

AKHIL KUMAR SANNIDIKOVELA
SENIOR FULL STACK .NET DEVELOPER

Email: akhilkumar.sannidikovela@gmail.com

Contact No: 940-263-1099

PROFESSIONAL SUMMARY:

- Highly motivated IT professional with progressively responsible experience of around 8+ years in development, testing, documentation & production support customized applications.
- Passionate developer with 8+ years of experience in design, development, testing and maintenance of large enterprise web applications in fast paced Agile methodology.
- Experience in building web applications using C#.NET, SQL Server, ASP.NET Core, ASP.NET MVC, Web API, ADO.NET, Entity Framework, HTML, CSS, JavaScript, jQuery, AngularJS, Angular, Bootstrap, Visual Studio.
- Expertise in designing applications using modern architectures like Micro Services, N-Tier, Service- Oriented (SOA) and Client/Server Model.
- Skilled in developing user interfaces (UI) using various technologies, including AJAX, HTML5, CSS, JavaScript, React JS, jQuery, Bootstrap, and Web UI applications, Angular.
- Developed Micro Services to handle business logic and make the application light weight for better performance.
- Expertise in Object Relational Mapping (ORM) frameworks like Entity Framework, LINQ.
- Experience in working with the data model, writing scripts using Stored Procedures, User Defined Functions and Triggers in SQL SERVER and Oracle database.
- Expertise in developing UI pages with Angular 2/5, HTML5, CSS3, JavaScript, and Bootstrap.
- Hands-on experience in working with Angular 5 and NgRx for single-page application development and management.
- Created Single Page web applications with rich and responsive user interface using UI technologies like HTML, CSS, JavaScript, jQuery, Angular and Bootstrap.
- Good Experience in automating CICD pipeline to deploy applications to multiple environments using tools like Bamboo, Azure DevOps, and PowerShell scripts.
- Good experience working with Microsoft Azure cloud services - Paas.
- Strong experience in ASP.NET Core, C#.NET, SQL and Micro Services architecture.
- In-depth understanding of Object-oriented Programming concepts and Design Patterns.
- Experience in Agile-Scrum Methodology.
- Ability to learn new technologies quickly and adapt to new environments.
- Experience in working with Bootstrap3, HTML, CSS, JavaScript, jQuery, ADO.Net Entity Framework and LINQ (LINQ to Object, LINQ to SQL, LINQ to XML, Lambda).
- Extensive understanding on creating and managing Views, Partial Views, View Model in ASP.NET MVC.
- Expert in writing T-SQL statements for creating Tables, Indexes, Views and Constraints and stored procedures.
- Extensively worked in writing DB Connections, DB Queries, Stored Procedures, Triggers, Cursors, Exception Handlers, Crystal Reports, SSIS and SSRS.
- Involved in Front-end development using web Technologies like HTML5, React JS, Silverlight, CSS3, Java Script, XML, J Query, XHTML, JSON, AJAX, TypeScript, and Angular JS.
- Well versed with Test Driven Development, used JUnit and Visual Studio Test Tools for Unit testing.
- Experience in working with GIT, Team Foundation Server (TFS) source control. Created new team projects under team project collections, merging and branching to support parallel development.
- Hands on Code Reviews, Change, Configuration, Release & Build Management and Administration of applications.
- Excellent communication, analytical, problem-solving skills, strong teamwork orientation, dedicated to quality output for the team or to individual assignments as required by the work environment. Self-Starter, willing to learn new technologies, ability to learn fast, and determined to achieve.

TECHNICAL SKILLS:

Microsoft Technologies	Visual Studio 2015/2017/2019/2021, ASP.NET MVC5, ASP.NET Core 3.1, ASP.NET Web Forms
-------------------------------	--

Programming Languages	C# .NET
Databases	SQL Server 2012/16/19, Oracle 12
Web Services Concepts	Web API (Rest/Http) Services, XML, JSON
Web Technologies	HTML, CSS, JavaScript, AJAX, jQuery, React js, Angular JS, Angular2/4/5/6/7/9/12/13 Bootstrap
ORM Technologies	ADO.NET, Entity Framework, LIQ.
Operating Systems	Windows 10
Web Servers	IIS, Microsoft Azure
CICD Tools	Bamboo, Azure DevOps
Scripting	PowerShell
Testing Tools	Unit Testing (N-Unit and X-Unit) frameworks, Moq Framework
Other Tools	Postman, MS Office
Design Methodologies	Agile Methodology, Waterfall
Version Control	Bit Bucket, GitHub, TFS
Others	JIRA, Vera Code

PROFESSIONAL EXPERIENCE:

Client: Charles Schwab, Westlake, TX

Jan 2024 – Present

Role: Senior Full Stack .Net Developer

Responsibilities:

