Professional Summary

Data Analyst with 5+ years of experience analyzing large datasets, developing SQL-based reporting solutions, building interactive dashboards, automating ETL processes, and translating business requirements into actionable insights. Experienced in data extraction, transformation, validation, KPI analysis, dashboard development, and reporting automation using SQL, Python (Pandas, NumPy), Tableau, Power BI and Advanced Excel. Strong background collaborating with cross-functional stakeholders to support business decision-making and operational excellence.

CORE SKILLS:

Programming & Querying: Python (Pandas, NumPy, Data Processing, Data Transformation, Data Automation, Web Scraping), SQL (Complex Joins, Subqueries, CTEs, Window Functions, Aggregations, Views), Excel (pivot tables, VLOOKUP, macros)

Tools & Technologies: ServiceNow (ITSM, HRSD, IRM), Tableau, Smartsheet, Power BI, Excel (Advanced), Python (Pandas, NumPy), SQL, Git, JIRA, AWS (basic)

Data Governance & Documentation: Business Rules Documentation, Data Lineage, Data Classification, Data Profiling, Use Case Development, Change Management

Data Visualization: Tableau (Intermediate/Advanced), Power BI

Smartsheet: Forms, Dashboards, Report generation, Automation

Data Management: Data Cleaning, Validation, Auditing, ETL Concepts, KPI Tracking

Analysis & Reporting: Ad-hoc reporting, Dashboard development, KPI monitoring, Decision support

Processes & Collaboration: Process improvement, Documentation, Stakeholder training, Customer support

PROFESSIONAL EXPERIENCE:

Data Analyst | Palo Alto Networks | California, USA | Aug 2025 – Present

- Developed SQL-based reporting datasets and automated data transformation workflows supporting operational dashboards.
- Developed executive dashboards tracking Incident, Change, Problem, SLA, and operational KPIs, enabling leadership visibility into service performance and trend analysis.
- Analyzed Incident, Problem, and Change data to identify recurring service bottlenecks, resulting in process improvements that reduced repeat incidents and improved SLA performance.
- Gathered and documented business requirements from HR, Security, and IT stakeholders for ServiceNow enhancements and reporting initiatives.
- Conducted UAT testing and validation for workflow automation changes prior to production deployment.
- Documented business rules and data requirements for ServiceNow reporting initiatives, ensuring solutions passed internal audit and change-management review prior to production deployment.
- Facilitated stakeholder meetings, requirement workshops, and solution walkthroughs to align business and technical teams.
- Worked with cross-functional teams to gather requirements and translate business needs into system workflows.
- Extracted, transformed, validated, and consolidated operational data using SQL and Advanced Excel to support executive reporting and analytical dashboards.
- Performed data quality validation and reconciliation to ensure reporting accuracy across multiple business units.

- Collaborated with stakeholders to define reporting requirements and optimize data workflows for operational analytics.
- Partnered with HR Service Delivery (HRSD) teams to gather reporting requirements and translate them into structured dashboards monitoring case volumes, fulfilment rates, and SLA adherence.
- Supported SecOps workflows by tracking vulnerability metrics and security incident data in ServiceNow, contributing to risk visibility reports distributed to security leadership.
- Collaborated with cross-functional teams across IT, HR, and Security to standardize KPI definitions, validate data accuracy, and deliver self-service reporting solutions.
- Documented reporting processes and dashboard usage guides to improve stakeholder adoption and reduce dependency on manual data requests.
- Participated in Agile ceremonies including sprint planning, backlog grooming, requirement reviews, and user story validation activities.

Business Data Analyst | Sai Ganga Panakeia Private Limited | Hyderabad, India | Feb 2019 – May 2023

- Designed and maintained Tableau dashboards and Excel reports tracking healthcare operational KPIs, patient service metrics, provider performance, and program outcomes for business stakeholders.
- Created and managed Smartsheet forms and dashboards to automate healthcare data collection, operational reporting workflows, and performance tracking activities.
- Collected, cleaned, validated, and reconciled healthcare operational and patient-related datasets from multiple sources, implementing QA processes that reduced reporting errors by 40%.
- Designed and maintained ETL workflows to extract, transform, validate, and load healthcare operational data into reporting dashboards.
- Built Python-based data processing pipelines using Pandas to automate data cleansing, transformation, and reporting activities.
- Extracted and reconciled data from multiple relational data sources, ensuring high data quality and reporting accuracy.
- Developed reusable Python scripts to automate recurring reporting and data transformation tasks, reducing manual effort by 60%.
- Conducted root-cause analysis and debugged reporting scripts and ETL steps to correct data discrepancies; worked with IT and operations teams to implement sustainable fixes.
- Delivered stakeholder training sessions and user documentation on Tableau/Smartsheet dashboards and self-service reporting, increasing user adoption and reducing ad-hoc requests.
- Partnered with operational and business teams to analyze healthcare program performance, patient engagement metrics, and service delivery outcomes, providing actionable insights for leadership decision-making.

Data Science Intern | Aditi Solutions | Hyderabad, India | Jun 2021 – May 2022

- Developed Python-based data ingestion pipelines to collect, clean, validate, and transform structured datasets for analytics.
- Automated ETL processes using Python, improving data quality, and reducing manual preprocessing.
- Performed data transformation and validation using Pandas before loading datasets for reporting and visualization.
- Developed Tableau visualizations to track pricing trends and competitive intelligence, prepared weekly reports for stakeholders.
- Investigated and resolved data quality issues by debugging Python scripts and implementing transformation rules and validation logic.

Finance Office Associate (Student Employment) | University of North Texas | Denton, TX
Oct 2023 – May 2025

- Analyzed financial transaction data, prepared operational reports, reconciled records, and supported ad-hoc reporting requests for university finance operations.
- Assisted in validating financial datasets, identifying discrepancies, and supporting month-end reporting activities using Microsoft Excel.

EDUCATION

MS Advanced Data Analytics, University of North Texas, Denton, TX | May 2025

Bachelor of Technology, Jain University, Bangalore, India | 2018

Analytics Projects:

Capstone — Predictive Modelling & Sentiment Analysis of Austin Airbnb

- Consolidated and cleaned 15,000+ listing records and 600,000+ guest reviews from multiple sources; validated data for analysis and dashboarding.
- Designed a Python-based ETL workflow to extract, clean, transform, and validate over 600,000 Airbnb review records before loading them into an analytics-ready dataset.
- Developed SQL queries and Tableau dashboards to analyze pricing trends and occupancy metrics.
- Developed interactive Tableau dashboards and Folium maps to visualize occupancy, pricing trends, and sentiment metrics.
- Recommended and documented automated data collection and dashboard refresh processes; led mock training for stakeholders on dashboard usage.

Churn Prediction for Credit Card Customers

- Built classification models and created interactive dashboards to monitor churn risk and key drivers; validated datasets and established routine reporting to track KPIs.

Time-Series Forecasting (RNN & LSTM)

- Cleaned and validated long-term rainfall datasets; ran time-series experiments and produced summarized reports to support decision making.
