

SUMMARY

- Detail-oriented **Business Data Analyst** with over **4 years** of strong background in data analysis, and visualization complemented by hands-on experience in various analytical and programming tools.
- Proficient in **Python, SQL, and R** for data analysis, alongside experience with databases like **Oracle, MySQL, PostgreSQL, and Microsoft SQL server**, ensuring efficient data storage, retrieval, and management.
- Experienced in utilizing analytical frameworks such as **NumPy, Pandas, Matplotlib, Seaborn, Plotly, and Scikit-learn** to perform data cleaning, mining, and statistical analysis, providing valuable insights for **business decision-making**.
- Skilled in creating impactful visualizations using **Tableau, Power BI, and Excel**, allowing for clear communication of complex data patterns and trends to stakeholders at all levels.
- Expertise in data governance, data warehousing, gap analysis, A/B testing, problem-solving, critical thinking, cost/benefit analysis, impact analysis, risk analysis, SWOT analysis, FRD, BRD, Software Requirements Specification (SRS), Use Case Diagram, enabling the delivery of precise and actionable insights that support **data-driven strategies**.
- Adept at leveraging **AWS** for cloud-based data storage and processing, ensuring scalability and security in data managementPractices.
- Familiar with a wide array of tools including **Git, GitHub, SAS, SAP, Jupyter Notebook, VS Code, Docker, MS Office Suite(Word, Project), JIRA, Adobe Acrobat Suite, Lotus Notes, Lean Six Sigma, Confluence**, streamlining workflows and enhancing productivity.
- Well-versed in **SDLC and Agile (Scrum)** methodologies, ensuring efficient project management and timely delivery of high-quality analytical solutions.

TECHNICAL SKILLS

Languages:	Python, SQL, R, HTML, CSS, JavaScript
Databases:	Oracle, h2Database, Mongo DB, MySQL, PostgreSQL, Microsoft SQL server
Frameworks:	NumPy, Pandas, Matplotlib, Seaborn, Plotly, Scikit-learn
Visualization Tools:	Tableau, Power BI, Excel
Cloud	AWS
Analytic & PM Skills:	Data Cleaning, Data Mining, Exploratory Data Analysis, Statistical Analysis, Gap Analysis, Regression Analysis, Problem Solving, Critical Thinking, Collaboration, A/B Testing, Cost/benefit analysis, Impact analysis, Risk analysis, SWOT analysis, FRD, BRD, Software Requirements Specification (SRS), Use Case Diagram
Tools:	Git, GitHub, SAS, SAP, Jupyter Notebook, VS Code, Docker, Kubernetes, Service Now, Salesforce CRM, SharePoint, Visio, Lucid chart, Team Center, Draw.io, MS Office Suite(Word, Project), JIRA, Adobe Acrobat Suite, Lotus Notes, Lean Six Sigma, Confluence
Methodologies:	SDLC, Agile (Scrum)

PROFESSIONAL EXPERIENCE

Northern Trust, FL Business Data Analyst	Jan 2024 - Current
- Optimized Python and SQL (PostgreSQL) data pipelines, achieving a 25% reduction in processing time to ensure real-time data availability for timely decision-making across operational units - Designed and implemented dynamic, interactive dashboards in Excel using PivotTables, Pivot Charts, and Power Pivot, delivering clear visualizations of complex datasets for informed strategic decision-making by stakeholders. - Developed customized Tableau dashboards integrating complex financial data from multiple sources, enhancing visibility into key performance indicators (KPIs) and facilitating proactive decision-making processes. - Applied robust statistical methods and models to analyze large-scale datasets, identifying key trends and patterns, and delivered precise forecasts that drove strategic planning, optimizing resource allocation and operational efficiencies. - Designed Tableau dashboard providing real-time insights into financial performance, including revenue, and profitability. Implemented drill-through filters and interactive visualizations to enhance data-driven decisions by senior management. - Revolutionized financial reporting with automated processes leveraging SQL and Matplotlib, slashing report generation time and delivering swift insights into economic trends and performance metrics. - Utilized AWS S3 for scalable storage and implemented IAM for secure access management, enhancing the protection of sensitive healthcare information. Conducted regular Risk Analysis to ensure data security and compliance. - Conducted A/B testing to optimize investment decisions, resulting in a 20% improvement in outcomes. Collaborated with the Risk Management team to develop a data governance framework, ensuring full regulatory compliance. - Built predictive models using Scikit-learn to assess credit risk in billing and insurance claims, improving financial risk identification and mitigation. Developed a Use Case Diagram to map out the risk assessment process. - Led Agile (Scrum) methodologies to foster collaborative SDLC management, leveraging Git, GitHub, and Docker for seamless teamwork, ensuring timely project delivery, and consistently surpassing client expectations.	
Sage Softtech, India Business Analyst	Jan 2020 – Nov 2022
Conducted exhaustive data analyses using Python and R to pinpoint inefficiencies, driving optimizations that enhanced system efficiency and operational effectiveness by 20%, implemented solutions that streamlined processes and enabled faster decision-making, demonstrating a proactive approach to data-driven improvements	

