

CHAPIN MENY

Pittsburgh, PA | Phone: (724) 747-3561 | Email: chapin2012@hotmail.com

Linkedin: [linkedin.com/in/chapinmeny](https://www.linkedin.com/in/chapinmeny) | GitLab: [chapin meny](#) · [GitLab](#)

SKILL SUMMARY

Python • Java • HTML • CSS • C • Bootstrap • JavaScript • SQL • Visual Basic • Django • API Integration • Programming • Git/GitHub • Agile Methodology • Data analysis/interpretation • Microsoft Office Suite • Problem Solving • Written/Verbal Communication • Collaboration • Public Speaking

RELEVANT PROJECTS

Command Line Connect Four | Gitlab: [chapin meny / Techwise Project One - Connect Four](#) · [GitLab](#)

- Contributor to the game Connect Four, utilizing Object-oriented programming featuring an AI component for multi-user gameplay.
- Tools Used: Python, Object-oriented programming, Numpy, Gitlab, Trello, Slack

Green Girls | GitLab: [chapin meny / Project 2 - Green Girls](#) · [GitLab](#)

- A Dynamic webpage designed to provide user with best recycling practices and protocols, features a map API integration.
- Tools Used: HTML, CSS, JavaScript, API integration, Bootstrap, Gitlab, Trello, Slack

Blooming Girls | GitLab: [chapin meny / Green Thumb Guidance](#) · [GitLab](#)

- A Dynamic webpage creating a user guide to gardening practices and plant identification, features a weather API as well as a plant identification API.
- Tools Used: HTML, CSS, JavaScript, Bootstrap, API integration, Django, MongoDB

EXPERIENCE

Toxicology Testing Personnel | Three Rivers Diagnostics | 2024 - Present

- Conduct specimen processing, including labeling, centrifuging, aliquoting, and accessioning, ensuring precise and efficient workflow.
- Operate and maintain LC-MS/MS systems, including calibration, troubleshooting, and quality control, to ensure accurate and reliable analytical testing.
- Perform drug screen testing using automated immunoassay analyzers, adhering to laboratory standard operating procedures and safety protocols.
- Review chromatograms to validate calibrators, QC results, and patient samples, ensuring compliance with established signal, peak shape, and ion ratio criteria.

Medical Laboratory Scientist | Quest Diagnostics | 2019 - 2024

- Perform high complexity testing in the toxicology department, specializing in oral fluid analysis.
- Collaboration with coworkers to establish the most effective strategy to optimize patient analysis and result release.
- Maintain, follow, and enforce laboratory safety as set by the local, state, and federal governing agencies.
- Independently managed personal assignments in an efficient manner to meet turn to meet turn-around time goal for patient samples while maintaining patient quality and utilizing problem-solving skills to manage issues that arise with samples and instrumentation.
- Work in partnership with the technical science team to develop and test methods to optimize our current testing protocols and implement new scientific methods to our testing.

EDUCATION

Software Engineering Training Certificate: Techwise By Talentsprint supported by Google, Pittsburgh, PA

18-month intensive training program focused on building fundamental knowledge/experience with software development technology.

Associate of Science – Software Development: Community College of Allegheny County, Pittsburgh, PA

Bachelor of Science – Biological Science: University of Pittsburgh at Greensburg, Greensburg, PA

Minors in Chemistry and Psychology
