PROFESSIONAL SUMMARY

Master of Environmental Studies graduate with a Google Data Analytics Certificate and hands-on experience in data preparation, analysis, and visualization. Background in scientific research provides foundation in rigorous data science practices and communication skills while presenting findings to diverse stakeholders.

PROFESSIONAL EXPERIENCE

Cascadia Research Collective
Research Assistant

Olympia, WA, USA
September 2023 - Present

- Cleaned, validated, and merged multi-year datasets (2017–2024) from aerial surveys and satellite imagery, ensuring data quality and consistency for downstream analysis
- Created data visualizations, maps, and summary tables in R and Tableau to communicate spatial and temporal trends to internal research teams and external partners
- Conducted statistical analyses including hypothesis testing, regression, and ANOVA to support management and conservation decisions
- Synthesized complex findings for technical and non-technical audiences through written reports and oral presentations, providing actionable recommendations for regional decision-making

Sustainability in Prisons Project
Program Coordinator

Olympia, WA, USA
March 2025 - September 2025

- Streamlined data analysis workflows in R, reducing manual processing time and improving consistency in annual program reporting
- Developed standardized documentation for data entry and analysis procedures, ensuring quality and consistency across the program
- Supervised a team of 8 and coordinated with federal and state partners to meet reporting requirements and compliance deliverables

Center For Climate Action and Sustainability
Graduate Fellow

Olympia, WA, USA
October 2024 - March 2025

- Facilitated operational meetings between multiple stakeholders to coordinate shoreline restoration initiatives
- Secured project funding through proposal writing and presentation to decision-makers

CERTIFICATIONS

Grow with Google | Google Data Analytics Professional Certificate

February 2026

- Completed industry training in data cleaning, SQL database querying, ETL, and dashboard development using BigQuery, Tableau, and R
- Practiced transforming raw data into actionable insights through business intelligence frameworks, involving structured analysis and stakeholder-oriented visualizations

EDUCATION

Evergreen State College
Master's, Environmental Science

August 2023 - July 2025

- Thesis research applied mixed-effects models and GIS spatial visualization across multi-year environmental datasets

Western Washington University
Bachelor of Science (BS), Biology

August 2018 - July 2021

SKILLS

Skills: R, Excel, SQL, BigQuery, Tableau, Power BI, ArcGIS, Microsoft 365, Stakeholder Communication, Program Coordination, Data Management, Statistics
