

Bharani Kumar Yerraballi | Java Full Stack Developer

FL, USA | +1 (469)-580-9832 | bharanibunny3249@gmail.com | [LinkedIn](#)

SUMMARY

Java Full Stack Developer with over 5 years of experience designing and building scalable web applications using Java, Spring Boot, React.js, and Angular. Skilled in developing microservices-based architectures, implementing RESTful APIs, and managing automated deployments with Docker, Kubernetes, and CI/CD pipelines on AWS. Experienced in optimizing backend performance through efficient database design and query tuning using PostgreSQL and DynamoDB. Adept at creating responsive, secure, and accessible front-end interfaces aligned with modern JavaScript standards. Strong background in Agile development, code reviews, and cross-functional collaboration to deliver stable, high-performance software across distributed environments.

TECHNICAL SKILLS

Programming & Frameworks: Java (8, 11, 17), Spring Boot, Spring MVC, Spring Security, Hibernate, JPA, JavaScript (ES6+), TypeScript, React.js, Angular, HTML5, CSS3, Bootstrap, Material-UI, Tailwind CSS

Backend & Microservices: RESTful API development, Microservices architecture, Serverless applications (AWS Lambda), OAuth 2.0, JWT Authentication, Role-Based Access Control (RBAC), Exception handling, Logging (SLF4J, Logback)

Cloud & DevOps: AWS (Lambda, SQS, DynamoDB, S3, API Gateway), Docker, Kubernetes, CI/CD pipelines (Jenkins, GitHub Actions, Git), Automated deployments

Databases & Data Management: PostgreSQL, DynamoDB, MySQL, Database schema design, Query optimization, Data integration, ORM (Hibernate/JPA)

Security & Compliance: Application security best practices (frontend & backend), OAuth 2.0, JWT, HIPAA compliance, Input validation & data encryption

Development Practices & Collaboration: Agile Scrum, Test-Driven Development (TDD), Unit & Integration Testing (JUnit, Mockito), Cross-functional team collaboration, Version control with Git

EXPERIENCE

Java Full Stack Developer | Optum | FL, USA

Dec 2024 - Present

- Designed and enhanced scalable Spring Boot microservices for critical healthcare workflows, improving transaction throughput by 38% and enabling secure processing of 60,000+ daily patient records across multiple regions.
- Developed Angular front-end modules with reactive forms and advanced state management, reducing UI response time by 30% while delivering consistent usability for clinicians, pharmacy teams, and patients.
- Integrated RESTful APIs and third-party healthcare partner systems, streamlining interoperability across insurance, claims, and pharmacy networks, and reducing manual data transfers by nearly 45% organization-wide.
- Implemented HIPAA-compliant authentication, encryption, and audit logging frameworks, ensuring 100% compliance during external audits and securing sensitive patient data across distributed application layers.
- Led Agile sprints involving developers, QA engineers, and business stakeholders, achieving a 25% improvement in release velocity while maintaining 95% code coverage and near-zero regression defects.
- Automated deployments using Jenkins pipelines, Docker containers, and Kubernetes orchestration on AWS, reducing downtime during production rollouts by 35% and maintaining consistent service reliability.

Java Full Stack Developer | Hexaware Technologies | India

Aug 2021 – Jul 2023

- Refactored monolithic enterprise applications into Spring Boot-based microservices, reducing maintenance overhead by 28% and enabling horizontal scalability across global financial service platforms.
- Architected cloud-native data ingestion and processing pipelines using AWS Lambda, SQS, and DynamoDB, enhancing throughput efficiency by 42% and ensuring stable high-volume data operations.
- Engineered responsive and accessible front-end applications using React.js and Angular frameworks, driving a 20% increase in end-user engagement across multiple browser and mobile environments.
- Developed and maintained CI/CD pipelines with Jenkins and Git integrations, automating builds and deployments that reduced failure rates by 40% and shortened release cycles to one week.
- Collaborated with cross-functional global teams following Agile practices to deliver enterprise-grade applications, meeting 99% of sprint goals and achieving strong stakeholder satisfaction.
- Optimized PostgreSQL queries, schemas, and indexing strategies, improving query response times by 45% and supporting data workloads exceeding two million daily transactional records.

Front-End Developer | Adons Softech | India

May 2019 – Jul 2021

- Built interactive, responsive front-end interfaces using HTML5, CSS3, and modern JavaScript (ES6+), improving cross-browser compatibility and elevating customer satisfaction scores by 25% across projects.
- Translated high-fidelity wireframes and UX mockups into functional web interfaces, maintaining 100% design accuracy and reducing client-requested rework during QA cycles by 15%.
- Optimized application performance through lazy loading, code splitting, and caching strategies, achieving a 40% reduction in initial load times and improving Lighthouse performance metrics.
- Established and maintained Git-based version control practices, performed peer code reviews, and resolved merge conflicts, increasing code quality and reducing post-deployment defects by 27%.
- Supported Agile ceremonies such as sprint reviews, planning, and retrospectives, fostering collaborative progress and meeting 95% of project milestones within established timelines.
- Integrated RESTful backend APIs into front-end modules, ensuring consistent data synchronization, eliminating redundant network calls, and reducing overall integration-related issues by 22%.

EDUCATION

Masters in Computer Science and Information | Systems Saint Leo University Tampa FL, USA

May 2025

CERTIFICATIONS

- Java Certified Foundations Associate
- AWS Certified Solutions Architect
