

Bansari Satashia

Dallas, TX • (945) 527 4964 • bansarisatashia3@gmail.com • [LinkedIn](#)

SUMMARY

Analytical and detail-oriented **Data Analyst** with 3+ years of experience driving cost optimization, operational efficiency, and data-driven decision-making in manufacturing and healthcare environments. Skilled in **Excel VBA automation, SQL querying, and Power BI reporting**. Adept at collaborating with engineering, supply chain, and leadership teams to deliver accurate insights and streamline workflows. Passionate about continuous improvement and leveraging data to make a measurable impact.

EDUCATION

Master's in Information Technology and Management | The University of Texas at Dallas
Bachelor in Information Technology | Swarnim Startup and Innovation University

Aug 2023 – May 2025
Aug 2019 – May 2023

CORE SKILLS

Programming & Languages: - SQL, Python, R, SAS, MATLAB, Excel (Advanced, VBA)

Data Analytics & Statistical Techniques: - Exploratory Data Analysis (EDA), Hypothesis Testing, Regression (Linear, Logistic), Classification, Clustering, A/B Testing, Time Series Forecasting (ARIMA, Prophet), Cohort Analysis, Churn Modeling, Funnel , Analysis, Descriptive & Inferential Statistics

Data Visualization & Reporting: - Tableau, Power BI, Google Data Studio, Excel Dashboards, KPI Reporting, Data Storytelling, Executive Dashboards

Database & Data Engineering:- MySQL, PostgreSQL, SQL Server, MongoDB, Snowflake, Hadoop, Spark, ETL Pipelines, Data Wrangling, Data Cleaning, Pandas, NumPy, Alteryx, SSMS

Real-Time & Operational Analytics: SLA Monitoring, Queue Performance Tracking, Schedule Optimization, Real-Time Dashboards, Agent Adherence, Shrinkage, Occupancy, Root Cause Analysis

Cloud Platforms & Tools:- AWS (S3, EC2, Redshift), Azure, Jupyter Notebooks, Google Colab, GitHub, Jira

Business Analytics & Domain Knowledge:- KPI Development, Product Analytics, Campaign Performance, Root Cause Analysis, Customer Behavior Analysis, Marketing ROI, Financial Reporting

Industry-Specific Tools & Compliance:- Clinical Trial Analytics (CDISC: SDTM/ADaM), FDA Data Standards, HIPAA Compliance (Healthcare), Risk Analysis, Transaction Monitoring, Compliance Reporting (Finance/FinTech)

Soft Skills:- Strong Communication, Stakeholder Engagement, Cross-Functional Collaboration, Agile/Scrum Methodologies, Analytical Thinking, Problem Solving, Curiosity & Continuous Learning, Cross-Functional Stakeholder Collaboration (Product, Marketing, Ops)

PROFESSIONAL EXPERIENCE

Clinical Data Solution LLC | Dallas, TX

Feb 2025- May 2025

Data Analyst Intern

- Extracted and transformed large volumes of **clinical trial and patient outcome data** to support FDA submissions and compliance reporting.
- Wrote **SQL queries and Excel models** to analyze treatment effectiveness, adverse event trends, and patient demographics.
- Automated data validation workflows, improving data accuracy and reducing processing time by **25%**.
- Developed **Power BI reports and dashboards** for stakeholders to monitor key clinical KPIs.
- Partnered with cross-functional teams to deliver timely, high-quality data deliverables

Rosix Technology | Ahmedabad, India

Feb 2020 – Jun 2023

Data Analyst

- Monitored real-time data pipeline performance and maintained live dashboards to support operational teams and client SLAs across healthcare and e-commerce projects.
- Built automated dashboards using **Power BI and Tableau**, enabling continuous performance visibility across marketing, support, and sales queues—resulting in 25% reporting efficiency gain.
- Collaborated with operational leads to manage staffing insights by tracking agent adherence, shrinkage, and productivity—informing scheduling adjustments in peak hours.
- Automated monthly and weekly reporting workflows using **Python scripts** and **Excel VBA**, saving over 20+ hours/month in manual efforts.
- Designed and optimized **SQL-based** data pipelines for querying large unstructured datasets (5M+ rows), reducing duplication and increasing speed of real-time reporting.
- Supported data-driven **A/B testing analysis** for feature rollouts, performing cohort comparisons and adoption tracking to guide product decision-making.
- Conducted **root cause analysis** for dips in KPIs such as engagement rate and conversion, collaborating with stakeholders to address inefficiencies—leading to an 18% improvement in operational KPIs.
- Developed and deployed **predictive models** (regression, time series) to forecast user behavior, sales demand, and customer retention, improving forecast accuracy by 18%.
- Acted as a data partner for leadership by maintaining KPIs for sales performance, lead funnel health, and client onboarding metrics.
- Mentored 3+ junior analysts in Python, SQL, and data storytelling—standardizing processes for faster onboarding and skill growth across the team.
