Atlanta, GA | P:+1 4709293746 | Ashipeddi@gmail.com | LinkedIn: <https://www.linkedin.com/in/ashritha-peddi/>

EDUCATION

Georgia State University

Atlanta, Georgia

Master's in Data Science and Analytics - Big Data and Machine Learning, GPA: 4.0/4.0

Aug 2022 - Aug 2024

Courses: Database Systems, Artificial Intelligence & Deep Learning, Data science, Statistics, BigData Analytics, Data Mining

TECHNICAL SKILLS

Programming Languages: Python, R, Scala, SQL, SAS, Matlab, Shell scripting

Cloud & Automation : Spark, Docker, GitHub, Jenkins, Terraform, Azure, GCP

Database and Visualization: PowerBI, Tableau, Plotly, Excel, Postgres, MySQL, Snowflake

ML Libraries: PyTorch, Tensorflow, Keras, NLTK, OpenCV, SciPy, Scikit-learn, Spacy, Matplotlib, Seaborn

Certifications: IBM Data Science Capstone, Microsoft Azure Fundamentals, AWS Cloud Academy Graduate

WORK EXPERIENCE

Trends

Atlanta, Georgia

Data Scientist (GRA)

Jan 2023 – Present

- **Built** ETL pipelines using SQL, PySpark, and complex data extracted from BigQuery to process large datasets, reducing processing time by 10% and ensuring timely insights
- **Performed** hypothesis testing, statistical analysis, EDA to uncover trends, patterns and meaningful insights, enhancing strategic data driven decisions
- **Conducted** auditing and data quality checks throughout data pipelines to ensure the integrity and accuracy of the data
- **Developed** ML models, deployed using Databricks to predict retail pricing and purchasing with a model efficiency of 86%, leading to a significant 1.5X increase in the sales
- **Monitored** and optimized ML models using MLflow, by hyperparameter tuning, testing, validation to enhance efficiency
- **Created** Tableau dashboards to track the KPIs and generated reports, providing stakeholders with enhanced visibility, facilitating efficient and informed decision-making processes for marketing plans by 40%
- **Collaborated** with cross-functional teams on JIRA to deliver analytics solutions, aligning data insights with business objectives and driving actionable strategies in supply chain domain

Eikon Therapeutics

Hayward, CA

Informatics Analyst Intern

May 2024 – Aug 2024

- **Developed** a robust ETL pipeline to unify data from MongoDB, Postgres, and MySQL databases, performed suitable data transformations and mapped it into an optimized format for further analysis
- **Designed** a Spotfire dashboard to visualize core business KPIs, saving 15 hours per week of manual reporting work and effectively communicated insights to stakeholders, enhancing understanding and decision-making

Telenav Novo Insurance

Atlanta, Georgia

Machine Learning Engineer (GRA) - Georgia State University

Sept 2022 – Dec 2022

- **Extracted** customer data from Redshift using SQL, and implemented data preprocessing to ensure high-quality data
- **Developed** and deployed Machine Learning model, for generating insurance premiums, using SageMaker, achieving a 13% pricing improvement, boosting the annual revenue by 2x

De Chevalerie En Rouge

Hyderabad, India

Software Engineer

Sep 2021 – Sept 2022

- **Led** the development of a scalable end-to-end fully functional e-commerce platform for fashion products, designing the front-end using Angular for a responsive, user-friendly experience
- **Developed** back-end architecture with Node.js, integrating payment gateways and created a RESTful API to manage user data, inventory, and transactions

PATENTS & PROJECTS

- **SD-BELT:** Innovated & developed an advanced healthcare device, for COVID-19 prevention. Secured a \$10,000 grant and Patent issued by the Government of India
- **Towards predicting PTSD symptom severity using portable EEG-derived biomarkers:** Developed a statistical model to analyze the correlation between mobile EEG features and PTSD symptom severity. [Publication](#)
- **LLM-based Content Generator:** Built a LLM - powered application for generating personalized content, using GPT to create context-aware, high-quality text for customer interaction and marketing automation
- **Conversational NLP bot:** Designed and implemented a chatbot using Google Dialog Flow, enabling natural language processing and interactive responses for seamless user engagement
