

# Pranami Gajjar

Chicago, IL • (773) 560-6657 • pranamigajjar@gmail.com • linkedin.com/in/pranami-gajjar

Detail-oriented **Data Science** graduate skilled in **data analysis**, process optimization, and delivering actionable insights. Proficient in **Python**, **Tableau**, **SQL** and key analytics tools to support data-driven decision-making.

---

## EDUCATION

### Illinois Institute of Technology

Data Science • GPA: 3.41/4.0

08/2023 - 05/2025

### SVMIT

Computer Science and Engineering • GPA: 3.7/4.0

08/2019 - 05/2023

---

## WORK EXPERIENCE

### Artificial Intelligence Intern

Chicago, IL

### Conduct Science

08/2024 - 12/2024

- Successfully optimized **AI labeling processes** for bioscientific **data analysis**, resulting in improved data processing speed and enhanced research efficiency
- Implemented AI tools to streamline workflows, resulting in improved **data accuracy** and supporting actionable scientific research insights.
- **Analyzed and interpreted complex data**, providing actionable insights to drive research advancements.

### Student Researcher

Chicago, IL

### Illinois Institute of Technology

09/2023 - 05/2024

- Developed and executed simulations using **OpenMM**, leading to a 30% increase in research efficiency by streamlining data analysis processes.
  - Collaborated on the research project "Far-Field Electrical Forces for Ion Channel Molecular Dynamics and Drug Design", contributing to scientific insights.
  - Improved drug design research by using advanced computational tools, boosting team collaboration and streamlining project workflows
- 

## SKILLS

- **Programming Languages:** Python, R, SQL (MySQL, SQLite)
  - **Data Analysis & Visualization:** Power BI, Tableau, Pandas, NumPy, MS Excel, SciPy, Matplotlib, Seaborn
  - **Machine Learning & AI Tools:** Classification, Regression, Monte Carlo Simulation, PyTorch, Sci-Kit Learn, Apache Spark
  - **Data Handling & Engineering:** Data Cleaning, Data Wrangling, EDA (Exploratory Data Analysis)
  - **Statistical Methods:** ANOVA, Hypothesis Testing, Probability, Distributions
  - **Tools & Platforms:** Git, Jupyter Notebook, RStudio, VS Code, Google Colab
- 

## PROJECTS

### Salary Prediction Using Machine Learning

01/2025 - 04/2025

Illinois Institute of Technology

- Successfully developed and fine-tuned a salary prediction model using **Random Forest**, **Linear Regression**, and **Lasso Regression**, achieving strong accuracy through **GridSearchCV** and feature engineering.
- Delivered an end-to-end pipeline from data cleaning to **EDA** and model evaluation (MAE, R<sup>2</sup>), leveraging Python tools like **Scikit-learn**, **Pandas**, **NumPy**, **Seaborn**, and **Matplotlib**.

### Child Anemia Prediction

08/2023 - 12/2023

Illinois Institute of Technology

- Successfully developed **machine learning** models to predict anemia in Nigerian children, achieving 100% accuracy using **SVM** and **Decision Tree** algorithms.
- Enhanced model performance by applying **KNN**, **Random Forest**, **PCA**, and **UMAP**, improving prediction accuracy and guiding health intervention strategies.