- Automated reporting solutions using **Excel macros** and **VBA**, streamlining recurring tasks and minimizing manual effort, significantly boosting reporting efficiency and enabling faster decision-making processes.
- Designed and managed **PostgreSQL, MySQL, and Oracle** databases, achieving a 25% reduction in query response times and enabling faster data access for real-time decision-making.
- Created and maintained interactive **BI dashboards** and reports using **Power BI** and **SAS Visual Analytics**, providing actionable insights to stakeholders and supporting data-driven decision-making processes.
- Responsible for creating and meticulously reviewing **business requirements, functional specifications, project schedules, comprehensive documentation, and detailed test plans**, ensuring alignment with project goals and client expectations.
- Conducted **JAD (Joint Application Development)** sessions with business users and development teams to gather comprehensive and quality requirements, fostering effective communication and collaboration between **stakeholders**.
- Conducted detailed **GAP analysis** to identify business rules, risks, business and system process flows, user administration requirements, and underlying assumptions.
- Designed and developed comprehensive use cases, use case diagrams, and activity diagrams using **UML**, providing clear visual representations of **business requirements** and processes.
- Performed **User Acceptance Testing (UAT)** on business requirements, technical specifications, and product knowledge to ensure the final product met user needs and business goals.
- Automated comprehensive **software performance** reporting utilizing **pandas** and **NumPy**, reducing manual efforts by 18%. Enabled continuous monitoring of critical metrics for proactive performance management and swift corrective actions.

Hexaware Technologies, India

Aug 2019 – Dec 2019

Data Analyst Intern

- Spearheaded the development of a customer segmentation project using **Python** and **SQL**, analyzed large datasets to categorize customer behavior patterns, enhancing the company's marketing strategies.
- Collaborated with senior analysts to design and optimize **ETL (Extract, Transform, and Load) pipelines**, leading to a 15% improvement in data processing efficiency for critical business reports.
- Developed and presented interactive **Power BI dashboards**, enabling real-time insights into sales performance, which directly influenced strategic decision-making for product development teams.
- Conducted a comprehensive analysis of customer churn using **R** and **Scikit-learn**, building a predictive model that identified key factors contributing to client retention, resulting in a 12% reduction in churn rate over the following quarter.
- Assisted in automating **data cleaning** and **data wrangling** processes for legacy systems, reducing manual data handling efforts by 25%, and leading to more streamlined reporting cycles.
- Played a key role in conducting **A/B testing** for an e-commerce project, evaluating the effectiveness of different website features, which contributed to a 10% increase in user engagement.

PROJECTS

Financial Performance Optimization Project

- Analyzed large financial datasets using **SQL** and **Python** to automate data extraction and reporting processes, reducing manual efforts by 40% and improving forecasting accuracy by 15%.
- Integrated financial data from **ERP** and **CRM** systems into **MySQL**, creating real-time, interactive **Power BI** and **Tableau** dashboards to track KPIs like revenue, profit margins, and costs.
- Collaborated with the Risk Management team to implement data governance frameworks, ensuring regulatory compliance and improving financial reporting integrity.

Technologies Used: Python, SQL, MySQL, Power BI, Tableau, Excel (VBA), AWS S3, JIRA.

Optimizing Healthcare Data Insights and Patient Outcomes Through Advanced Data Analytics

- Conducted data analysis on patient records using **Python** and **SQL**, identifying trends in patient outcomes and optimizing treatment plans, resulting in a 20% improvement in healthcare efficiency.
- Developed interactive **Tableau** dashboards for healthcare providers, enabling real-time visualization of patient data, operational metrics, and resource allocation, improving decision-making processes.
- Automated data pipelines in **AWS** to streamline **ETL** processes for healthcare data, ensuring secure and scalable data management, and reducing data processing time by 30%.

Technologies Used: Python, SQL, Tableau, AWS, Excel, Power BI, Jupyter Notebook.

EDUCATION

Master of Science, Technology

University of Central Missouri, Warrensburg

May 2024

Bachelor of Technology, Electronics, and Communication

Keshav Memorial Institute of Technology, India

Sep 2021
