

Babajide Fadairo

AWS Cloud and DevOps Engineer

Lithonia, GA | +1 (404) 543-9428 | babajidefadairo60@gmail.com

Professional Summary:

AWS Cloud Engineer and DevOps Engineer with 7+ years of proven expertise in designing, automating, and optimizing enterprise-scale cloud infrastructure and CI/CD pipelines across AWS, Azure, GCP, and hybrid environments. Highly skilled in infrastructure as code (IaC), container orchestration, monitoring, and cloud security practices. Strong foundation in IT service management (ITILv3 Expert) combined with hands-on experience in cloud-native architectures, automation frameworks, and enterprise compliance standards (HIPAA, SOC 2, CIS Benchmarks). Adept at delivering scalable, secure, and cost-efficient cloud solutions aligned with business goals.

Professional Experience:

Intel| USA| Mar 2025- Present

Senior DevOps Engineer

- Design, build and implement scalable, efficient, and secure DevOps solutions and administer/maintain infrastructure on AWS.
- Administer and manage hundreds of deployment pipelines using Jenkins, AWS Code Suites and other Cloud Solutions.
- Develop scripts to automate deployments and server management.
- Maintain configurations for Development, Staging, Quality Assurance, and Production environments using automated deployments.
- Construct and manage operational tools for monitoring, notifications, log collection, and debugging.
- Respond to work requests, tickets and work with relevant application and development teams to troubleshoot and debug non-production and production issues.
- Sustain and enhance the Continuous Integration & Deployment environment by working with in-house developers to improve the automated release of custom solutions using the approved CICD tools.
- Document current and future configuration processes and policies in a cloud environment.
- Develop and maintain CI/CD pipelines for software delivery, data store management, testing, and deployment processes.
- Architect and manage infrastructure using tools like CloudFormation, Packer, Kubernetes and Terraform.
- Collaborate with product development, hosting, and QA teams to ensure alignment of DevOps strategies with business objectives.
- Evaluate new technologies and tools to enhance the DevOps ecosystem.
- Work with other team members and mentor junior team members, leading by example to foster a culture of continuous learning and improvement.
- Vulnerability/Patch management – Remediate and resolve identified infrastructure vulnerability and compliance issues in accordance with security guidelines.
- Participates in an on call rotation, incident resolution, root cause analysis and daily scrum meetings.
- Automate system deployments using standard automation tools such as Puppet, Git, Terraform, CloudFormation, Ansible, Jenkins etc.
- Participates and conduct Disaster Recovery tests and process in alignment with defined Recovery Point Objective (RPO) and Recovery Time Objective (RTO).
- Performs regular Infrastructure environment audits of cloud accounts and services for compliance with established standards, policies, configuration guidelines and procedures
- Maintain and regularly update a centralized cloud-based repository of all supporting documentation, including knowledge articles and operational runbooks, ensuring accessibility, version control, and alignment with current procedures and technologies.

Dell Technologies| Jan 2022- Feb 2025

Senior AWS Cloud Engineer

- Designed and deployed scalable AWS cloud infrastructure using Terraform and CloudFormation templates for automated provisioning.
- Built CI/CD pipelines using Jenkins, Git, and ArgoCD to automate deployments across multi-cloud environments.
- Implemented Kubernetes clusters (EKS, GKE, AKS) with service mesh integrations, improving application scalability by 40%.
- Enhanced cloud security posture by integrating Prisma Cloud, Wiz, and Aqua Security for continuous compliance monitoring.
- Deployed monitoring and logging solutions with Prometheus, Grafana, CloudWatch, and Splunk, reducing incident response time by 40%.
- Conducted security compliance audits (HIPAA, SOC 2, CIS) ensuring adherence to industry best practices and standards.

Epsilon| USA| Nov 2018- Dec 2021

Cloud / DevOps Engineer

- Automated infrastructure provisioning and configuration management with Ansible and Terraform.
- Migrated on-prem workloads to AWS and Azure, optimizing cost efficiency through reserved instances and autoscaling.
- Managed Dockerized Microservices orchestrated on Kubernetes and OpenShift, streamlining deployments and improving availability.

- Configured Cisco networking devices and firewalls to ensure secure and high-availability connections between hybrid environments.
- Integrated vulnerability scanning tools (Nessus, Qualys) into DevSecOps pipelines to remediate risks proactively.

Educations and Certifications:

- **Master of Science –Strategic Information Technology Management (SITM)** | University of Derby -Derby, UK
- **Bachelors of Science in Computer Science** | Olabisi Onabanjo University
- **AWS Certified Solutions Architect – Professional**
- **AWS Certified DevOps Engineer Professional**
- **AWS Certified Cloud Practitioner**
- **Certified ITIL Expert - IT Service Management (ITILv3)**

Technical Skills:

- **Infrastructure Automation & Programming:**
SQL, Python, Bash Scripting, JavaScript, JSON, HTML, CSS, Ansible, CloudFormation, Terraform, Deployment Manager, Bazel
- **Operating Systems:**
Linux (Ubuntu, Red Hat), Windows OS, Windows Server, Robotic OS
- **Networking & Hardware:**
Cisco Routers, Cisco Switches, Cisco ASA Firewall, Next Generation Firewalls (NGFW), Robotics
- **Containerization & Orchestration:**
Docker, Kubernetes, OpenShift, Amazon ECS, Amazon EKS, Google Kubernetes Engine (GKE), Azure Kubernetes Service (AKS), Rancher, K3s
- **Cloud & Security Platforms:**
AWS, Azure, GCP, Oracle Cloud, IBM Cloud, Alibaba Cloud, PCF (Pivotal Cloud Foundry), Teleport, Aporeto, Prisma Cloud, Wiz, Aqua Security (Aquasec), Orca, Sysdig
- **DevOps Tools & CI/CD:**
Jenkins, Git, Cloud Build, ArgoCD, ArgoCD Workflows, FluxCD, Ansible, Terraform, CloudFormation, Packer
- **Monitoring, Logging & SIEM:**
Splunk, ElasticSearch, Grafana, Prometheus, Alertmanager, VictoriaMetrics, Dynatrace, AppDynamics, Datadog, Amazon CloudWatch
- **Vulnerability, Identity & Access Management:**
Nessus, Qualys, McAfee, Delinea, Liquidware, Okta, Centrify, OpenSearch
- **Security Compliance & Best Practices:**
HIPAA, SOC 2, CIS Benchmarks, IRS Guidelines, STIGs
- **Additional Skills:**
Patch Management (Windows & Linux), Problem Solving, Analytical Thinking, Business & Client-Focused Approach