- Involved in Epic Grooming, Story Refinement, deciding the acceptance criteria along with Product Owner and Quality Analyst before pulling into the sprint.
- Development in Agile-Scrum Methodology to ensure quality in a fast-paced environment.
- Developed the application using C#, ASP.NET Core, HTML, CSS, Angular, Bootstrap and SQL Server in Micro Services Architecture.
- Decoupled application into Microservices using ASP.NET Core, Web API to handle business logic, improved performance, and code maintainability.
- Demonstrated excellent troubleshooting skills while working on Production issues.
- Implemented OAuth Token-Based Authentication to ensure security of the Application and Role-based Authorization to restrict content access.
- Designed, developed, and maintained secure, scalable web applications using ASP.NET MVC, .NET Core, and Java/J2EE technologies in a hybrid Windows and Microsoft environment.
- Developed and deployed solutions using Visual Studio, SQL Server Management Studio (SSMS), and Azure DevOps pipelines for continuous integration and delivery.
- Built RESTful APIs and Web Services, ensuring seamless communication between .NET, Java-based applications, and external systems.
- Worked with IBM Rational Application Developer (RAD) and Eclipse IDE for developing and maintaining Java applications on WebSphere Application Server.
- Designed normalized MS SQL Server database schemas, wrote optimized stored procedures, triggers, views, and managed data models and architecture diagrams.
- Employed RESTful architecture in Angular versions 13, integrating Web API for asynchronous data retrieval. Developed Angular 2 to 13 controllers for managing view data and utilized Web API to interact with RESTful services.
- Performed Custom validations of HTTP Requests using delegates.
- Implemented parallel processing concepts as part of developing business logic.
- Worked Extensively with Angular CLI for creating components, Services, pipes, Directives.
- Developed templates, controllers, and directives using Angular 12/13 and Typescript for UI development.
- Created multiple Angular components based on the customer information pages.

- Created Angular service and integration with Restful APIs. Used Angular Http Client to send GET/POST request to fetch data from server.
- Good experience in React JS for creating interactive UI's using one-way Data flow, Virtual DOM, JSX, React Native concepts.
- Created, deployed, and maintained solutions on Azure App Service model with Restful API's utilizing resource groups and services on Azure portal.
- Used React JS to make Webpages rendering faster, instead of using ng-repeat in Angular JS used React to achieve the same.
- Implemented Azure application insights to store user activities and error logging.
- Developed templates, controllers, and directives using Angular 12/13 and Typescript for UI development.
- Worked with SQL Server as data Repository, Used LINQ to SQL together with Entity Framework Core.
- Writing data access classes, triggers, created Views and store procedures.
- Performed code reviews, worked closely with team members to maintain coding standards.
- Experienced with Angular 12/13 templates, directives, routing, navigation, components, services, and data binding.
- Ensured application is error free at root level by following TDD pattern using X-Unit framework.
- Implemented CICD Pipeline to deploy applications to cloud using Azure DevOps and PowerShell scripts.

Environment: Visual Studio 2019/2021, ASP.NET Core 3.1, C#.NET, SQL Server 2016/2019, LINQ, Entity Framework Core, HTTP/REST Services (Web API), Angular 12/13, HTML/HTML5, CSS/CSS3, JavaScript, Bootstrap, GIT, Azure DevOps, PowerShell, Microsoft Azure, X-Unit, Oracle.

Client: Komodo Health, San Francisco, CA

Dec 2021 – Jan 2024

Role: Senior Full stack .Net Developer

Responsibilities:

- Gathered User Requirements, involved in grooming to break it into stories, and designing the acceptance criteria.
- Worked on Agile Methodology to meet timelines with quality deliverables.
- Developed web application implementing razor view engine, view, partial view, models, and layout view using ASP.NET MVC, HTML5, CSS, JavaScript, jQuery and Bootstrap.
- Implemented AngularJS Controller functions, service using Controller methods to set up initial state of the object.
- Used AngularJS filters for search, sorting, pagination, custom filters and ASP.NET MVC Data Annotations to do validations on the Model Data.
- Employed Angular Router to enable smooth navigation between application tasks as the agent progresses through the application.
- Integrated eCommerce payment gateways and developed secure payment processing solutions within enterprise web applications.
- Developed, tested, and deployed applications in cloud environments like Azure and AWS, utilizing modern DevOps practices.
- Collaborated with cross-functional teams through Microsoft Teams, SharePoint Online, and Microsoft 365 Services in an Agile/Scrum environment.
- Troubleshot complex issues in production and staging environments, performed root cause analysis, and implemented long-term fixes.
- Documented program specifications, technical workflows, and architectural designs to support ongoing project development and knowledge transfer.
- Implemented Angular8 Router to enable navigation from one view to the next as agent performs application tasks.
- Setup development environment using latest Blazor.Net with Asp.Net Core 3.0
- Developed ASP.NET Core Web API based on departmental requirements and specifications.
- Used Angular8 and Typescript to develop single page application (SPA).
- Designed and implemented an Angular JS framework, encompassing MVC architectures, distinct modules, controllers, templates, custom directives, custom filters, and addressing various angular scope issues.
- Assumed responsibility for client-side UI Validation and implemented Business logic based on user selection, utilizing jQuery UI and AngularJS.

