bug fixing, acceptance testing with test cases, Code reviews.

Environment: Java 11, spring, Spring Boot, Hibernate, MVC, Micro Services, RESTful, POJO, HTML5, CSS3, JavaScript, React.JS, AJAX, JMS, AWS, XML, EJB, Log4j, JUnit, SOAP, SQL, Agile and Windows.

Client: Focus1 Insurance, Portland, OR.**Jan 2022 – Oct 2022****Role: Java/J2EE Developer****Responsibilities:**

- Involved in analysis, specification, design, implementation and testing phases of **Software Development Life Cycle (SDLC)** based on the functional requirements.
- Used **spring Framework** based on **(MVC) Model View Controller** architecture in WebSphere Application Development.
- Used **Spring Framework** in the application, which is based on **MVC** design pattern. Developed Action classes and Form beans and configured the **spring-config.xml**.
- Using **Spring Boot** for developing micro services, Soap to retrieve data from client-side using Micro service architecture and **Pivotal Cloud Foundry (PCF)** for deploying micro services.
- Designed and developed **Micro-services** using **REST** framework and **Spring Boot** and used **Bootstrap** along with **Angular.JS** in creating the Application.
- Designed and developed the REST based Micro services using the **Spring Boot**, Spring Data with JPA.

- Worked on creation of custom **Docker** container images, tagging, pushing images, integration of **Spring Boot**.
- Responsible for implementing new enhancements and fixing defects using **Java, JSF, spring** and **Hibernate**.
- Developed Session beans which encapsulate the workflow logic and used **Hibernate** to access data
- Designed and developed the front-end application and user interactive web pages using **HTML5, CSS3** and **JavaScript**.
- Extensively used **JavaScript** and **Angular.js** to provide dynamic User Interface and for the client side validations.
- Involved in the creation of interface to manage user menu and Bulk update of Attributes using **Node.JS**.
- Involved in using **AWS (Amazon Web Services)** services like **EC2, VPC, Cloud Watch, Cloud Front, Cloud Formation, IAM, S3, Amazon RDS, Elastic Cache, SNS, SQS**.
- Developed **EJB** deployment descriptor using **XML** and used **JAXB** components for transferring the objects between the application and the database.
- Used **Log4J** to capture logs that includes runtime exceptions, monitored error logs and fixed the errors.
- Involved in the creation of exhaustive **JUnit** Unit Test Cases for each java class that is being developed for this application using a mocking framework Mockito using Test Driven Development technique.
- Implemented Web services components **SOAP, WSDL** to interact with external systems
- Wrote stored procedures using **PL/SQL** for data entry and retrieval.
- Designed and coded application components in an **agile** environment.
- Coordinating with the business and functional teams to get clarity on the requirement for analysis.

Environment: Java 8, spring, MVC, Spring Boot, RESTful, Hibernate, Micro Services, Bootstrap, JSF, HTML5, CSS3, JavaScript, Angular.JS, Node.JS, AWS, XML, EJB, Log4j, JUnit, SOAP, SQL, PL/SQL, Agile and Windows.

Company: Matrix software company, India.

Jun 2020 – Dec 2021

Role: Java Developer

Responsibilities:

- Involved in the analysis specification, design, and implementation and testing phases of Software.
- Involved in analysis and design phase of **Software Development Life cycle (SDLC)**.
- Developed application using **spring framework** that leverages **spring MVC** architecture.
- Developed some part of the application using **Spring-MVC and IOC/Dependency Injection** integrating different layers of the application.
- Developed **core Java** programs for all business rules and workflows using **spring framework**.
- Used **spring** framework for implementing Dependency Injection, **Spring ORM**.
- Worked in development of data abstraction layer using **Hibernate ORM** framework with **spring** support.
- Wrote **DAO** classes to interface with Database using **hibernate**.
- Used **Java Multi-Threading** concept for downloading files from a URL.
- Developed **XML** applications using **XSLT** transformations.
- **JMS** was used to send/receive asynchronous data from various modules in the application.
- Used **Log4J** to print the logging, debugging, warning, info on the server console.
- Developed **JUnit** test cases for all the developed modules.
- Used **WSDL** and **SOAP** protocol for **Web Services** implementation.
- Developed **MySQL** stored procedures and triggers using **SQL** in order to calculate and update the tables to implement business logic.
- Implemented **agile** methodology throughout the project development lifecycles.
- Participated in the status meetings and status updating to the management team.

Environment: Java 8, spring, MVC, Hibernate, DAO, XML, JMS, Log4j, JUnit, SOAP, SQL, Agile and Windows.
