Data Analyst with 5+ years of experience working with data in Telecom, Legal, Healthcare, and Marketing industries. Proficient in Python, SQL, Power BI, and Power Query, with expertise in data engineering, process automation, and data visualization to deliver actionable business insights.

TECHNICAL SKILLS

Programming Languages: Python, PySpark, SQL

Application Software: Advanced MS Excel, MS Word, MS PowerPoint, SharePoint, JIRA, ServiceNow

Tools and Technologies: Databases (MySQL, Oracle, PostgreSQL), Power BI, Jupyter Notebook, Tableau, Google Data Studio

Core Competencies: Data Engineering, Data Visualization, Process Automation, Collaboration

Analytics techniques: Pandas, Matplotlib, Seaborn, NumPy

WORK EXPERIENCE

INNOVATIVE DEVELOPMENT LLC, Data Analyst

December 2022 – January 2025

- Designed and implemented 5+ Power BI dashboards leveraging **DAX** and **ETL** for compliance, data volume analysis, and legal hold, improving data insights for a pharmaceutical client and enhancing decision-making.
- Identified inactive users not on legal hold using **Python in AWS S3**, optimizing storage by 25% by analyzing over 2,491 TB of legal files.
- Managed projects involving application archival, migration, and upgrades through cross-team collaboration.
- Extracted structured and unstructured data across Oracle, MySQL, Salesforce, and MySAP, ensuring data quality.
- Automated various manual processes using **Python** saving 100+ hours weekly (*ref. Project 2&3*)

ERICSSON, Data and Operations Engineer

October 2017 – July 2022

- Reporting and Data Visualization – **Created an ITSM dashboard on Power BI** for team SLA breach and adherence, resulting in 100% SLA for Veon, Algeria.
- Expertise in **trend analysis** from reports and identify issues and provide **logical and critical analysis**.
- Process **Automation** – Developed ticket creation for client side using Python libraries like pandas, pyautogui from SAP saving 92% run time per week with zero human intervention.

PROJECTS

- CMO Dashboard for Enterprise B2B SaaS Marketing Team:** Engineered a Power BI dashboard for a B2B SaaS marketing team, tracking conversion rates, MQLs, SQLs, and pipeline health; dashboard visualized 35% YoY marketing pipeline growth, enabling data-driven decisions.
- Ticket metrics database:** Automated the processing of 2,000+ legal compliance tickets monthly from ServiceNow and SharePoint to MS SQL using Python, for auditing to manage risk, maintain compliance and adherence.
- End to end automation of SNOC and telecom inventory reports using python libraries like pandas, NumPy, matplotlib.
- PwC Switzerland Virtual Internship in collaboration with Forage:** Built three Power BI dashboards—an HR dashboard for gender-related KPIs, an agent performance dashboard for a contact center, and a customer retention (churn analysis) report for a telecom client. Analyzed data, provided actionable insights, and communicated findings effectively, addressing business challenges and promoting data-driven decision-making.

EDUCATION & CERTIFICATIONS

- ITIL® Certified
- Bachelor's in technology, EEE | 2013-2017 | Amrita Vishwa Vidyapeetham – 8.23 CGPA

ACHIEVEMENTS

- IMPACT AWARD (2x), Ericsson – Recognized for leading automation initiatives across multiple high-impact projects.
- POWER AWARD, Ericsson – Awarded for successful go-live and stabilization of the Veon Algeria platform.
- ACTING TO EXECUTE Award, Ericsson – Honored for rapid execution and seamless support during critical project phases at Veon Algeria.