- Used Action Filters for implementing user authentications, authorizations, and role-based security.
- Used Exception Filters for handling errors raised by the controller action results.
- Used JQuery JSON for dynamic user interface, retrieval and posting of data and Ajax to fetch data from controllers to update user data asynchronously.
- Designed and developed UI, User Controls, and Client-Server Side Validation Controls using Web API, JavaScript, Bootstrap, Knockout JS, JavaScript, Angular9, AngularJS, React Js, Redux, React Native, Saga and Ajax.
- Extensively worked with LINQ provider and designed the user level application, which will build and execute a query expression for Server Side.
- Passed data between parent-child components using @Input, @Output, Event Emitter, View Child and diff types of subjects like behaviour subjects.
- Involved in coding and designing using C#, XML, ADO.NET, WCF, JavaScript, React JS, Underscore JS, jQuery, HTML, and Cascading Style Sheets (CSS).
- Utilized Angular Material as well as Bootstrap and CSS3 to ensure responsiveness across different devices and screen sizes.
- Implemented Angular Components. Implemented ASP.NET Web API service calls using RxJS.
- Created Azure Pass services like Functions, Azure storage Queues, Azure Cosmos DB.
- Used ADO.NET and LINQ queries for retrieval of data from AZURE COSMOS DB using disconnected architectures.
- Created Template driven and Reactive forms for building complex forms.
- Implemented data access layer using Entity Framework to connect, retrieve and update data from SQL server.
- Written multiple Stored Procedures, Triggers, and functions in SQL Server.
- Contributed to QA testing when needed by drafting story test cases in JIRA.
- Used GitHub for version Control and source code maintenance needs.

Environment: Visual Studio 2017/19, ASP.NET MVC 5, AngularJS, C#.NET, SQL Server 2016/2019, LINQ, Entity Framework, HTML/HTML5, CSS/CSS3, JavaScript, React Js, Ajax, jQuery, Bootstrap, Azure, GitHub, JIRA, IIS, N-Unit.

Client: Comcast, Philadelphia, PA

May 2020 – Nov 2021

Role: Senior .Net Developer

Responsibilities:

- Involved in the SDLC of requirement analysis, design, and development of the web-based application in the fast-paced agile methodology.
- Designed and developed web pages using ASP.NET MVC, C#.NET, HTML, CSS, JavaScript, jQuery and Bootstrap.
- Efficiently designed Views, Partial Views, View Models and Action Filters in ASP.NET MVC.
- Implemented Web form controls to create responsive web pages developed master pages.
- Used JQuery and javascript for implementing client-side validations at controller level.
- Used Angular2 framework where data from backend is stored in model using http and security configurations for authentication and authorization for populated model on to UI.
- Created Typescript reusable components and services to consume REST API's using Component based architecture provided by Angular 2.
- Developed ASP.NET user controls adding component reusability.
- Implemented Web Parts, AJAX, web services and globalization in the project. Database design and development of database objects in SQL Server 2008 using oop SQL Server Management Studio Express.
- Created stored procedures to load the data coming from external systems to SQL Server 2008.
- Front End/ UI developer with expertise in AJAX, JavaScript, JQuery, HTML5, CSS3.
- Developing the application using MVC, Entity Data Model and RESTful and WCF services.
- Created custom elements, HTML imports, shadow DOM to allow fully encapsulated custom elements by using Angular 2.0.
- Implemented HTML Helper MVC WebGrid with JQuery for boosting the pagination performance and load graphical data with JSON. Also supporting custom searching along with sorting the data with partial views.
- Worked with Azure DevOps for project management and Git for version control purposes.

- Used Azure CI/CD pipelines for application deployment in various environments. NGRX store was used to store results after angular injector observables retrieved the data from backend.
- Added logic to dispatch the action to the NGRX store, this was done to update the store and to update components subscribed to that store.
- Migrating complex, multi-tier applications on Azure.
- Experience with supporting SQL Server within an Azure PaaS environment.
- Implemented Service layer for the applications using Entity Framework and LINQ to objects.
- Extensively used Asynchronous JavaScript Calls to do data processing.
- Implemented Authentication and Role based Authorization for ASP.NET MVC application.
- Written SQL Scripts for creating database tables with foreign key relations in SQL Server using T-SQL.
- Designed and developed several SQL Server Stored Procedures, User Defined Functions, Triggers and Views for all the DML functionality of the application.

