SUMMARY

Detail-oriented Economics graduate with a strong foundation in data analysis, critical thinking, and problem-solving. Developed exceptional organizational and analytical skills through academic training and two years of intensive pilot training, demonstrating adaptability and discipline under pressure. Transitioning to remote data entry and analysis roles due to medical circumstances, I am eager to leverage my quantitative expertise and meticulous attention to detail to deliver accurate and actionable insights in a dynamic, remote work environment.

SKILLS HIGHLIGHT

- Data collection, entry, and analysis
- R scripting for statistical analysis
- Microsoft Office Suite (Excel, Word, PowerPoint)
- Customer service & sales experience
- High-pressure decision-making
- Adherence to procedures and efficiency in fast-paced settings
- Strong verbal and written communication skills
