EDUCATION

University of Central Missouri
Bachelor of Science in Computer Science

Warrensburg, MO
Dec 2023

WORK EXPERIENCE

VisioNova AI

Gainesville, FL

AI Solutions Architect (Data Scientist-Focused)

Mar 2024 - Present

- Built and deployed LLM-powered chatbots and voice agents for e-commerce clients, improving user engagement and automating end-to-end customer workflows across sales and support
- Designed retrieval-augmented generation (RAG) pipelines using LangChain and vector databases, automating up to 80% of daily operational tasks and enabling scalable inference in production
- Developed context-aware AI voice agents integrated with telephony systems (Twilio), driving a 35% increase in conversion and sales through real-time intent detection and data-driven follow-ups
- Implemented AI systems using OpenAI APIs, prompt optimization, and NLP techniques, incorporating LLM fine-tuning fundamentals to improve response accuracy, latency, and task completion rates
- Automated product recommendations, appointment scheduling, and customer support resolution, reducing manual workload by 60%+ and improving internal SLA adherence and response times

Squirele

Hyderabad, India

Data Analyst

Nov 2021 - Apr 2022

- Supported analytics workloads across Windows and Linux environments, maintaining 99% system availability and achieving a 90% first-contact resolution rate
- Managed network and security infrastructure supporting data pipelines, improving system latency and data integrity while reducing malware incidents by 50%
- Analyzed incident and failure trends to produce data-driven documentation and training, reducing recurring analytics disruptions and increasing self-service resolution

PROJECT EXPERIENCE

AI-Powered Voice Assistant for Retail Sales Optimization

Feb 2025 – Mar 2025

- Built a real-time AI voice assistant using Retell AI and LangChain, integrating CRM data for personalized responses and reducing manual call handling by 70% while improving customer wait times and satisfaction

Freedom With AI

Feb 2023 – Mar 2024

- Designed and tested a structured prompt-engineering framework (“mega prompt”) to systematically optimize LLM outputs, improving response accuracy by 30% through iterative evaluation
- Leveraged AI tools (ChatGPT, generative design) to develop landing pages, ad creatives, and business plans, increasing engagement and click-through rates by 25% via rapid experimentation and data-driven iteration.

Unified Mentor Analytics Suite: Dashboards, Segmentation & Forecasting

Sept 2023 – Dec 2023

- Processed and analyzed multi-source data using Python and SQL, built Tableau dashboards, and applied EDA, clustering, and predictive modeling, improving forecasting accuracy by 20%

NetSuite Data Optimization Initiative

Mar 2023 – Aug 2023

- Designed and implemented data-driven NetSuite customizations to support business requirements, improving data accessibility, schema consistency, and analytics readiness
- Optimized system configurations and workflows to improve data quality, processing efficiency, and reporting reliability across finance and operations datasets

SKILLS

Technical: Microsoft Office (Excel, Word, PowerPoint), Python, SQL, Java, Tableau, LangChain, LlamaIndex, OpenAI APIs, ChatGPT, Selenium, TestNG, Cucumber, Twilio, Vectorshift, 10Web
