PROFESSIONAL SUMMARY

I am a Business Intelligence Analyst certified in project management (PMP) with 4+ years of experience transforming analytical data into clear narratives with actionable insights. I am passionate about finding ways to improve upon existing processes and thrive in flexible, outcome-driven roles with high autonomy and clear accountability. I enjoy collaborating with a wide variety of stakeholders and bridging the gap between cross-functional teams.

WORK HISTORY

Business Intelligence Analyst

Khoros LLC, Austin, TX (remote) | April 2022 - June 2025

B2B SaaS platform for digital customer engagement

- Designed and built dashboards, reports, and visualizations around customer health, marketing insights, and key performance indicators to identify risks associated with customer retention that are used by numerous departments as well as executive leadership
- Acted as project manager for a company-wide initiative to transform existing Technical Support services to a 24/7 tier-based escalation model utilizing bot and chat features
- Reduced data processing costs by eliminating redundant dataflows and single-use reports, consolidating while maintaining availability and functionality
- Created data governance guidelines for business intelligence team with a data re-validation maintenance schedule and alerts for rogue dataviews and faulty fields
- Key Stakeholders: Product, Customer Education, Customer Success, Technical Support, Professional Services, and Engineering

Customer Service Supervisor

North Kansas City Hospital, Kansas City, MO | January 2021 - April 2022

- Supervised over 30 inpatient/outpatient phlebotomists, lab assistants, and specimen processors in a level 2 trauma center
- Customer service expert and go-to person for coordinating interdepartmental initiatives
- Pathology billing and CPT coding

Point of Care (POC) & Administrative Coordinator

North Kansas City Hospital, Kansas City, MO | June 2017 - December 2021

- Trained and maintained certifications of more than 1,800 POC operators in various roles throughout the hospital while ensuring all regulations were followed per CLIA/JC guidelines
- Worked with the Laboratory Information Systems team as a database administrator, building and interfacing tests for both in-house and reference labs

CORE COMPETENCIES

- data analysis of operational metrics
- SQL (adept), Python/R (familiar)
- project management: agile, scrum
- statistical analysis
- cross-functional team collaboration
- process improvement
- data governance & hygiene

TOOLS & PLATFORMS
