## SUMMARY

---

- Data Analyst with 6+ years of experience transforming large-scale enterprise data into actionable business insights through advanced analytics and data visualization.
- Skilled in designing ETL pipelines, data models, and interactive dashboards (Tableau and Power BI) while partnering with business stakeholders to define KPIs and deliver scalable analytics solutions.
- Proficient in advanced SQL, Python, root cause analysis, data validation, A/B testing, and modern analytics platforms, including Snowflake, Databricks, dbt, and AWS.
- MS in Data Analytics with a strong foundation in statistics, machine learning, predictive modeling, experimentation, and data-driven decision-making.

## SKILLS

---

**Programming & Analytics:** SQL, Python, R, A/B Testing, Hypothesis Testing

**Data Engineering:** Data Modeling, ETL Pipelines, Data Warehousing, Databricks, dbt (fundamentals)

**Visualization & Reporting:** Tableau, Power BI, Looker, Microsoft Excel (VLOOKUP, Pivot Tables, macros)

**Databases & Cloud:** MySQL, PostgreSQL, Amazon Redshift, Snowflake, Databricks, Spark SQL, AWS

**Data Science & ML:** Classification, Regression, Clustering, Time Series Analysis, Feature Engineering

**Libraries & Frameworks:** NumPy, Pandas, Seaborn, Matplotlib, Plotly, Scikit-Learn, PyTorch

**Tools & Platforms:** Git/GitHub, Jenkins, Control-M, Visual Studio, Salesforce, JIRA, Confluence, Agile (Scrum, Kanban)

## PROFESSIONAL EXPERIENCE

---

### Data Analyst - Teladoc Health (Remote)

Oct 2025 – Jul 2026

- Performed ad-hoc and recurring analysis across healthcare datasets (member, eligibility, claims, provider, and clinical) to identify trends, generate actionable insights, and support operational and business decision-making.
- Partnered with clients, business and technical stakeholders to gather **data** and **reporting requirements**, define **KPIs**, document **business rules**, and support **data governance** initiatives.
- Developed and maintained **automated ETL pipelines** and BI solutions across **PostgreSQL/Amazon Redshift**, and **Snowflake**, enabling scalable data integration in a **HIPAA-regulated environment**.
- Built **Python workflows** for data cleansing, preprocessing, validation, and automation, producing reliable, analytics-ready datasets for downstream reporting and analysis.
- **Optimized** complex SQL queries using joins, CTEs, aggregations, filters, and window functions, reducing query execution time by **45%** and improving data retrieval performance.
- Investigated post-launch campaign reporting discrepancies via **root cause analysis**, identifying data integration gap between Salesforce and Amazon Redshift and restoring reporting accuracy.
- Conducted **A/B testing** analysis across control and treatment groups, identifying performance trends and visualizing key findings through **Tableau** dashboards for stakeholder decision-making.
- Monitored automated reporting and batch workflows in **Jenkins** and **Control-M**, troubleshooting production job failures and delivery issues within the SLA timelines.
- Maintained SQL scripts, Python workflows, and analytics solutions using **Git** for **version control**, collaboration, and release management.

### Data Analyst - Virufy (Non-Profit, Digital Health) Los Altos, CA

Feb 2025 – Oct 2025

- Built and supported a **serverless data preprocessing pipeline** using **AWS (S3, Glue, Lambda)** to transform **10k+ health audio samples** into structured datasets for analytics and ML research.
- Performed **health data analysis, feature engineering, and data quality validation**, collaborating with research and product stakeholders to improve model readiness and support mission-driven outcomes.

**Data Analyst - MetLife (viaCognizant), India**

**Mar 2018 – Nov 2021**

- Redesigned **ETL pipelines** to integrate large-scale claims, policy, and fund data from multiple sources into a centralized warehouse, reducing existing execution time by **30%**.
- Developed and optimized complex SQL queries, stored procedures, and views in **Microsoft SQL Server** to support reporting, data transformation, and business analysis.
- Leveraged **Salesforce** to validate client information, investigate data discrepancies, and support accurate reporting across business workflows.
- Conducted **A/B testing** to assess the impact of new policy feature rollouts on **user engagement and conversion rates**.
- Built **Tableau dashboards** to monitor key performance indicators (**KPIs**) and shared insights with the marketing and executive teams to support their strategic decision-making.

**Junior Data Analyst- IBM, India**

**Mar 2016-Mar 2018**

- Improved enterprise **data warehouse** performance by **optimizing complex SQL queries** for advanced analytics, reducing query runtime by **40%**.
- Reverse-engineered** legacy SQL queries and documented transformation logic to improve reporting accuracy.
- Built **ad-hoc** reports and dashboards in Tableau to track claims metrics and support on-time data delivery across business units.
- Automated** repetitive data fixes with Python and SQL, applying **root cause analysis** to reduce manual effort and quarterly costs by **30%**.

**EDUCATION**

**Master of Science in Data Analytics**

San Jose State University, San Jose, CA

**Jan 2023 - Dec 2024**

GPA:3.5/4.0

**Relevant Coursework:** Python(Data Structures and Algorithms), Database Systems, Statistics, Machine Learning, Project Management Essentials, Data Mining, Data Visualization, Big Data Analytics

**Bachelor of Technology in Electronics and Communication Engineering**

West Bengal University of Technology, India

**Aug 2011 - Jul2015**

**ACADEMIC PROJECTS**

**Diabetes Risk Prediction**

- Developed **ML models**(Decision Tree, Random Forest) with **85%** accuracy to predict diabetes risk.
- Performed feature engineering and visualized key risk factors using **Power BI** (DAX, Power Query).

**Instacart Data Analysis**

- Analyzed online grocery retail data from Instacart using SQL to identify reorder patterns and customer churn behavior.
- Built **ML models** (Logistic Regression, Random Forest) for churn prediction and developed **Tableau** dashboards for user segmentation and insights.

**Large-Scale Personalized AI Financial Analyst(Thesis Project)**

- Fine-tuned open-source LLMs like Mistral and Llama models on public and synthetic datasets using various parameter-efficient techniques like **LoRA**, **QLoRA**, **DPO**, and **SFT** training methods, boosting integration efficiency by **10%**.
- Implemented Retrieval-Augmented Generation (**RAG**) with real-time data in a Streamlit web app, significantly enhancing decision accuracy.

**CERTIFICATIONS**

- dbt Fundamentals (dbt Labs) - May 2026
- Advanced SQL (HackerRank) - Aug 2025
- Cloud Computing with AWS (Udemy) - Jun 2025
- IBM Databases and SQL for Data Science with Python - Oct 2025
- Oracle Generative AI Professional Certification - July 2024
