SUMMARY

Product designer and frontend developer with experience developing clear, accessible, AI-enhanced interfaces for consumer and SaaS products. Experienced in delivering zero-to-one features, developing scalable design systems, and using WCAG 2.0 requirements to create inclusive experiences. Excellent at usability testing, LLM-assisted prototyping, analytics-driven iteration, and cross-functional engineering collaboration.

EXPERIENCE

UI Developer | Quality Inn (Choice Hotels) - Boston, MA

September 2025 – Current

- Designed responsive website components with HTML, CSS, JS, and React that reduced navigation friction and increased homepage engagement by 28%.
- Implemented modular front-end patterns in accordance with WCAG 2.0, improving mobile usability for over 500 users.
- Analyzed behavioral data to redesign high-traffic layouts, increasing successful task completion by 22%.
- Created AI-powered content blocks that met marketing objectives and increased booking-related interactions by 15%.

Product Designer | Community Dreams Foundation - Sebring, FL

December 2024 – September 2025

- Conducted 25 surveys and 8 interviews to identify user friction, resulting in three validated problem areas that led all significant design decisions.
- Redesigned important flows using journey mapping, lowering drop-off by 19% during prototype testing.
- Improved prototype success rates from 55 percent to 82 percent by refining labeling, structure, and navigation through iterative usability testing.
- Delivered high-fidelity interfaces and interactive prototypes, which decreased stakeholders' revision cycles by 30%.
- Collaborated with developers to guarantee precise handoff and seamless deployment of all Green Connect features.

Product Designer | HCL Tech – India

September 2020 - August 2022

- Developed scalable UI components for business SaaS with Angular, HTML, CSS, and API connectors, increasing internal team efficiency by 22%.
- Translated complex business requirements into accessible and secure interfaces, supporting cross-country agile teams.
- Created a token-based design framework to standardize over 200 internal screens and promote brand consistency.
- Conducted heuristic evaluations that lowered usability issues and support tickets by 18 percent.

UI Designer | Qreative – India

June 2018 - December 2018

- Generated adaptable web designs and visual identity assets, increasing client engagement by 40% across campaigns.
- Worked with designers and colleagues to create storytelling-focused content for early-stage initiatives.
- Maintained a brand presence on Instagram, which attracted new clients and increased project visibility.

EDUCATION

Northeastern University, Boston, MA

2022 – 2024

Master of Science in Information Systems, Focus: Human-Computer Interaction

University of Mumbai, India

2018 – 2021

Bachelor of Engineering in Information Technology

SKILLS

Product & UI/UX Design: User Flows · Wireframes · High-Fidelity UI · Visual Design · Design Systems · Component Libraries · Interaction Design · Microinteractions · WCAG 2.0 Accessibility · Inclusive Design · Responsive Layouts · 0 to 1 Feature Development · Prototyping

Research & Testing: User Interviews · Surveys · Usability Testing · A/B Testing · Heuristic Evaluation · Journey Mapping · Task Analysis · Analytics Interpretation · Insights Synthesis

Frontend Development: HTML · CSS · JavaScript · TypeScript · React · Angular · Next.js · REST APIs · JSON · Responsive Frontend Architecture · Scalable Components · Performance Optimization

AI & Data: LLM-Assisted Ideation · AI-Driven Prototyping · AI Workflow Integration · Prompting · Data Analysis · Tableau · Experimentation · Automation Support

Tools: Figma (Expert) · FigJam · Framer · Adobe CC · Webflow · Storybook · VS Code · Git · Miro

Collaboration: Cross-Functional Communication · Agile Workflows · Requirement Gathering · Design Handoff · Engineer Collaboration · Rapid Iteration

Focus Areas: Human-Centered Design · Design-Engineering Alignment · SaaS Interfaces · Scalable Frontends · Cognitive Load Reduction · Quality Assurance for UI
