

Chaitanya Reddy Basani

(913) 488-1472 | basanichaitanyareddy@gmail.com

SUMMARY:

Results-driven Full Stack Java Developer with 5+ years of experience architecting and deploying enterprise applications using Java, Spring Boot, Angular, and modern cloud platforms. Proven expertise in building scalable microservices architectures, responsive SPAs, and RESTful APIs that process millions of transactions daily. Strong track record of reducing system latency by up to 60% and improving application performance through modern frameworks and best practices.

CERTIFICATIONS:

- Generative AI Leader Certification
- Microsoft Certified Azure Fundamentals
- AWS Certified Developer
- CSM, Scrum Alliance Certified

TECHNICAL SKILLS

Backend Technologies:	Java, Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Spring Cloud, Hibernate ORM, RESTful Web Services, Microservices Architecture, Spring WebFlux, Lambda Expressions, Stream API
Frontend Technologies:	Angular, TypeScript, JavaScript (ES6+), RxJS, NgRx, HTML5, CSS3, SCSS, Angular Material, Bootstrap, Reactive Forms, Component Architecture,
Big Data & Processing:	Apache Spark, PySpark, Hadoop, Apache Airflow, Delta Lake, Data Lake Architecture, ETL/ELT Development
Databases & Data:	PostgreSQL, MySQL, MongoDB, Oracle, SQL Server, DynamoDB, Snowflake, Redis, Elasticsearch, JDBC, JPA/Hibernate, SQL Optimization, NoSQL Design, Database Migrations
Cloud & DevOps:	WS (Lambda, EC2, S3, RDS, Glue, Redshift, EMR, Kinesis, CloudWatch), Azure (Functions, App Service, Data Factory, Databricks, AKS, DevOps), Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, Maven, Gradle
Messaging & Tools:	Apache Kafka, RabbitMQ, Apache Airflow, JUnit, Mockito, Cucumber, Cypress, Postman, SonarQube, Git, Jira, Agile/Scrum
Tools & Methodologies:	Git, IntelliJ IDEA, VS Code, Maven, Gradle, Jira, Confluence, Agile/Scrum, REST API Design, OAuth2, JWT, OpenAPI/Swagger, Microservices Patterns
Additional Technologies:	Python, Node.js, GraphQL, Databricks, dbt, Power BI, Tableau

EDUCATION:

- **University Of North Texas**
Masters of Science in Information Systems and Technologies
Denton, Texas
Aug 2022 – May 2025
- **Lovely Professional University**
Bachelor of Technology in Computer Science
Punjab, India
June 2018 – May 2022

PROFESSIONAL EXPERIENCE:

Incom Technologies Inc., TX(Client: BCBS)

June 2025 – Present

Senior Full Stack Java Developer

- Built healthcare platform using **Java Spring Boot** microservices and **Angular** frontend that processes 50+ million member records daily with 99.5% accuracy and sub-200ms API response times
- Engineered **8 Spring Boot microservices** using Spring Cloud (Eureka, Config Server, Gateway) for member enrollment and claims processing; implemented circuit breakers with Resilience4j achieving 99.9% uptime
- Developed enterprise **Angular SPA** with NgRx state management, lazy-loaded modules, and Angular Material UI; reduced initial page load time by 45% using code splitting and bundle optimization
- Created **RESTful APIs** using Spring Boot with 50+ endpoints documented via Swagger; implemented pagination, filtering, and rate limiting handling 100K+ daily requests

- Built real-time event processing using Apache Kafka and Spring Cloud Stream that handles 100K+ healthcare events per minute with exactly-once message delivery
- Implemented **Spring Security** with OAuth2 and JWT authentication; developed Angular HTTP interceptors for automatic token refresh and role-based route protection across 30+ components
- Optimized database queries on **PostgreSQL and Snowflake** using indexing, partitioning, and query rewriting; reduced average query execution time by 60%
- Deployed containerized applications on **Azure Kubernetes Service** with Helm charts and horizontal pod autoscaling; established CI/CD pipeline via Azure DevOps with automated testing achieving 90% code coverage
- Automated infrastructure provisioning using **Terraform** for Azure resources including AKS clusters, SQL databases, Key Vault, and Application Insights

