PROFILE & PROFESSIONAL SKILLS

I am a full stack developer with 4 years and 4 months of experience with Java, React, Docker, JavaScript, Spring Boot, Angular, MySQL, and Mongo. What I bring to the company that hires me is experience with the Agile/SCRUM methodology, documentation, clean code, strong knowledge of programming patterns (e.g., SOLID, object-oriented) and programming tools (e.g., Docker, Maven, AWS), good communication skills, quick understanding of systems, debugging tools, and unit testing. My most valuable skills are REST API management, microservices, system design, and object-oriented programming.
