

AKSHIT REDDY GADEELA

Data Analyst

Akshitreddy6363@gmail.com | 469-547-7308 | TX | [LinkedIn](#)

SUMMARY

- **Data Analyst** with over 3+ years of experience in database management, dashboard design, and statistical analysis.
- Proficient in leveraging **AWS, Azure, and GCP** services, including S3 for data storage, RedShift for data warehousing, Azure Data Lake for scalable storage, and Blob Storage for unstructured data.
- Proficient in processing, analyzing, and managing large-scale datasets using Big Data tools like **Spark, PySpark, and Kafka** to optimize **ETL workflows**.
- Expertise in developing interactive dashboards in **Power BI and Tableau**, providing real-time insights for informed decision-making.
- Proficient in **Python, SQL, and Java**, utilizing data visualization tools to drive strategic business decisions.
- Experience in querying, manipulating, and optimizing 1TB+ of transactional data across **MySQL, Oracle, MongoDB, and PostgreSQL** to support business insights.
- Knowledgeable in version control using **Git and GitHub**, and experienced with deployment and automation tools like **Docker and Jenkins**, reducing deployment errors

SKILLS

- **Programming & Scripting:** Python, SQL, Java, Python Script, R
- **Methodologies:** Agile, Waterfall
- **Data Visualization:** Power BI, Tableau, Microsoft Excel (Advanced, Pivot Tables, Macros, VBA, Data Modeling)
- **Libraries:** NumPy, Pandas, SciPy, PySpark, Matplotlib
- **Version Control Tools:** Git, GitHub, Docker, Jenkins, Visual Studio
- **Databases:** MySQL, SQL, Oracle, MongoDB, NoSQL, Cassandra, PostgreSQL
- **ETL Tools:** Informatica, SSIS, Talend, Apache Nifi, ETL Automation
- **Big Data & Machine Learning:** Hadoop, Spark, Data Modeling, Machine Learning (Model Training), Hive
- **Cloud Platforms:** AWS (S3, EC2, Redshift, IAM, Glue), Azure (Databricks, Data Lake, Data Factory), SharePoint
- **Data Analysis:** Data Mining, Statistical Analysis, Reporting, A/B Testing, Data Warehousing
- **Data Warehousing:** Snowflake, Redshift, Azure Data Lake, Big Query, Data Modeling, Data Migration

PROFESSIONAL EXPERIENCE

BCBS

Jul 2024 - Present

Software Engineer/ Data Analyst

USA

- Optimized **Snowflake** data warehousing processes, refining query execution and performance tuning, enhancing data retrieval efficiency for large-scale healthcare datasets.
- Streamlined scalable **AWS (EC2, S3)** pipelines for healthcare data, reducing data retrieval latency from 5 minutes to 2 minutes per query, ensuring **HIPAA-compliant** storage for patient records and claims data.
- Deployed **Python (Pandas, NumPy)** to perform **exploratory data analysis (EDA)** on healthcare claims data, pinpointing bottlenecks that accelerated patient claim processing by 8 hours weekly, improving patient satisfaction.
- Optimized **SQL queries** in **Snowflake & MySQL**, handling 500M+ patient records, reducing report generation time from 10 minutes to 3 minutes for critical healthcare metrics like patient readmission rates.
- Built **Power BI dashboards** with **DAX calculations** to analyze patient wait times and ER overcrowding, aggregating data from **5+ sources** (EHRs, billing systems) and providing actionable insights that reduced patient wait times by **20%** and improved ER efficiency.
- Automated **ETL workflows**, reducing manual data processing time from 12 hours to 4 hours weekly, generating Seaborn visualizations to analyze population health trends across 10K+ patient records.
- Applied advanced **SQL** optimizations, reducing query execution time from 60 seconds to 15 seconds via indexing and partitioning, accelerating analytics for real-time patient risk stratification.
- Leveraged **Excel (VLOOKUPS, Pivot Tables, automation)** for data reconciliation, enabling faster reporting and improving healthcare operational insights.
- Collaborated with cross-functional teams, including healthcare professionals and business stakeholders, to align data insights with operational goals, improving decision-making in patient care management.

