

# Shruthi Gutta

## EXPERIENCE

### Indiana University, Bloomington, IN

#### Data Engineer, July 2023 – Present

- Designed and implemented ETL pipelines using Azure Data Factory and Python, improving data processing speed by 40%.
- Led data cleaning and validation efforts utilizing SQL, Python, and SQL Server Management Studio, resulting in a 30% increase in data integrity and reliability, supporting more accurate donor insights.
- Engineered and maintained a robust data warehouse using Azure SQL Database, integrating data from multiple sources to create a unified repository for advanced data analytics and streamlined access to historical data.
- Created interactive dashboards using Tableau, providing real-time insights into fundraising campaign performance.

### Gathi Analytics LLC, Plano, TX

#### Data Engineer Intern, June 2022 – Aug 2022

- Designed high-performance ETL pipelines using Snowflake, SQL, Python, and Git for large datasets, successfully built and maintained data pipeline integrity with less than 5% errors or failures.
- Transformed data workflows with Alteryx, achieving a 15% reduction in manual data processes and enhancing data processing efficiency by 12%.
- Developed interactive Tableau dashboards to analyze performance metrics, customer trends, and fleet efficiency, significantly improving data visualization and decision-making for a car rental company.
- Utilized advanced SQL techniques to boost data integrity by 30%, optimizing query performance and ensuring seamless data source integration.
- Contributed to machine learning algorithm development, enhancing predictive analytics and data-driven insights in various business applications.

### Hansamukh Software Solutions, Hyderabad, India

#### ETL Developer, Jan 2021 – Aug 2021

- Managed ETL for over 100 retail stores using Navision ERP and Dimensional Modeling in a core Data Warehouse Model, targeting a 25% improvement in troubleshooting and resolving data-related issues.
- Deployed 30+ SSIS packages for NAV data refinement and utilized SSAS for multidimensional OLAP cube design, enhancing retail analytics efficiency and data accuracy.
- Launched Power BI dashboards to transform client data into actionable insights and efficiently handled daily job monitoring reports, streamlining data visualization and decision-making processes.
- Engineered real-time warehouse management reports in coordination with sorting machines using SSRS and Power BI, significantly improving report accuracy and operational insights.
- Applied Agile methodologies and Azure DevOps Server in the software development lifecycle (SDLC), ensuring efficient pipeline management and ETL process optimization.

### Omulus Infotech, Hyderabad, India

#### Data Analyst Intern, Nov 2019 – Dec 2020

- Enhanced data validation by 30% in healthcare data analysis, through skillful data transformation and manipulation using Python and SQL, meeting the KPI of improving data accuracy.
- Streamlined data collection and processing using Azure Data Factory and Azure Stream Analytics, optimizing querying efficiency in the Azure SQL Database.
- Produced and implemented interactive dashboards in Power BI, integrated with web technologies (HTML, CSS, JavaScript, Bootstrap), providing comprehensive insights into patient care and financial data.
- Created a web application using Django and Flask, coupled with Power BI dashboards, to communicate key findings and recommendations.

## PROJECTS

### Advanced Health Care System

**Tech:** Django, Python, SQL, CSS, Bootstrap, PostgreSQL, Flask

- Developed a comprehensive Django web interface for patient records and implemented a Python Machine Learning model for medication prediction, utilizing SQL, HTML, CSS, Flask, Bootstrap, and PostgreSQL storage, integrating advanced technologies for efficient data handling in the healthcare domain.

### Home Credit Default Risk Detection

**Tech:** Machine Learning, Python, OpenCV, Deep Learning Concepts

- Designed a Machine Learning prediction model using Python and Deep Learning concepts to assess loan repayment capability, achieving 88% accuracy with XGBoost, outperforming other models like SVM, KNN, Random Forest, and Logistic Regression, and optimized model training times by 30%.

Wayne, NJ (Open to Relocation)

## SKILLS

**Languages:** Python (Panda, numpy), R, SQL, MATLAB, HTML, CSS

**Databases:** Azure SQL DB, Azure Cosmos DB, PostgreSQL, MySQL, AzureSQL, MongoDB, OracleDB, SQLite

**Big Data & Cloud Services:** Spark, Apache Kafka, Snowflake, Azure ML, Azure Data Factory

**Data Integration & Reporting:** Alteryx, MSBI (SSIS, SSAS, SSRS), Dimensional Modeling, Tableau, Power BI

**Web Technologies & Message Brokers:** Flask, Django, Bootstrap, RabbitMQ, GraphQL

## EDUCATION

### Indiana University

Master of Science in Data Science, GPA: 3.7/4  
May 2023  
Bloomington, IN, USA

- Coursework: Artificial Intelligence, Advanced Database Concepts, Applied Algorithms, Data Visualization, Statistics, Machine Learning, Database Design, Big Data, Data Mining, Deep Learning, Computer Vision

### Jawaharlal Nehru Technological University

Bachelor of Technology in Electronics and Communication Engineering, CGPA: 9.47/10  
Sep 2020  
Hyderabad, India

## OTHER

- Certified in Data Engineering on Microsoft Azure (DP-203).
- Certified in Microsoft Azure Data Fundamentals (AZ-900).
- Served as Graduate Services Teaching Assistant, Indiana University for Information Informatics from Aug’22 to May’23.
- Authored the monograph "Stepping into Effortless Tomorrow" on IoT, published by the Advance Academic Center, India.
