Work Experience

Technical Relationship Representative

Corpay/Comdata Brentwood, TN | June 2023 Present

Technical Solutions & Automation

- Developed a Python script to automate daily data extraction from company APIs, handling large-scale datasets (thousands of customer IDs and hundreds of credit cards per ID), generating CSV reports sent to clients reducing estimated developer time by 6+ months.
- Designed and maintained custom VBA macros to automate mainframe data retrieval and processing, saving the team hundreds of work hours annually.
- Rebuilt and optimized legacy VBA macros to eliminate deprecated ActiveX dependencies, ensuring full compatibility across team systems.

Business Intelligence & Reporting

- Created and customized BI reports for enterprise clients using SAP Business Objects, aligning with client KPIs and business needs.
- Partnered with a major client's Business Analyst to consolidate and streamline their automated reporting system, improving manageability and delivery accuracy.
- Built reusable reporting templates used by third-party partners to process and analyze transaction data for hundreds of end customers.

API Integration & Client Support

- Provided integration support for customers using both legacy SOAP and modern RESTful APIs; authored the official Postman collection to simplify customer onboarding and testing workflows.
- Acted as a liaison between technical teams and clients to translate business requirements into actionable integration solutions.
