

Akhilesh Muthyala

JAVA DEVELOPER

5138797606 | akhileshmuthyala.j@gmail.com | linkedin.com/in/akhileshmuthyala/

PROFESSIONAL SUMMARY

4+ years of experience in the IT Industry involving Analysis, Design, and testing of web-based and client-server multi-tier applications using **Java/J2EE** technologies. Experienced in implementing OOPS concepts using Java/J2EE technologies such as **Core Java** (Collections, Generics, Enums, Annotations, etc.), **Servlets**, **Hibernate**, and **Web Services**. Well-versed in all stages of the Software Development Life Cycle including proposal, process engineering, requirement analysis, design, development, testing, deployment, and support and maintenance with various methodologies such as Waterfall, Incremental, Iterative, and Agile models.

TECHNICAL SKILLS

Domain	Banking, Finance, Healthcare, Insurance
Technologies	Java, PL/SQL, Python, C, HTML
Database	Microsoft SQL, MySQL, Mongo DB
Frameworks	JavaScript, Spring Boot, Microservices, Spring Framework, Hibernate, Mockito, Junit
Design Patterns	MVVM, MVC
Cloud Technologies	Microsoft Azure, Azure DevOps, AWS
Tools	Maven, Junit, Log4j, GitHub, MS Office, Tableau, Power BI, Power Shell, SoapUI, Postman, Jira
IDE	Visual Studio Code, Visual Studio Enterprise, Eclipse, IntelliJ, SQL Server Management Studio (SSMS)
Delivery Methodologies	Agile, Scrum, Waterfall

CAREER HISTORY

University of Cincinnati

Aug 2022 – Apr 2023

Graduate Teaching Assistant

- Collaborated with faculty to develop new approaches to teaching information technology research methodologies.
- Mentored graduate students in Information Technology research methods.
- Utilized statistical software and data analytics tools to analyze class data to identify trends and patterns.
- Conducted research in various areas of Information Technology, including Artificial Intelligence, Machine Learning, Data Science, and Cybersecurity, to facilitate efficient classroom learning and assess students.
- Provided support and guidance to students struggling with course material, resulting in improved academic performance.
- Assisted professor in creating and delivering lectures for Information Technology Research Methods course.

Anthem Health Insurance Company

Jan 2020 – Dec 2021

Software Engineer

- Developed the application framework using MVC architecture using **JSF**, **Spring Boot**, and **Hibernate**.
- The base architecture was designed as per the MVC architecture using the Front Controller Design pattern based on the application requirements.
- Developed **Java Script** and implemented validation framework for Client-Side validations.
- Developed **Junit** test cases for the JAVA API and deployed them into the AWS cloud.
- Monitoring agent on each service instance by Microservices monitoring system.
- Used JSF tags and Content Server tags for writing Java, JSF code, and rendering the assets.
- Involvement in the Creation of Basic Assets and publishing of content assets to the Website.
- Developed an XML-based editor interface that allows users to easily enter data for the attribute.
- Actively participating in agile ceremonies like PI planning, sprint planning, retrospectives, etc.
- Work closely with Architects, business users, and the testing team to deliver the production-ready code in a timely manner and also actively meet with Development Manager to discuss the work in progress and also the value additions to the projects.
- Spring Boot Microservices development with microservice architecture using **REST** and **Apache Kafka**
- Work with architects & team leads in value additions to the current processes like the development of a health check application, which enables customers to continuously monitor all the services & databases are up and running.
- Developed DAOs, and Spring Controllers in the backend. Deployed artifacts into AWS using **CI/CD**.

Associate Consultant

- Design and development of applications in MVC architecture using **JSP, Servlets, Spring, HTML**, and **JavaScript**.
- Database objects like Triggers, Stored Procedures are written in **SQL**.
- Used **SOAP** web services for the transmission of large blocks of XML data over HTTP.
- Used Web Services for creating rate summaries and used **WSDL** and **SOAP** messages for getting insurance plans from the different modules and used XML parsers for data retrieval.
- Involved in writing Spring configuration XML file that contains declarations, and business classes are wired up to the frontend managed beans using Spring IOC pattern.
- Developed full-stack solutions, based on a set of standards, patterns, and processes that establish consistency across the enterprise data, reduce risk, and promote efficiencies in support of the organization's goals and objectives.
- Involved in daily standup meetings and will update the team with project progress, current status, and plan of action.
- Development of **APIs** and **Microservices**.
- Develop, debug, test, and fully document programs or processes following industry standards and best practices.
- Built and deployed the application using **Maven**.
- Collaborated with cross-functional teams to analyze client requirements and participated in peer code reviews.
- Mentored and trained junior consultants; provided guidance and support to develop their skills and advance in their careers.

CERTIFICATIONS			
• Microsoft Certified - Azure Fundamentals • IBM Certified - Database Associate DB2 9 Fundamentals • America's Health Insurance Plans (AHIP) Certified - Professional, Academy for Healthcare Management (PAHM)		• Microsoft Certified - Azure Data Fundamentals • Oracle Certified - 1Z0-808 Java SE 8 Programmer-1 • Scaled Agile Certified - SAFe 5 Practitioner	
EDUCATION			
Master of Science, Information Technology University of Cincinnati, OH		Jan 2022 – Apr 2023	GPA: 4.0/4.0
Bachelor of Technology, Electronics and Communication Engineering JNTUH, India		Aug 2013 – Jun 2017	GPA: 4.0/4.0
