

PROFESSIONAL SUMMARY:

Accomplished **Data Analyst** with 3+ years of experience in **Power BI, SQL, Python**, and **ETL** automation. Expertise in developing scalable dashboards, statistical modelling, and data visualization. Proven track record of improving reporting efficiency, ensuring data integrity, and collaborating cross-functionally to provide actionable insights for business decision-making.

TECHNICAL SKILLS:

Programming Languages: Python, R, SQL

Data Bases: MySQL, PostgreSQL, SQL Server

Libraries: Pandas, NumPy, Matplotlib, Plotly, Seaborn

Visualization Tools: Tableau, Power BI, MS-Excel (Advanced Functions, Macros, Pivot Tables)

Machine Learning & Statistical Modelling: SAS, Apache Spark, ML Algorithms

ETL & Data Integration: Talend, Informatica, SSIS, AWS Glue

Datawarehouse: Snowflake, Amazon Redshift

ERP & Project Tools: SAP (Customer & Billing modules), JIRA, Confluence

Soft Skills: Business Analytics, Data Analytics, Cross-functionally, detail-oriented

EDUCATION:

Master of Engineering Management - San Jose State University, US | **August 2022 – December 2024**

Bachelor of Civil Engineering - Maulana Abul Kalam Azad University of Technology, India | **August 2015 – May 2019**

PROFESSIONAL EXPERIENCE:

Data Analyst | Kaiser Permanente – CA | February 2025 – Present

- Designed **Power BI** dashboards from **MySQL** and **AWS Glue**, reducing reporting time and boosting user adoption by 20%.
- Created **DAX** measures and, **KPIs**, improving data accuracy and speeding up decision-making for leadership teams.
- Automated **Excel** reports with **pivot tables**, advanced formulas, and **macros**, reducing manual reporting effort by 15%.
- Built **ETL** pipelines using **Talend** and **Python**, automating healthcare data from four sources and saving 10 hours/week.
- Optimized **MySQL** queries and schema, improving dashboard speed by 12% across 5M+ healthcare transaction records.
- Conducted weekly data audits, maintaining data integrity for **Power BI** dashboards on patient outcomes and finance.
- Built real-time **Python** scripts for syncing patient and billing data, increasing data freshness and model accuracy.
- Created drill-throughs, bookmarks, and dynamic slicers in **Power BI**, enhancing report interactivity and engagement by.
- Applied statistical modelling techniques using **Python** and **R**, improving healthcare trend analysis accuracy.

Data Analyst | Kaiser Permanente – CA | January 2024 – November 2024

- Optimized data analysis and reporting by leveraging **advanced Excel** functions, enhancing efficiency by 20%.
- Conducted data analysis using **SAS** and **SQL**, extracting actionable insights from large datasets to inform strategic decisions.
- Developed and maintained interactive dashboards with **Power BI**, enhancing stakeholder reporting efficiency.
- Utilized **SAP's** customer and billing modules to streamline financial operations and improve data accuracy.
- Translated complex data findings into clear, actionable insights, facilitating informed decision-making **across departments**.
- Implemented data validation procedures, ensuring the integrity and reliability of reports generated for **stakeholder** reviews.
- Collaborated cross-functionally using **JIRA** and **Confluence** within **Agile and Waterfall methodologies** to ensure timely project delivery.

Data Analyst | Smart AI – India | March 2020 - July 2022

- Developed automated reporting solutions using **VBA and Excel**, significantly reducing manual effort and errors.
- Reduced data processing time from 24 to 6 hours by optimizing **SQL** and using advanced data warehousing techniques.
- Implemented an advanced credit risk model in **Python**, improving loan default prediction accuracy by 33%.
- Performed **EDA** on customer transaction data using **Python and SQL**, reducing fraud by 15%.
- Automated **ETL** workflows using **SSIS**, reducing processing time by 30% and optimizing data availability.
- Architected a scalable data lake using **AWS Redshift and AWS Glue**, improving data accessibility and reducing report generation time by 30%.
- Built dynamic **Tableau** dashboards for real-time **KPI** tracking, enhancing reporting efficiency and data-driven decisions by 10%.

CERTIFICATION:

Certified Lean Six Sigma Green Belt- San Jose State University, CA, USA

Completed Data Analyst Bootcamp from Basics to Advanced- Udemy

PMP: Microsoft Project Management Professional Certificate- Coursera
