

AMIT KUMAR VERMA

Software Development Engineer

Location: AL (open to relocate) | **Mobile:** (205) 417 1094 | **Email:** verma.ak0309@gmail.com | [LinkedIn](#)

SUMMARY:

Software Engineer with 6 years of experience in architecting and deploying scalable software solutions. Specializes in Core Java, Spring Boot and microservices architecture, with a strong record of optimizing system performance by 40%. Proficient in full-stack development, using Angular, React.js, and AWS to create responsive applications. Experienced in Agile methodologies, consistently delivering on project goals. Aims to leverage technical expertise and leadership to drive innovation in a forward-thinking organization.

SKILLS:

Methodology: SDLC, Agile, Waterfall

Languages: Core Java, Java 8, SQL, Node JS

Frameworks/Libraries: Spring MVC, JSF, Hibernate, SpringBoot, Microservices, Spring Security, Angular

IDE's: NetBeans, IntelliJ IDEA, Eclipse, VScode

J2EE Technologies: Servlets, JSP, JSTL, JavaBeans, JDBC

Web Technologies: HTML, CSS, JavaScript, Bootstrap, jQuery, Ajax, JSON, XML, TypeScript

Application Server: Apache Tomcat, WebSphere

Database: MySQL, PostgreSQL, MongoDB, NoSQL

Cloud Services: AWS, Azure, Google Cloud Platform (GCP)

Build /Other Tools: MS Visio, Maven, Gradle, JUnit, Jenkins, Cucumber, GitLab, GitHub

Operating Systems: Windows, Linux

EXPERIENCE:

Essendant, IL | Dec 2024 – Current | Java Application Developer

- Migrated legacy applications to Angular, modernizing UI and improving user engagement.
- Converted SOAP APIs to REST/JSON, enhancing system interoperability and reducing integration overhead.
- Implemented disaster recovery (DR) strategies, ensuring business continuity and system resilience.
- Managed releases and facilitated daily Scrum meetings, aligning cross-functional teams to meet sprint goals.
- Leveraged GitLab CI/CD, Jenkins, and Kibana for efficient build pipelines and proactive monitoring.
- Optimized performance through multithreading, caching, and batch job processing.
- Built Excel submission templates and automation to speed up customer processing and cut manual work.
- Collaborated with business teams to gather requirements and translated them into actionable Jira tickets.
- Built batch processes to automate client email notifications.

PeopleTec, Inc, AL | July 2023 – Nov 2024 | Software Development Engineer

- Developed and optimized Java/React.js web applications, reducing page load times by 30%.
- Designed scalable data models in PostgreSQL/MySQL, improving query efficiency by 25%.
- Built microservices with Spring Boot, Hibernate, and REST APIs for seamless integration.
- Implemented test automation (JUnit, Jasmine, Cucumber) and CI/CD pipelines (Jenkins, Maven, Gradle).
- Enhanced reliability through multithreading, GC tuning, Docker, and Kubernetes.
- Led cross-functional Agile teams, Confluence, and Git for real-time communication and documentation, resulting in fewer post-release defects and a significant acceleration of project delivery timelines.

Genpact | Jan 2019 – July 2022 | Software Engineer

- Delivered large-scale enterprise apps with Waterfall, improving project timelines.
- Optimized MySQL queries to cut response time by 25% and improve data throughput by 30%.
- Built efficient database interactions with Spring Boot & JPA, improving performance.
- Built responsive, cross-browser web interfaces with HTML/CSS/JavaScript to enhance user experience.
- Managed AWS infrastructure (EC2, S3) and implemented Lambda for serverless computing.
- Migrated on-prem applications to Azure, boosting scalability and cutting costs.
- Led high-performance computing (HPC) initiatives to enhance system efficiency.
- Streamlined operations, reducing critical production incidents and boosting customer satisfaction.

EDUCATION:

Masters in Computer Sciences | University of Alabama at Birmingham Birmingham, AL

Bachelors in Computer Science | Babu Banarasi Das National Institute of technology and management, UP
