Stakeholder Management • KPIs & Time-to-Value Metrics • Jira • SOWs • SDLC • Project/Product Management
Leadership • Cross-Functional Collaboration • Tableau • Python • SaaS Delivery Models • ETL

Leadership and Experience

Versay Solutions – Chicago, IL

Senior Technical Program Manager (Mar 2024 – Present)

- Led the end-to-end delivery of AI-powered customer engagement platforms—including **NLU-driven IVR systems** and **Generative AI-based chatbots**—for Tier 1 telecom clients, driving a **100% increase in client revenue** through automation of high-frequency support workflows and personalized self-service experiences.
- Acted as the strategic delivery partner and **primary point of contact for a \$13M ARR enterprise client**, orchestrating weekly **executive steering committees** to communicate delivery progress, escalate risks, and ensure alignment between AI solution roadmaps and evolving business KPIs.
- Directed full project lifecycle—**scope definition, resource allocation, budget tracking, and risk management**—while ensuring delivery milestones aligned with client success metrics and product SLAs.
- Implemented Agile delivery practices, leading Scrum teams through **sprint planning, backlog grooming, standups, and retrospectives**, supported by **Jira and Confluence**, resulting in a **50% reduction in time-to-production** for AI deployments.
- Managed comprehensive **RAID logs** and operational playbooks to surface blockers early, drive cross-functional resolution, and sustain delivery velocity across engineering, product, and data science teams.
- Facilitated **technical discovery workshops, solution demos, and enablement sessions** with business users and enterprise architects to accelerate **time-to-value** and drive **post-deployment adoption** of AI capabilities.
- Collaborated with Product and R&D teams to integrate **Agentic AI workflows**—including autonomous task delegation and adaptive response generation—into client solutions, enabling more dynamic and context-aware customer interactions.
- Played a key role in refining product features by translating customer insights into actionable backlog items, influencing roadmap decisions around **NLU model tuning, Generative AI persona customization**, and scalable **intent orchestration**.

Level AI – Remote / San Francisco, CA

Technical Program Manager – Customer Implementation (Jul 2022 – March 2024)

- Spearheaded AI SaaS onboarding for insurance/finance clients, achieving 20% customer retention increase through process optimization.
- Developed reusable frameworks, playbooks, and pricing strategy models—cutting contract-to-close cycle by 50%.
- Defined and tracked implementation KPIs, producing executive dashboards on product adoption, usage, and success metrics.
- Collaborated with C-suite to align product strategy and influence roadmap based on onboarding feedback.

Inspire11 – Chicago, IL

Digital Solution Owner / Engagement Lead (Jul 2021 – Jun 2022)

- Delivered mobile pharmacy app for national health insurance client; led team of 30+ across design, product, and QA.
- Co-owned \$2M book of business and led strategic upsell efforts, increasing account value by 25%.
- Established onboarding frameworks and governance structures for large-scale enterprise engagements.
- Partnered with cross-functional teams on GTM strategy, project scoping, and post-launch customer success materials.

Accenture – Chicago, IL

Strategy & Consulting Manager (2019 – 2021)

Digital Strategy Consultant (2018 – 2019)

- Led a \$25M digital transformation for retail client, managing 4 major workstreams and winning \$2M in new business.
- Directed the takeover of global IT support services with a 70-person onboarding and transition team.
- Oversaw enterprise data integration for a \$210B insurance asset platform—managing delivery of 17+ products.
- Created governance models, SOWs, and financial forecasts to support scalable program execution.
