EXPERIENCE

Establish - Associate Consultant

New York, NY | July 2023 - June 2024

- Designed and standardized a unified data model for product and operations data across luxury fashion distributor's 12 distinct brands to run multi-scenario network analysis and cluster modeling across previously siloed datasets, to recommend consolidation of 1 of 3 warehouses projecting 40% cost savings over 3 years while maintaining SLAs
- Developed SQL stored procedures to automate formatting and cleansing of new client data into proprietary software, reducing manual data preparation effort and enforcing consistent structural standards across datasets

Gopuff - Process Engineering Intern

New York, NY | May - August 2022

- Analyzed performance gaps between 6 warehouses and implemented Lean Six Sigma principles at 2 sites leading to 30%-130% improvement in 4 major KPIs at both sites and projected \$7M labor savings
- Interviewed 5 end-users to understand pain points and analyzed historical data to identify process bottleneck leading to new guidelines for appropriate inventory stowing

Wayfair - Business Intelligence Intern

Boston, MA | June - December 2020

- Automated quarterly calculations of 12 data health KPIs across 20+ million products and documented root cause analysis logic in flowchart, reducing total analysis time by 90%+
- Built dashboard on 500GB of competitor data cleaned using SQL, providing management with real-time information necessary to reallocate 100+ flex workers equitably across 4 tasks with daily priority shifts
- Collaborated with project management, data engineering leads and conducted SQL analysis of 12 competitor data pipelines to identify leak, improving pricing models for 1000s products

City Health Tech - Business Analytics Intern

Evanston, IL | June 2019 - March 2020

- Conducted Total Addressable Market analyses to narrow market scope and utilized public data to generate list of 52 potential clients leading to company's first purchase order within 3 weeks of analysis
 - Created pitch deck winning 2nd place and audience vote at startup accelerator Demo Day
-

EDUCATION

University of Michigan

Ann Arbor, MI | December 2022

Master of Science in Engineering in **Industrial & Operations Engineering** (GPA: 3.38/4.00)

- Fellow, **Tauber Institute for Global Operations** (Ross School of Business)

Northwestern University

Evanston, IL | June 2021

Bachelor of Science in **Industrial Engineering** (GPA: 3.25/4.00)

- Concentration in Management Science
 - President, Institute of Industrial & Systems Engineers (IISE)
 - Recipient, Industrial Engineering Department Leadership Award 2021
-

PROJECTS

Disider - Energy Source Optimization Analysis

Ann Arbor, MI | January - May 2022

- Gathered and modeled supply and demand data inputs from NREL and ERCOT databases to identify the optimal mix of renewable energy sources in two regions at hourly level
- Produced sensitivity analyses to demonstrate the impact of varying carbon tax amounts on the cost competitiveness of different renewable energy sources, presenting findings to leadership to inform business model development

Denver Public Schools - Routing Optimization

Evanston, IL | April - June 2020

- Designed and implemented 2 linear optimization models in Python to achieve projected reduction in number of delivery routes by 18%, daily mileage by 32% with 100% on-time arrival rate in network of 73 schools and kitchens
-

SKILLS: Process improvement, process mapping, data analysis, data visualization, supply chain modeling

TOOLS: SQL, Python, Excel, Gurobi, Google OR Tools, AMPL, CPLEX, Simio, @Risk, Tableau, Google Cloud Platform

INTERESTS: NYTimes word games, fantasy novels, creative writing, philosophy
