

Aijaz Ahamed A Software Engineer

aijaz@mymailsbox.net | (903) 447-9113 | USA | [LinkedIn](#) | [GitHub](#)

Summary

Experienced Software Engineer with **3+ years** of experience in designing, developing, and maintaining scalable **full-stack** applications using **modern technologies**. Proficient in frontend frameworks like **React** and **Angular**, and **backend development** with **Java** and **Spring Boot**. Strong expertise in cloud platforms including **AWS** and **Azure**, containerization with **Docker**, and **orchestration** using **Kubernetes**. Adept at implementing secure, high-performance solutions with a focus on **automated testing**, **CI/CD pipelines**, and **agile collaboration** to deliver reliable software with high availability and strong compliance standards.

Technical Skills

- **Frontend:** React (Hooks, Context API, React Query), Redux, Angular, NgRx, WebSocket, A/B Testing
- **Backend:** Java, Spring Boot, Spring Security (OAuth2, JWT), Reactive Programming (Web Flux), RESTful APIs, Kafka
- **Databases:** AWS Aurora, DynamoDB, Azure SQL, SQL Query Optimization, Stored Procedures, Data Normalization
- **Cloud & DevOps:** AWS (ECS, Code Pipeline, Code Build, CloudWatch), Azure (AKS, DevOps, Active Directory, Kubernetes), Docker, Blue-Green Deployments, CI/CD (Jenkins, Azure DevOps)
- **Testing:** JUnit, Mockito, Jasmine, Integration & Unit Testing (**90%+** Coverage)
- **Security & Compliance:** IAM Policies, Encryption (at rest & in transit), HIPAA Compliance, InfoSec Collaboration

Professional Experience

Software Engineer, Wealthfront

10/2024 – Present | Remote, USA

- Worked on Real-Time Portfolio Risk Analytics project collaborating with product managers **data scientists** and **QA teams** Led requirement gathering and **agile** sprint planning sessions achieving **98%** on-time delivery of core features aligned with client expectations.
- Developed frontend using advanced **React** features including hooks context **API** and **React Query** Implemented interactive risk heatmaps real-time alerts and **A/B testing** Managed global state with **Redux** collaborating closely with **UX** and **backend** teams.
- Designed and optimized **AWS-hosted** databases using **Aurora** and **DynamoDB** improving query performance by **45%**. Implemented **encryption** at rest and in transit and enforced strict **IAM** policies to maintain **100%** compliance with security standards.
- Built scalable **backend** services in **Spring Boot** leveraging reactive programming with **Web Flux** advanced **caching** and **Kafka** event-driven architecture. Implemented sophisticated portfolio risk algorithms and maintained **99.9%** uptime for real-time data processing **APIs**.
- Achieved **92%** unit and integration test coverage using **JUnit** and **Mockito** Automated **CI/CD** pipelines with **AWS** Code Pipeline and **Code Build** reducing deployment time by **50%** and maintaining **95%** successful build rate.
- Deployed **microservices** on **AWS ECS** with **Docker** containers collaborated with **DevOps** engineers for **blue-green** deployments **auto-scaling** and monitoring via **CloudWatch** ensuring **99.99%** availability and zero downtime during updates.

Software Engineer, Acentra Health

06/2022 – 08/2023 | Chennai, India

- Developed and maintained the **Provider One** Application with **95%** sprint success rate, collaborated with product, design, and QA teams in **agile** workflows, and led requirement gathering for critical healthcare management features.
- Led frontend development using **Angular** with **98%** reusable component coverage, implemented real-time **WebSocket** updates, managed state using **NgRx**, conducted **A/B testing**, and delivered key features like **Eligibility Checker** and **Payment Tracker**.
- Engineered and optimized **Azure SQL** databases, improving query performance by **40%**, designed normalized schemas, created stored procedures, and collaborated with the data engineering team to support high-throughput **healthcare** transactions.
- Built scalable backend services using **Java** and **Spring Boot** with **99.5%** uptime, implemented **RESTful APIs** and **WebSocket** endpoints, and modularized **business logic** for claims processing, user management, and enrollment.
- Enforced robust security using **Spring Security** with **OAuth2** and **JWT**, integrated **Azure** Active Directory for enterprise **SSO**, collaborated with **InfoSec** team to resolve **100%** of vulnerabilities and ensure **HIPAA-compliant** architecture.
- Achieved **90%** test coverage with **JUnit** and **Jasmine**, implemented **CI/CD** using **Azure DevOps**, deployed services on **Azure Kubernetes Service**, and worked with **DevOps** team to ensure **zero-downtime** rollouts and **blue-green** deployment strategies.

Jr. Software Engineer, Acentra Health

01/2021 – 06/2022 | Chennai, India

- Assisted in backend development using **Java** and **Spring Boot**, created scalable **RESTful APIs** for claims validation, integrated **Kafka** for event-driven architecture, and improved processing efficiency by **30%** through asynchronous workflows and modular service design.
- Collaborated in designing database models for claim records, optimized **SQL queries**, performed **data normalization**, and ensured **consistency** across services by working closely with the database team to maintain performance and support **transactional accuracy**.
- Wrote unit and integration tests using **JUnit** and **Mockito**, supported **CI/CD** with **Jenkins**, maintained **Git repositories**, participated in **agile stand-ups**, and contributed to achieving **95%** deployment success rate through rigorous **code reviews** and **automated pipelines**.

Education

University of North Texas

Master of Science in Computer Science

SRM Institute of Science and Technology

Bachelor of Technology in Computer Science

Denton, TX, USA

08/2023 – 05/2025

Chennai, India

07/2019 – 05/2023

Certifications

- Completed **AWS Certified Cloud Practitioner** and **AWS Certified Solutions Architect – Associate** credentials.
- Completed the **Google Cloud Digital Leader** certification and **Oracle Certified Java SE 11 Developer** credential.
- Earned certifications in **Data Structures & Algorithms in Java** from Stanford University and **DevOps Foundations** by LinkedIn Learning.
- Published a technical article on **Scalable Microservices Architecture** in the *International Journal of Emerging Tech Research (IJETR)*.
- Completed the **AI for Software Engineers** program by DeepLearning.AI and the **Backend Engineering Simulation** by JP Morgan Chase.
