

Professional Skills:

- Having 5+ years of experience as a **Business Analyst**.
- Experience working in Data warehouse Design, methodologies **Extraction, Transformation and Loading, Data Analysis, Data migration, Data preparation, Data Validation, Data Quality, Data Profiling, Graphical Presentation, Statistical Analysis, Reporting and Documentation**.
- Expertise in SQL Server Integration Services (**SSIS**) and SQL Server Reporting Services (**SSRS**).
- Proficient in SQL queries for data extraction, transformation, and loading (ETL) operations on large datasets.
- Expertise in Gathering Requirements sessions and Interviews with end users and translating those requirements to Functional/System requirement and prepared specification documents.
- Experience in all the latest BI Tools **Tableau and Power BI**.
- Extensive experience in working with Tableau Desktop, Tableau Server and Tableau Online in various versions of Tableau.
- Used **AGILE** Methodology and **SCRUM** Process.
- Hands-on experience in testing environments including Automation testing with Selenium. Strong knowledge in different phases of Software Development Life Cycle (SDLC) including design, implementation & testing during the development of Software applications.
- Very good experience in **creating & customizing Solutions**.
- Ability to learn and adapt quickly to the emerging new technologies.
- Experience in Text Analytics, developing different Statistical Machine Learning, Data Mining solutions to various business problems and generating data visualizations using **R** and **Python**.
- Proficient in machine learning (ML) algorithms, including decision trees, random forests, support vector machines (SVM), logistic regression, gradient boosting, k-nearest neighbors, neural networks, naive Bayes, and k-means clustering.
- Good communication, interpersonal and analytical skills, and a motivated team player with the ability to work independently.

Certifications Details:

- Certified as RPA Developer Advanced in UIPATH Platform, C#.
- Other Certifications: AD Fusion 360 - ALM
- AWS Data Engineering - Foundations
- Business Analysis - ECBA, CCBA, CBAP

Technical Summary:

Skills	Tools
Microsoft Office Suite	Microsoft Excel, PowerPoint, Visio
Language	Python, R Programming, HTML, C, Java
SQL Server Tools & Packages /BI tools	SQL Developer, MySQL, Performance Monitor, SQL Server Agent, SSRS, ETL, Data Transformation Services.
Statistical Softwares	SAS, SPSS
Data Visualization	Tableau, Power BI, Matplotlib, plotly
Operating Systems	Windows 7/8/10, Mac OS X
Algorithms	Linear Regression, Lasso & Ridge, Logistic Regression, KNN, naive Bayes, Decision Tree, Random Forest, SVM

Working Experience:

Motorola solutions

05/2023 – Present

Role: Business Analyst

Contribution:

- Develop business architecture using requirements such as scope, processes, alternatives, and risks.
- Data Mining using different querying techniques using SQL.
- Use MS Excel, Word, Access, and PowerPoint to process data, create reports, analyze metrics, implement verification procedures, and fulfill client requests for information.
- Utilized Tableau server to publish and share the reports with the business users.
- Participated in meetings, reviews, and user group discussions as well as communicating with stakeholders and business groups.
- Expertise in transforming business requirements into analytical models, designing algorithms, building models, developing data mining, and reporting solutions that scales across massive volumes of structured and unstructured data.
- Conducted data transformation and cleansing using SQL queries within the Dataflow environment.
- Conducted performance tuning for ETL workflows within Google Cloud Dataflow to enhance data processing speed and minimize latency.
- Involved in testing the database using complex SQL scripts and handled the performance issues effectively.
- Collaborated with stakeholders to ensure accurate data acquisition and integration.
- Mentored business power users to create reports/dashboards using tableau desktop.
- Use MS Excel, Word, Access, and PowerPoint to process data, create reports, analyze metrics, implement verification procedures, and fulfill client requests for information.

Accenture Solutions Pvt Ltd., Bangalore, India.

05/2019 - 07/2022

Role: Data Analyst

Contribution:

- Gather and discuss the requirement from the client, stakeholders, and the business team, devise the architecture and process it with the team.
- Hands on experience with MS Office (Excel, PowerPoint and Visio) and Data crunching with excel.
- Capturing the functional requirement documents, technical requirement documents.
- Used DDL and DML for writing triggers, stored procedures, and data manipulation.
- Created and modified Business Intelligence analytical reports using Tableau.
- Created customized Tableau Dashboards, integrating Custom SQL from Teradata and Oracle and performing data blending in reports.
- Designed and implemented data integration modules for Extract/Transform/Load (ETL) functions.
- Facilitate the collaboration and coordinate development activities within an agile development environment.
- Created leadership summaries, reports and client presentations.
- Responsible for Ad-hoc reporting, which consists of Client and account data reporting.
- Review the solution design and code and provide feedback to the team.
- Support project planning by providing technical details on tasks, estimates, resource projections and project preparations.
- Developed and delivered presentations to senior management to communicate findings and recommendations based on analysis results.
- Created reports and dashboards using Bar Chart, PIE Chart, Donut Chart, Gauge, MAP, Waterfall Charts, Filters, and Slicers.
- Drives privacy and security by design in collaboration with development, implementation, and support teams.
- Performed Data validations, Data quality check and Testing.

Education Details:

- Master of Science in Computer Science
Virginia Commonwealth University, Richmond, VA, USA.
- Bachelor of Technology in Electronics and Communication Engineering
Koneru Lakshmaiah University, AP, India.
