SUMMARY

- IT experience in Design and Development of Web and Cloud based applications for small companies as well as for large enterprise.
- 5 Years strong experience of Object-Oriented programming languages C#, Asp.Net MVC, WEB API, WCF and Asp.Net Core development.
- Experience in developing web and desktop applications using client server architecture with C#.Net, .Net Framework, ASP.NET, ADO.Net, Web Forms, Web Services, Web API, LINQ, .Net core, MVC5, AJAX, Entity Framework, Angular 2/8/14.
- Expert in MS SQL Server database design, development and in writing Constraints, Indexes, Views, Stored Procedures, Cursors, Triggers and User Defined Functions.
- Proficient in ASP.NET Web API as the platform for building Restful service applications on the .NET Framework and ASP.NET MVC.
- Excellent exposure to Microsoft Azure Cloud including Azure Functions, App Services, API Management, Cosmos Db, Redis Cache, Azure SQL.

SKILLS

Cloud Platform: AWS, Microsoft Azure.

Tools: Azure DevOps, Git, TFS, GitHub, JIRA, SQL

Front End: Angular, React, Java Script, Type Script.

Profiler.

Stream Ingestion and Message Services:

Back End: C#, .Net Core, WebAPI, WCF, LINQ, Entity Framework, Entity Framework.

AWS SQS, Azure Service Bus, Kafka.

Methods and Standards:

Database: MS SQL Server, Azure Redis Cache, Azure Cosmos db, Aurora My SQL, Dynamo db.

Agile, Scrum, Kanban Board

EXPERIENCE

BlackRock, MA | November 2022 – Current | Dot Net Developer

- Joined as Software Engineer and was assigned to work for financial Domain.
- Excellent exposure to Application-Level Security as we were building applications for financial trading
- Automated multiple manual processes through a series of jobs and schedulers. This resulted in the automatic process of Order Placing in EQ, and MF.
- Worked on React, .Net Core, C#, Aurora MySQL, Dynamo DB.
- Implemented best practices and the latest mitigation techniques to keep the application secure for financial Users.
- Responsible for creating and building REST APIs that used SQS as the middleware to interface with various systems.
- Involved in query optimization of query performance using various programming concepts
- Oversaw the planning, development, and implementation of several medium-sized projects that resulted in a sharp increase in EQ, MF Order Handling transactions.
 - Frontend –JavaScript, Type Script, HTML, CSS, jQuery.
 - Backend - NET Core Web API, ASP.NET MVC, AWS Services.
 - Database–Aurora MySQL, Dynamo DB, AWS Services.

KPIT Technologies, India | October 2017 – August 2021| Dot Net Developer

- Involving Agile methodologies to do requirements gathering, analysis and sprint planning.
- Experienced in utilizing advanced C# features like LINQ, async/await, and generics to enhance application performance and maintainability.
- Proficient in leveraging .NET Core/Framework libraries and features to build RESTful services and microservices architectures.
- Developed interactive web applications using ASP.NET MVC, implementing MVC architectural pattern to separate concerns and ensure maintainability.
- Experienced in utilizing advanced Entity Framework features like Code-First approach, migrations, and complex query optimization for seamless database interactions.
- Expert in client-side scripting with JavaScript and various frameworks/libraries like jQuery to enhance user interactivity and improve user experience.
- Developed dynamic single-page applications (SPAs) using Angular, React leveraging component-based architecture and state management libraries.
- Well-versed and consumed RESTful APIs, ensuring adherence to REST principles for interoperability and scalability.
- Experienced in utilizing Git repositories hosting platforms like GitHub or GitLab for code collaboration and project management.
- Proficient in deploying and managing applications on cloud platforms Azure, leveraging services like Azure Function, Virtual machine.
 - Frontend –Angular, JavaScript, Type Script, HTML, CSS.
 - Backend - NET Core Web API, ASP.NET MVC, Azure Services.
 - Database– Azure MySQL.

EDUCATION

Masters in Informatics

Northeastern University ,Boston,MA

Bachelors in Technology

SRM University, Chennai, India