Chemeketa Community College, Oregon
Integration Analyst

Jan 2025 – May 2025

- Built student portal using **Spring Boot** backend and **Angular** frontend serving 40,000+ students with course registration, grade tracking, and real-time enrollment updates
- Built **RESTful microservices** implementing CQRS pattern for course registration and grade management; achieved p95 response time under 180ms
- Developed **Angular SPA** with reactive forms, custom validators, and virtual scrolling for rendering 10,000+ course listings; implemented RxJS operators for complex async data flows
- Built event-driven architecture using **AWS Lambda** (Java runtime) and SQS for processing enrollment events with automatic retry logic and dead-letter queue handling
- Developed **Spring Data JPA** repositories with custom queries and entity graphs to eliminate N+1 query problems; integrated OAuth2 authentication with institutional SSO using SAML
- Built **Apache Airflow** workflows orchestrated by Spring Boot for ETL job scheduling across multiple systems
- Deployed applications on **AWS** using Elastic Beanstalk for Spring Boot backend and S3/CloudFront for Angular frontend with automatic scaling based on traffic

Incom Technologies Inc., TX(Client: BNY Melon)
Java Full Stack Developer

July 2024 – Jan 2025

- Built financial trading platform using **Java Spring Boot microservices** and **Angular** that processes 100,000+ transactions per minute with real-time settlement and reconciliation
- Created **10+ Spring Boot microservices** for trade execution, portfolio management, and risk calculation; implemented saga pattern for distributed transactions across services
- Developed **Angular application** with component-based architecture and RxJS state management; created real-time trading dashboards with WebSocket integration for live market updates
- Built streaming data pipeline using Apache Kafka and AWS Kinesis for real-time trade event processing with sub-millisecond latency and exactly-once delivery guarantees
- Designed **NoSQL database schemas** on MongoDB and DynamoDB for high-speed trade storage with optimized partition keys and secondary indexes for query performance
- Automated AWS infrastructure using **Terraform** for ECS clusters, RDS databases, VPCs, and Application Load Balancers; built CI/CD pipelines with GitHub Actions and Jenkins
- Implemented automated data quality checks using Great Expectations framework integrated with Spring Boot, reducing data quality issues by 35% through validation rules

University of North Texas, TX
Java Software Developer

Jan 2023 – May 2024

- Maintained student portal using **Java 8, Spring MVC**, and **JavaScript** that supports 40,000+ students with 99.8% uptime and sub-second response times
- Developed RESTful APIs with **Spring Boot** for student information management including registration, grades, and financial aid
- Developed ETL workflows using **Spring Batch** for migrating large datasets from legacy systems with chunk-based processing and comprehensive error handling
- Built data access layer using **Spring Data JPA** with MySQL and SQL Server; optimized queries using JPQL, native SQL, and stored procedures
- Integrated **AWS S3** with Spring Boot for secure document storage and automated backup scheduling; implemented disaster recovery procedures

- Built automated reporting system using SQL Server Integration Services (SSIS) integrated with Spring Boot scheduler for compliance and institutional analytics

Appdecs Technologies Pvt Ltd, India

Aug 2020 – Aug 2022

Java Developer

- Developed web applications using **Java 8**, **Spring Framework**, and **JavaScript** for BI platforms serving 100+ enterprise clients
- Created RESTful APIs using Spring MVC with JSON/XML response formats; implemented content negotiation and Jackson serialization
- Optimized SQL queries on MySQL and PostgreSQL for analytics workloads using indexes and query execution plans; improved performance by 50%
- Integrated **Apache Kafka** with Spring Boot for real-time event streaming from operational databases to analytics platform
- Implemented Spring Security for role-based access control in multi-tenant application architecture
- Created automated unit tests using JUnit and Mockito, achieving 80%+ code coverage
