PROFESSIONAL EXPERIENCE

ADT | Boca Rotan, Florida

April '2023 – Current

Scrum Lead (Jan'24 – current)

- Serving as the Scrum Master for one or more ServiceNow development teams, facilitating Agile ceremonies including sprint planning, daily stand-ups, sprint reviews, and retrospectives.
- Conduct daily stand-up meetings to track progress, identify impediments, and ensure team alignment.
- Coaching and mentoring team members on Agile principles, practices, and roles, fostering a culture of collaboration, accountability, and continuous improvement.
- Lead sprint retrospectives to reflect on the sprint, identify areas for improvement, and implement action items.
- Facilitate sprint review meetings where the team demonstrates completed work to stakeholders for feedback.
- Helping in clarify requirements and acceptance criteria, ensuring the development team understands the work to be done.
- Working closely with Product Owners and stakeholders to groom and prioritize the backlog, ensuring that user stories are well-defined, estimated, and aligned with business priorities.
- Helping team to remove impediments and obstacles that hinder team productivity and delivery, escalating issues as needed and collaborating with cross-functional teams to find solutions.
- Tracking and reporting sprint progress, velocity, and team performance metrics, identifying areas for improvement and implementing strategies to enhance team effectiveness.
- Promote a culture of transparency, openness, and trust within the team, encouraging constructive feedback and facilitating healthy conflict resolution.
- Identify and remove impediments that are blocking the team's progress, whether they are within or outside the team's control.
- Organize and facilitate sprint planning meetings, helping the team define sprint goals and select backlog items for the sprint.
- Using Agile tools to track the team's progress, maintain visibility into the sprint, and ensure that sprint goals are met.
- Collect and analyze metrics (e.g., velocity, burn-down charts) to monitor team performance and identify areas for improvement.
- Adapt to changes in project scope, timelines, or resources, helping the team remain focused and productive.
- Encouraging the team to pursue continuous learning and development, including training on ServiceNow modules and Agile practices.
- Manage dependencies with other teams or systems, ensuring that the team's work is not impeded by external factors.
- Ensuring that customizations and configurations are done in a way that maintains the integrity and scalability of the ServiceNow platform.
- Collaborated with other Scrum master's and Agile coaches to share best practices, lessons learned, and continuous improvement initiatives across the organization.
- Stay current with Agile methodologies, industry trends, and ServiceNow platform updates, and contribute to the

evolution of Agile practices within the organization.

- Identified opportunities for process improvements, suggest new approaches based on industry trends, and promote creative thinking within the team.
- Collaboration with the development team to agree on what they can achieve during each development sprint setting project scope and establishing measurable goals.
- Offer constructive criticism when needed and encourage open communication among all parties involved. Keeping key stakeholders up to date on the Scrum team's progress, issues, etc.

ServiceNow Implementation | BA Analyst

(April'23 – Jan'24)

- Document the gathered requirements in a clear and structured manner, creating requirement specifications, user stories, and use cases specific to ServiceNow modules.
- Analyze business problems to design and document solutions up front with technical and creative teams.
- Align stakeholders' expectations with what the ServiceNow project can deliver within the set timelines and budget.
- Gather and incorporate feedback from stakeholders to refine requirements and improve the ServiceNow solution.
- Analyze and map current business processes to be automated or enhanced using ServiceNow.
- Act as a liaison between stakeholders and the development team to ensure a clear understanding of requirements.
- Develop test plans and strategies to ensure comprehensive coverage of requirements.
- Create detailed test cases and scenarios for validating the ServiceNow solution.
- Define acceptance criteria for each requirement to ensure that the delivered solution meets business needs.
- Coordinate and support UAT, ensuring stakeholders validate the solutions against their requirements.
- Identify opportunities to improve efficiency in existing processes.
- Identify potential risks related to business requirements and propose mitigation strategies.
- Assess the impact of changes to requirements or scope on the overall ServiceNow project.
- Assist in project planning and scheduling activities, providing input on timelines and resource requirements.
- Define, document, and manage change on business objectives, business requirements and functional requirements.
- Provided regular status updates to project management and stakeholders on the progress of requirement-related activities.
- Developed training materials and conduct training sessions for end-users and stakeholders on the new or enhanced ServiceNow functionalities.
- Create user manuals and guides to help users understand and adopt the ServiceNow solution.
- Ensure effective knowledge transfer to the support and operations teams.
- Gained expertise in specific ServiceNow modules (e.g., ITSM, ITOM, HR Service Delivery) relevant to the project.
- Understand and document the specific configurations and customizations made within ServiceNow.
- Interview stakeholders and facilitate workshops and other requirements-gathering meetings.
- Lead discussions and reviews of requirements with stakeholders including internal team and clients and maintain said requirements throughout the development cycle.
- Contribute to and deliver considered, concise and relevant presentation to colleagues and clients.
- Where possible, assist development resources in documenting user/system interactions, system features, and another technology-focused deliverable.
- Communicate and work within guidelines to ensure maximum search engine optimization and web analytics tracking is achieved in development efforts.
- Experience and/or training in business analysis, with full lifecycle experience on multiple projects, from business case to requirements gathering through functional specs and user acceptance testing from business case to requirements gathering through functional specs and user acceptance testing.

C4D Mortgage | Troy, Michigan

April'2022 – April '2023
