PROFESSIONAL SUMMARY

- Results-driven Power BI Developer and Data Analyst with 4 years of experience designing data models, building interactive dashboards, and delivering data-driven insights to support business strategy.
- Skilled in Power BI, SQL, DAX, Power Query, and Python for transforming complex datasets into meaningful visualizations and reports.
- Adept at collaborating with cross-functional teams to gather requirements, streamline reporting processes, and optimize performance.
- Proven track record of automating workflows, enhancing data integrity, and translating raw data into actionable intelligence.
- Strong foundation in Tableau, Excel automation (VBA/Macros), and exploratory data analysis (EDA) using Python libraries.

PROFESSIONAL EXPERIENCE

Caterpillar Inc | Power BI Developer | March 2024 - Present

- Translated business requirements into data-driven solutions by collaborating with cross-functional stakeholders across IT, Finance, and Product teams.
- Built robust Power BI data models and dashboards using DAX and Power Query to visualize KPIs, trends, and operational metrics.
- Developed complex SQL queries, views, and stored procedures to extract and transform data, improving performance and reducing report load time.
- Automated Excel-based reporting using VBA, Power Pivot, and advanced formulas to streamline manual processes.
- Published dashboards on Power BI Service, configured data refresh schedules, and managed access controls and user subscriptions.
- Continuously monitored and optimized report performance through SQL tuning, DAX refinement, and efficient data modeling.

EDUCATION

- Data Analytics Boot camp Syntax technologies
- Diploma in Community Health Zinduka Africa Group
- Higher Diploma in Computer Engineering Fourth Dimension Computer
- College Diploma in Relevant Youth Ministry Daystar University

KEY SKILLS

- DATABASE:
Oracle, SQL Server Management Studio (SSMS)
- DATA VISUALIZATION TOOLS:
Power BI, Tableau
- PROGRAMMING LANGUAGE:
Python (Pandas, NumPy, Matplotlib)
- ETL & CLOUD TECHNOLOGIES:
Azure, SSIS (SQL Server Integration Services)

Trek Bicycle | Junior Data Analyst | March 2023 – February 2024

- Created Power BI dashboards to track funding patterns, demographic insights, and organizational KPIs. Developed calculated columns, DAX measures, and implemented incremental data refresh for scalable analytics.
- Worked with cross-functional teams to design evaluation dashboards and reports supporting grant compliance and service metrics.
- Built Tableau dashboards with drill-down functionality, dynamic filters, and visual storytelling to support data-driven decision-making.
- Automated recurring reports using SQL and macros, improving operational efficiency and accuracy.
- Presented findings in cross-departmental meetings to guide improvements in quality and service delivery.

Alliance Tek | Data Analyst Intern | April 2022 - Feb 2023

- Designed and developed interactive Tableau dashboards to visualize project outcomes, funding trends, and performance metrics.
- Created advanced Tableau charts such as heat maps, side-by-side bars, filled maps, and scatter plots according to stakeholder needs.
- Enhanced dashboard interactivity with filters, parameters, and actions; used data blending to unify insights from SQL Server and Oracle.
- Worked closely with analysts and business users to translate analytical questions into effective visual solutions in Tableau.
- Conducted data cleaning and exploratory analysis using Python (Pandas, Matplotlib) to support Tableau reporting.
- Ensured data consistency and accuracy by establishing relationships through primary and foreign keys.
