
Projects

- [untitled-moviesite.vercel.app*](#) Oct 2025 – Jan 2026
 - Developed a Node.js/Docker microservice that includes a data pipeline aggregating movie metadata from Wikidata SPARQL and other APIs into a performance-optimized PostgreSQL database
 - Developed a responsive Vue/Nuxt.js web interface to explore aggregated PostgreSQL movie metadata and manage personalized release alerts
- [pvputils.vercel.app*](#) [github.com/pvputils*](#), [/pvputils-web*](#) May 2025 – Sep 2025
 - Built a site (React/Next.js)* for updating textures from legacy formats and hosting fabric-pvp-utils* (Java), a mod that adds features to the Minecraft client
- [Minecraft server network*](#) [github.com/memeasaur*](#) Feb 2024 – Jun 2025
 - Reimagined several defunct gamemodes by developing an HCF plugin*, DayZ plugin*, and a custom server fork* (Java) alongside a public web dashboard (Go)* and global database integration (PostgreSQL)*
 - Optimized game-server and network performance while designing new gameplay mechanics and maps to maintain balanced, competitive player experiences, occasionally modifying existing game code as needed

Education

- CS50 Nov 2024
 - Studied CS fundamentals through Harvard's online course, working in C and Python
- ...
- Union County Early College

Employment

- Preloader United Parcel Service Nov 2020 – Oct 2024
 - Supported a large team by filling roles ranging from physical labor to cognitive tasks in a high-pace warehouse environment

Skills

- Languages:
 - **TypeScript** (React, Next, Vue, Nuxt), **Java**, **SQL (Postgres, SQLite)**
 - Go, Python, C
 - Technologies:
 - Git, Linux, Bash, Docker
 - Data Structures and Algorithms
-
