

AKUA ADJEI

Burnsville MN | 218-979-1021 | akua.adjeipokuaah@gmail.com | [LinkedIn](#)

PROFESSIONAL SKILLS

- Data Analysis & Visualization (Power BI, Tableau, IBM Cognos)
- Advanced SQL (CTEs, window functions, complex joins).
- Python (automation, reporting).
- Power Automate & Power Automate Desktop
- Relational Databases & Data Extracts.
- Dashboard Design & Executive Reporting.
- Excellent written, verbal, and visual communication skills, with the ability to present complex technical concepts in accessible ways.
- Data Quality, Validation & Documentation.

WORK EXPERIENCE

First Int'l Bank and Trust - Moorhead, MN

July 2023 - December 2024

Data Analyst Intern

- Designed and implemented data collection methodologies, utilizing SQL and Excel to accurately report financial trends.
- Developed dashboards and reports using Business Analytics by Fiserv and Power BI, enhancing data accessibility for decision-makers.
- Guided non-technical stakeholders in building their own reports using software tools that minimize SQL knowledge requirements, empowering self-service analytics.
- Presented data findings in accessible formats, supporting cross-departmental collaboration and decision-making.
- Ensured data accuracy and consistency across multiple reporting platforms, demonstrating meticulous attention to detail.

The Bank of Elk River - Elk River, MN

March 2025 - Present

Data Analyst

- Delivers analytics and reporting for Credit, Finance, Marketing, Operations, and HR, working directly with executives and managers.
- Develop and maintain 50+ SQL-driven reports, ensuring accuracy through advanced joins, CTEs, and window functions.
- Convert static reports into dashboards to improve visibility into financial and operational metrics.
- Build Power Automate workflows eliminating manual searching, counting, and form-filling, significantly reducing staff time and errors.
- Built and maintained Synergy eSign templates and managed scheduled reports, improving operational documentation workflows.
- Automate reporting with Python, increasing accuracy by 90%+ and removing manual tallying.
- Identified and corrected inaccurate SQL joins and logic errors, preventing downstream reporting issues.
- Documented data processes, report logic, and testing steps, ensuring compliance with internal data control standards and supporting audit readiness.

PROJECTS

Fargo Housing Data Visualization (Tableau)

- Analyzed housing data for Fargo, ND, and built Tableau dashboards highlighting pricing trends, location patterns, and housing characteristics.
- Designed interactive visualizations to support data-driven insights for non-technical audiences.

Niblet Prediction Using Deep Learning

- Built and trained a Convolutional Neural Network (CNN) to classify images of niblets and non-niblets.
- Conducted image preprocessing and augmentation techniques (resizing, normalization, rotation, flipping) to enhance model performance.

EDUCATION

Concordia College, Moorhead, Minnesota GPA: 3.2 B.A: Computer Science December 2024