AirBNB

Mar 2021 - Jul 2022

Data Analyst

India

- Designed and deployed predictive models using **Python** and **SQL**, improving guest demand forecasting accuracy by 20% and optimizing pricing strategies.
- Enhanced **ETL** workflows with **Talend** and **Snowflake**, reducing data processing time by 35%, and enabling near real-time insights for market trend analysis.
- Automated 7 **Visual Studio**-driven reporting workflows, saving 2+ hours per week, ensuring timely **KPI** delivery.

- Integrated real-time **data streaming** solutions to refine host and guest recommendation systems, improving engagement metrics by 15%.
- Developed 3 interactive **Tableau** dashboards (scatter plots for occupancy trends, and revenue segmentation charts), enabling market expansion strategies.
- Managed 10,000+ records (guest reviews, host metrics), reducing query response times by 30 seconds, and improving reporting efficiency.
- Compiled **Excel** audit reports tracking 1,000+ units, improving financial transparency in Airbnb's quality assurance programs.
- Maintained **RESTful APIs** to enable seamless data exchange, improving platform reliability for 15+ daily users.
- Augmented **Git** for version control across 20+ repository commits, ensuring streamlined team collaboration in an **Agile** environment.
- Probed deeply into guest booking behaviors utilizing advanced statistical modeling, leading to data-driven recommendations that improved occupancy rates by 12% and enhanced revenue performance.

Cipla

Sep 2020 - Feb 2021

Data Analyst Intern

India

- Processed and cleaned datasets containing 500+ logs using **Apache POI** and **OpenCSV**, ensuring data accuracy for healthcare analytics and reporting.
- Piloted and improved data pipelines within **Azure Data Factory**, accelerating data transformation by 40% and enabling more agile reporting for data-driven healthcare enhancements.
- Deployed containerized data engineering solutions using **Docker** to package applications and dependencies, ensuring consistency across development and production environments.
- Engineered and enforced 6+ **Python-based scripts** for data extraction and transformation, enabling efficient project-specific analyses and improving data accessibility.
- Established **data governance** frameworks, ensuring compliance with internal policies and maintaining data quality standards across 10+ client projects for technology-driven solutions.
- Collaborated with the IT and clinical teams to integrate data from 3+ hospital management systems, streamlining the availability of critical patient and operational data.
- Facilitated **data mining** on 2,000+ patient reports, identifying patterns in admission rates and treatment outcomes, which informed predictive models for optimizing resource allocation in healthcare facilities.
- Administered weekly data quality checks using **Azure Data Studio**, resolving inconsistencies and enhancing the reliability of healthcare reports.

EDUCATION

University of North Texas

Aug 2022 - May 2024

Master in Information Systems and Technology

Denton, TX

GITAM University

Jul 2017 - May 2021

B.Tech in Computer Science and Engineering

India

PROJECTS

Scalable Predictive Analytics for Real-Time Sales Forecasting

- Engineered a real-time data pipeline using Apache Kafka and Spark Streaming to process and analyze live sales transactions.
- Developed a predictive model using XGBoost that forecasted demand trends with 85% accuracy, optimizing inventory management.

Encryption and Decryption of GPS Parameters Using RSA Algorithm

- Devised public-key cryptography to safeguard GPS data, allowing only authorized users with the private key.

Job Posting Classification and Analysis

- Deployed machine learning models utilizing diverse datasets to categorize 50,000+ job roles with 95% accuracy and forecast salary ranges within 10%, enhancing job market analysis and insights.

Real-Time Face Detection using OpenCV

- Pioneered a convolutional neural network (CNN)-based model, reducing false positives to below 3% and increasing classification accuracy by 15% on a dataset of 50,000+ images.
