OBJECTIVE

Analytical professional with a strong background in business analytics, financial analysis, and reporting, seeking an analyst role where quantitative skills, structured problem solving, and data driven insights can support business performance, operational efficiency, and informed decision making across team.

TECHNICAL SKILLS

- **Languages & Analytics:** Python (Pandas, NumPy, SciPy, scikit learn, TensorFlow, PyTorch), R (tidyverse), SQL, MySQL
- **Visualization & BI:** Excel (PivotTables, Power Query), Tableau, Power BI, Matplotlib, Seaborn
- **Data Handling:** Data Cleaning, ETL, Web Scraping, Data Warehousing
- **Techniques:** Forecasting, Regression, Hypothesis Testing, A B Testing, Linear Programming
- **Analytics & Reporting:** KPI Reporting, Ad Hoc Analysis, Automation, Stakeholder Reporting, Business Insights

EDUCATION

California State University, Sacramento | *M.S., Business Analytics (GPA: 3.81/4)* **Sacramento, CA Apr 2026**
VIT Bhopal University | *B.Tech, Computer Science & Engineering (GPA: 8.42 / 10)* **India Jul 2024**

EXPERIENCE

Globe Eco-green Infrastructure | *Project Analyst* **Jul 2023 - Jul 2024**

- Generated weekly KPI and risk reports for 5 plus concurrent construction projects, improving management visibility and reducing reporting turnaround time by 15 percent.
- Developed and maintained Excel based dashboards using pivot tables, lookups, and charts to monitor cost, schedule, and performance metrics.
- Analyzed cost variance, budget utilization, and operational trends to support weekly and monthly decision making.

Tapovan Inn Hotel & Resort | *Marketing Analyst* **Jan 2023 – Jun 2023**

- Conducted marketing trend and campaign analysis using Excel and Google Analytics, leading to a 20% increase in customer inquiries.
- Developed Excel-based KPI reports to track campaign ROI, customer segments, and pricing performance, contributing to a 10% increase in monthly revenue.
- Supported data-driven pricing and promotion strategies by evaluating trends, conversion metrics, and occupancy patterns.

Projects

Procurement Spend Optimization Analysis *(Excel)*

- Analyzed procurement and vendor spend data to identify cost drivers, consolidation opportunities, and potential savings across categories.

Loan Approval Prediction *(Python, Pandas, Scikit-Learn, ML)*

- Built and evaluated machine learning classification models on a Kaggle loan dataset, improving approval prediction accuracy through feature engineering and model comparison.

HAFH Data Warehouse Design *(MySQL, ETL, BI)*

- Designed a star-schema data warehouse and automated ETL workflows using MySQL, improving reporting efficiency and enabling faster dashboard refresh cycles.

Music Sales Dashboard *(Tableau)*

- Created an interactive Tableau dashboard analyzing sales by region, genre, and artist, helping identify revenue growth opportunities across key markets.

CERTIFICATIONS

- Business Analysis Basics (SkillUp)
- Fundamentals of Data Analytics (Leaps Analytica)
- Business Data Analytics & Intelligence with Python (Udemy)
- Cloud Foundations - Training Badge (AWS Academy)
