

ANIKA SHREYA PAWAR

(680) 356-6763 | anikashreyapawar@gmail.com | [GitHub](#) | [LinkedIn](#) | New York

PROFESSIONAL SUMMARY

Data Analyst with experience analyzing large datasets, building automated reporting workflows, developing dashboards, and delivering data-driven insights using SQL, Python, Power BI, Tableau, and Excel. Skilled in data extraction, cleansing, transformation, statistical analysis, visualization, and creating scalable analytical solutions to support business decisions. Experienced in collaborating with cross-functional teams to improve reporting efficiency, data quality, and operational performance.

SKILLS

- **Programming & Data Analysis:** Python, SQL, Pandas, NumPy, Excel, Jupyter Notebook, Data Cleaning, Data Transformation, Statistical Analysis, Exploratory Data Analysis
- **Business Intelligence & Visualization:** Power BI, Tableau, Dashboard Development, Data Visualization, Reporting Automation, KPI Tracking, Business Insights
- **Database & Data Engineering:** PostgreSQL, MySQL, ETL Pipelines, Data Validation, Data Quality Checks, Data Extraction, Data Processing, Data Warehousing Concepts
- **Machine Learning:** Predictive Modeling, Feature Engineering, Regression, Classification, Model Evaluation
- **Cloud & Tools:** AWS, GCP, Git, Linux

PROFESSIONAL EXPERIENCE

Data Analyst, *Shrive Solutions*

May 2026 - Present

- Analyzed and processed 50K+ records using Python and SQL to clean, transform, validate, and prepare datasets for reporting and business analysis workflows.
- Developed automated SQL-based data extraction and reporting workflows, reducing manual reporting effort by 30% while improving accuracy and consistency of analytical outputs.
- Built analytical reports and dashboards to monitor trends, identify data quality issues, and communicate actionable insights to technical and business stakeholders.
- Performed exploratory data analysis and root cause analysis to identify patterns, anomalies, and opportunities for operational improvements.

Machine Learning Researcher, *Syracuse University*

July 2025 - May 2026

- Analyzed large-scale business datasets using SQL, Python, and statistical techniques to identify trends, generate insights, and support data-driven decision-making.
- Developed interactive dashboards and automated reports using Tableau and Power BI, improving visibility into key business metrics and reducing reporting turnaround time by 30%.
- Created data extraction, cleansing, and transformation workflows to improve data quality and ensure accurate reporting across business functions.
- Collaborated with cross-functional teams to translate business requirements into analytical solutions and present findings through clear data visualizations.

Data Analyst, *The Math Company*

September 2022 - May 2023

- Processed and analyzed 3,000+ unstructured documents using Python-based data pipelines, improving dataset quality for machine learning and analytical workflows.
- Applied exploratory data analysis, feature engineering, and statistical evaluation techniques to prepare datasets and assess model performance.
- Developed reproducible data processing workflows using Python libraries including Pandas and NumPy to support research experimentation.

PROJECTS

Store Sales & Profit Analysis | *SQL, Python, Power BI*

- Analyzed retail sales datasets using SQL and Python to identify sales trends, customer purchasing patterns, product performance, and profitability drivers.
- Built interactive Power BI dashboards with KPI tracking, sales performance metrics, regional analysis, and profit visualizations to communicate insights effectively.
- Performed data cleaning, transformation, and exploratory analysis to improve data quality and generate actionable recommendations for business decisions.

Supply Chain Analysis | *SQL, Python, Tableau*

- Processed and analyzed supply chain datasets using SQL and Python to evaluate inventory performance, demand patterns, supplier trends, and operational efficiency.
- Developed Tableau dashboards to visualize supply chain KPIs, inventory metrics, order trends, and performance indicators for stakeholder reporting.
- Applied data validation, exploratory analysis, and visualization techniques to identify bottlenecks and support data-driven operational improvements.

EDUCATION

Master of Science in Computer Science, Syracuse University

May 2025

Bachelor of Engineering in Computer Science, BNM Institute of Technology

August 2022
