PERSONAL STATEMENT

Dedicated software developer with experience in Unisys ePortal, AB Suite (LDL+), C#, SQL, and JavaScript. Excels in problem-solving, collaboration, and delivering client-focused solutions. Passionate about applying technology to solve real-world problems and constantly learning new technologies. Open to opportunities at the intersection of technology and a variety of industries.

EXPERIENCE

Software Developer

May 2024 — Dec. 2025

Gemini Business Systems — Carmel, IN

Software Developer Intern, May 2024 — Aug. 2024; Software Developer, Sep. 2024 — Dec. 2025

- Develop and maintain back-end services using Agile Business Suite (AB Suite) and Logic Development Language Plus (LDL+) to support enterprise business solutions for client businesses, reducing system errors and maintaining consistent functionality
- Integrate back-end logic through ePortal middleware (C#) to enable front-end systems to interact with legacy mainframe logic via 18 client-specified APIs, allowing customers to access real-time personal and transactional information
- Collaborate with clients to deliver custom software solutions, troubleshoot system issues, and optimize performance, ensuring alignment with project specifications and reducing reliance on external supports
- Redesigned and developed web interface for company site (HTML/CSS); managed DNS migration and management through GitHub Pages, enhancing site usability and reducing downtime (**internship**)

Data Science Grader

Aug. 2022 — May 2024

Calvin University — Grand Rapids, MI

- Evaluated assignment submissions from 15-40 students per semester, assessing work produced using Microsoft Access, Excel, KNIME, and Tableau, reducing the professor's workload and providing feedback to students
- Tutored 2-5 students per week at weekly help session, improving student understanding and class performance

EDUCATION

Calvin University — Computer Science (BS)

2024

- Domain studies in biology and music
- Minor in biomedical engineering

PROJECTS

Beatle

Aug. 2023 — Dec. 2023

Cross-platform metronome app for complex rhythm and tempo changes built using React Native framework in the Expo Go environment

- **Backend:** PostgreSQL (ElephantSQL) on Microsoft Azure
