WORK EXPERIENCE

Graduate Admissions Assistant

University of Massachusetts Boston, USA

Apr 2024 – May 2025

- Optimized student enrollment strategies by analyzing 5,000+ prospective student records, identifying trends that increased lead conversion by 15%.
- Created 4+ Excel dashboards, using pivot tables, improving outreach efficiency, data accuracy by 25%, and cutting reporting time by 30%.
- Led in-person campus tours for prospective students, improving engagement and contributing to a 12% increase in enrollment.

Revenue Analyst and Reporting Consultant

Virtusa Corporation, Hyderabad, India

Mar 2022 – July 2023

- Automated financial reports in Excel (macros, pivot tables), cutting month-end reporting time by 40% and boosting accuracy.
- Built and maintained Power BI dashboards, increasing visibility into \$10M+ in revenue metrics by 30%, driving data-driven decision-making.
- Reconciled 1,500+ tracked hours/month in Oracle CRM, ensuring billing accuracy and preventing \$500K+ in revenue leakage and collaborating with auditors to ensure GAAP & ASC 606-compliant revenue recognition.
- Presented financial insights and forecasts to CFO-level stakeholders, increasing forecast accuracy by 30% and supporting strategic planning.

Tax Consultant

Deloitte, Hyderabad, India

Sept 2021 – Mar 2022

- Automated financial data processing by developing 10+ Excel macros, VBA scripts, reducing manual effort by 40% boosting reporting accuracy.
- Streamlined tax compliance workflows by analyzing 50K+ rows, reducing reconciliation time by 30% and minimizing errors.
- Designed tax calculation templates and automated reporting tools, cutting monthly reporting time from 5 days to 3 days for multiple clients.
- Collaborated with accountants and business teams to analyze financial data, identify inefficiencies, and recommend process improvements, enhancing workflow efficiency by 15%.

PROJECTS

University of Massachusetts Boston | Boston, MA

Power BI Project: Waggle Pet Device Customer Analysis

Feb 2025

- Developed an interactive Power BI dashboard, analyzing 10,000+ device interactions to identify churn risks and customer behavior trends.
- Identified a 65% drop in adoption rates, revealing that 91% of users preferred an alternative product, enabling leadership to redirect marketing efforts and prevent a potential \$500K+ loss in failed customer acquisitions.
- Streamlined reporting processes, reducing analysis time by 40% and equipping leadership with real-time customer insights, leading to faster, data-driven decisions on product investments.

Customer Retention & Sales Analysis for DQLab Sport Center

Dec 2024

- Identified declining repeat purchases by analyzing 10,000+ customer transactions using Python (Pandas, NumPy, Scikit-learn), uncovering key churn factors and enabling data-driven retention strategies that improved repeat purchase rates by 15%.
- Developed a Logistic Regression Model to predict customer churn with 85% accuracy, allowing proactive intervention strategies that reduced customer churn by 10% and helped sales teams retain high-value customers.
- Created a Power BI dashboard, visualizing purchase behavior, churn patterns, and customer segments accelerating sales decision-making by 30%.

Electronic Retail & EMI Management Database

July 2024

- Designed and implemented a normalized SQL database to manage customer transactions, product inventory, and EMI schedules, enhancing data retrieval by 30% and minimizing redundancy.
- Automated sales transactions, EMI tracking, and stock updates through SQL triggers, cutting manual errors by 40% and accelerating processing.
- Optimized EMI payment adoption strategies by analyzing customer behavior, sales trends, and payment methods, leading to improved credit approvals, sales forecasting, and inventory planning.

King County Real Estate Insights Dashboard

Apr 2024

- Deployed an interactive Tableau dashboard analyzing 40,000+ house sales in King County, WA, enabling real-time filtering by sales price, square footage, and home condition—reducing manual data retrieval time by 50% for real estate analysts.
- Uncovered pricing trends by visualizing house price distributions, bedroom/bathroom counts, and home conditions, leading to data-driven insights that improved property valuation accuracy by 25%, helping realtors refine their pricing strategies.
- Enhanced decision-making with heatmaps and geographic visuals, enabling 30% faster investment decisions for real estate stakeholders.

CERTIFICATIONS

- US Certified Management Accountant (CMA)
- Google Business Intelligence Certificate
- Microsoft Power BI Data Analyst
