EDUCATION

Master of Science, Computer Science

Oakland University, Rochester Hills, Michigan, USA

August 2022 – December 2023

GPA :3.88/4

Bachelor of Technology in Computer Science and Engineering

Jawaharlal Nehru Technological University, Hyderabad

August 2015 - May 2019

TECHNICAL SKILLS

- **Programming Languages** : JAVA8, SQL, JavaScript, TypeScript, HTML, CSS, C, C++, Dart
- **Database & Frameworks** : MySQL , Oracle, Spring Core, Spring boot, JUnit, Hibernate, Log4j, Spring Security, Spring Cloud, Angular15, Flutter
- **Tools** : GitHub, CICD using Jenkins, Docker, Kubernetes, Postman
- **Cloud Services** : Amazon Web Services – EC2, S3, RDS
- **Soft Skills** : Documentation, Presentation, Critical Thinking, Communication

WORK EXPERIENCE

Company : Exceloid Soft Systems

Feb 2020 – Jan 2022

Location : Hyderabad, India

Role : Java Developer

Summary :

- Adapted to all stages of software life cycle like design, development, testing and deployment.
- System study, interaction with users, analysis, designing, coding, and testing & implementation of the system. Development of product management code.
- Worked on Web Application development utilizing the **Spring Framework, IOC, MVC, Spring Security, Spring Cloud, Spring REST, Hibernate ORM, and Web Service Integration (RESTful Web Services)**.
- Used **Spring Security** with **JWT Token** to validate authorized role-based user and verify HTTPS request for the web application.
- Implemented Core Java concepts like **Multithreading, Concurrency, Exception Handling, File Handling, IO, Generics and Java Collections**.
- Developed code based on **Spring MVC** framework and used **Dependency Injection (DI)** to decouple the dependencies between objects.
- Developed persistence Layer using **Hibernate** to persist and manage the data into database.
- Developed and maintained microservices architecture using **Spring Cloud Eureka** for service discovery and registration.
- Implemented and configured **Spring Cloud API Gateway** to manage and route external requests, ensuring seamless communication between microservices.
- Ensured high availability and fault tolerance by implementing **Circuit Breakers and load balancing** within the microservices ecosystem.
- Used **AWS EC2 service** to test and deploy Microservices for high scalability and availability.
- Involved in developing Application on **AWS Infrastructure services using EC2, S3, RDS and EBS** for providing easy access to servers, storage, database, and synchronous and asynchronous transactions.

- Developed and maintained web applications using Angular, ensuring high performance and responsiveness.
- Integrated **RESTful APIs** and managed state using **Angular services** and state management libraries.
- Good Knowledge of **Angular15** latest features.
- Designed and developed **Caching and Logging service using Singleton pattern and Log4j**.

Project : Joy General Stores

- Worked with the retail application which is based on microservices architecture.
- For coordinating the actions between the microservices implemented **Feign Client** and RESTful web services.
- Worked with **ORM frameworks** like **JPA** to interact with relational database **MYSQL** and perform CRUD operations.
- Implemented **Eureka** which helps maintain an up-to-date registry of available services and **API Gateway** which acts as an **Front Controller**.
- Developed code based on **Spring MVC framework** and used **Dependency Injection (DI)** to decouple the dependencies between objects.
- Used **Jenkins** to trigger code build whenever new changes are pushed to a version control repository.
- Used **Docker** to package the application along with its required libraries and configuration into an container image.
- Implemented **Spring Security** using **JWT Token** to validate authorized role-based user and verify HTTPS requests.
- Implemented and maintained database schemas, optimized SQL queries, and ensured data integrity for efficient data management.
- Implemented **Caching mechanisms** for greater efficiency using Spring boot annotations .

Project : Decathlon

- Worked on developing a rating screen for the employee with multiple filters using RESTful API services.
- Used **Angular Framework** to develop the Rating screen and integrated RESTful APIs and managed state using Angular services.
- Migrated it from Older version of Play framework to Spring boot RESTful API services using MYSQL database.
- Written test cases using **JUnit and Mockito** and followed **TDD(Test Driven Development)**.
- Used complex **SQL** queries to implement procedures for **MySQL** database.
- Played a key role in the design and implementation of RESTful APIs, enabling seamless communication between different components of Decathlon's systems.

Company : Exceloid Soft Systems

Sept 2019 – Feb 2020

Location : Hyderabad, India

Role : Intern

Responsibilities:

- Utilized **Android Studio** IDE to develop a mobile application using **Flutter Framework** which supports cross platform application development.
- Development of the application in generic form where **JSON files** are converted into forms & then specified Widgets.

- UI development of Dashboards(includes Pie charts, Bar charts and Table charts), Reports and Generic Windows .
- Integrated **GRAPHQL** services to display the data in the front-end and Implemented **authentication using Firebase**.
- Consistently cooperated with backend team to provide a seamless app experience when dealing with API calls.
- Integrated client systems with third-party **APIs** and external services.
- Conducted **performance analysis** and implemented **optimization strategies** to improve the application responsiveness and resource efficiency.