Environment: Visual Studio 2017, ASP.NET MVC 5, C#.NET, SQL Server 2016, LINQ, Entity Framework, HTML/HTML5, CSS/CSS3, JavaScript, React JS, jQuery, Bootstrap, TFS, JIRA, IIS

Client: EXADATUM SOFTWARE SERVICES, Hyderabad, India

Apr 2018 – Dec 2020

Role: .Net Developer

Responsibilities:

- Designed and developed web application using ASP.Net Web forms. Implemented Master page, user controls, validation controls in web forms.
- Implemented Authentication and Authorization in ASP.Net Web forms.
- Extensively designed front-end UI using CSS, HTML5, JavaScript and Bootstrap.
- Designed and developed various abstract classes, interfaces, classes to construct the business logic using C#.
- Used LINQ to Entities, LINQ to Dataset that enables program data access using intuitive native syntax and strongly typed objects in .NET Framework languages.
- Develop user interface by using Telerik Kendo UI, jQuery, JavaScript, JSON, AJAX, and HTML5.
- Implemented page action using Angular JS, including custom directive, custom service.
- Used AngularJS HTTP (post and get) to retrieve data through Web API from entity framework.
- Built front end single-page web application (SPA) using Angular JS.
- Designed and custom application pages using HTML5, JavaScript, AJAX and C#, .NET as code behind.
- Responsible for setting up the AngularJS framework to achieve data binding between HTML5 and JavaScript objects with JQuery.
- Created ADO.NET objects like Dataset, Data Reader, and Data Adapter to connect to the database in DAL Layer.
- Wrote Queries, Stored procedures, joins to process large collection of products and retrieve data from database using Oracle database.
- Actively involved in release support like preparing deployment instructions, handling issues during and after deployment.
- Involved in Unit Testing, Integration Testing and System Testing. Responsible for maintaining versions of source code using Team Foundation Server (TFS).

Environment: Visual Studio 2015/17, TFS, C#.NET, ASP.Net Web forms, Oracle 12, XML, LINQ, ADO.NET, JavaScript, jQuery, HTML, CSS, JIRA, IIS.

Client: Dot squares Technologies India Pvt. Ltd, Jaipur, India

Sep 2016 – Mar 2018

Role: .Net Developer

Responsibilities:

- Developed various abstract classes, interfaces, and classes to construct the business logic within the Model using .NET Core spearheaded the implementation of large and highly complex applications.
- Implemented and maintained monitoring and alerting for production and corporate servers/storage using AWS CloudWatch.
- Created a reusable framework for the application using .NET Core. Managed various AWS environments for provisioning Linux servers and services provided by third-party vendors.

- Designed and built effective web forms based on technical designs and requirement specifications.
- Utilized WCF Endpoints and Contracts to enable access to services across different protocols, applications, and platforms.
- Skillfully incorporated Windows Presentation Foundation (WPF) components into the Presentation Layer, combining the power of .NET Core with rich and dynamic user interfaces.
- Employed WPF's data binding capabilities to establish a strong connection between user interface elements and underlying data sources, enabling real-time updates and synchronization.
- Designed interactive dashboards and data visualizations using WPF's charting and graphing controls, enhancing data-driven decision-making for end-users.
- Leveraged WPF's support for input validation and error handling to ensure a smooth and user-friendly experience, effectively preventing erroneous data submissions.
- Defined AWS Security Groups as virtual firewalls to control traffic reaching AWS EC2 instances. Managed servers on the Amazon Web Services (AWS) platform instances using Puppet and Chef Configuration management.
- Created numerous Microservices and APIs for the application and integrated existing Microservices from another team. Deployed existing applications to EC2 Instances after every enhancement.
- Expertise in implementing a rich user interface using Angular, TypeScript, CSS, and HTML.
- Designed and built AWS failovers, fault-tolerant websites with auto-scaling and load testing using multiple EC2 instances.
- Utilized JSON to transmit data between the server and web application, as an alternative to XML Serialization.
- Experience in Microsoft Azure DevOps Build/Release management and configuration of CI/CD pipelines.

Environment: Visual Studio 2019, .Net Core 3.5, Node.js, PostgreSQL, WCF, jQuery, Angular2, TFS 2010, GitHub, IIS 7.0, JavaScript, SSRS, SSIS, Typescript, Html, CSS, XML, Microsoft Enterprise Library, AWS, Db Beaver, EC2 Instances, Load Balancer, Docker Image, Postman, RDB, Linux and Jira.

EDUCATION: Bachelor of Technology (B. Tech) in Information Technology from JNTUH, Hyderabad, Telangana, India. – 2016
