

Shubham Singh

shubhsin@ttu.edu • (806)-801-4783 • Lubbock, TX • <https://www.linkedin.com/in/singhushubham/>

PROFILE

Data-driven IT professional experienced in major incident management, asset management, and process optimization. Led resolution of 10+ quarterly Priority 1 incidents impacting global users while implementing AI-driven automation that reduced supply chain turnaround time by 25% and delivered \$480K in annual savings. Skilled in Python, Power BI, and ServiceNow to support data-informed operational decision making.

EDUCATION

M.S. Industrial Engineering,
Texas Tech University, Lubbock, TX

Expected: May 2026
GPA: 3.77

B.E. Mechanical Engineering,
Pune University, India

April 2021
GPA:3.5

EXPERIENCE

Texas Tech University, Student Lead, Residential Tutor (Lubbock, TX)

Oct 2024 – Present

- Mentored undergraduates in research and quantitative analysis, reinforcing engineering principles and improving technical problem-solving accuracy.
- Managed operations of a **250,000 sq. ft.** facility serving 300+ patrons, ensuring safety compliance and process efficiency while resolving inquiries and contributing to ~\$70,000 in revenue through cross-functional coordination.

Infosys Limited, Senior System Engineer (India)

Nov 2021 - July 2024

- Served as Major Incident Manager, leading resolution of Priority 1 incidents affecting global users within SLA (<2 hours), managing 10+ critical incidents quarterly to ensure system stability.
- Developed AI-driven automation using MS Power Automate to optimize supply chain process, reducing turnaround time by 25% (20+ days).
- Analyzed inventory using Python and Power BI to identify cost leakages, reducing license expenses by 20% and saving \$480,000 annually.
- Directed asset procurement by evaluating stakeholder requirements and negotiating with vendors to deliver cost-efficient solutions on schedule.

GlobalShala Education Pvt. Ltd., Data Analyst Intern (India)

Feb 2021 - Oct 2021

- Led the analysis team in collaboration with multiple contractors to process over 1,300 performance reports quarterly.
- Designed interactive Power BI dashboards to visualize KPIs and performance trends, enabling data-driven decision-making for stakeholders.

Indian Army – Corps of Electronics and Mechanical Engineers (EME), Quality Assurance Intern
(India)

Dec 2020 - Jan 2021

- Applied Six Sigma methodologies using Pareto, Fishbone and root cause analysis (RCA) to identify 82% of high impact failure modes and support CAPA implementation, leading to a reduction of 22K man-hours annually in the rectification process.
- Performed root cause analysis on over 2,000 engine defects, including fuel injection pump (FIP) failures and power loss issues, improving engine efficiency and operational readiness.

- Collaborated with mechanical and maintenance team to implement corrective actions aligned with quality assurance standards.

ACE Overseas Education Ltd., Data Research & Event Intern (India)

Feb 2020 - May 2020

- Used Jupyter Notebook and Tableau to analyze data and assist in organizing online events for the organization.

PROJECTS

Optimization of Kidney Paired Donation Matchings, Texas Tech University **July 2024 – Dec 2024**

- Used Python and Gurobi to optimize **200+** Kidney Paired Donation pair and three-way matches.

Spiral Drive Footstep Power Generator, Pune University

Jul 2020 - May 2021

- Developed a footstep-powered generator achieving **90%** efficiency, modeling the mechanism in NX and AutoCAD with GD&T standards.
- Performed FEA in ANSYS to validate stress, deformation, and factor of safety, ensuring durability and functionality.

Crank and Slotted Lever Mechanism, Pune University

Jan 2019 - Apr 2019

- Modeled and fabricated a mechanical mechanism in SolidWorks with detailed AutoCAD drawings, achieving **95%** precision.

SKILLS

CAD & Stimulation: NX, ANSYS, AutoCAD, SolidWorks, MATLAB, Powerworld

Data & Programming: Python, MySQL, Power BI, R Studio, Gurobi Optimizer

Tools & Platform: Azure, ServiceNow, Linux, MS Office

Certifications:

- Graduate Certificate, Wind Energy
- Microsoft Azure (DP-203), Power BI (PL-300), AI Engineer (AI-102)
- RedHat System Admin (RH-124)

INVOLVEMENTS

Member, National Society of Professional Engineers

March 2025 – Present

- Participated in professional development workshops and engineering ethics seminars to strengthen industry readiness and technical awareness.

Member, Society of Plastic Engineers

Nov 2024 – Present

- Engaged in technical talks and networking events on material innovation, and manufacturing applications.

Member, Institute of Industrial and Systems Engineers

Oct 2024 – Nov 2025

- Attended process improvement workshops and operations events centered on optimization, and systems engineering practices.
