PROFESSIONAL SUMMARY

Data Analyst with 3 years of experience transforming complex datasets into actionable insights to drive business decisions. Expertise includes data cleaning, statistical analysis, and developing comprehensive reports for operational improvements. Proficient in SQL, Python, and R for data manipulation, coupled with strong visualization capabilities using Power BI and Tableau. Skilled in database management across PostgreSQL, Oracle SQL, and Snowflake, with cloud data handling via AWS S3 and Google Cloud Storage. Focuses on delivering clear data-driven recommendations that enhance business performance and market understanding.

TECHNICAL SKILLS

Cloud Data Services: AWS S3, Google Cloud Storage, Azure Data Lake Storage
Data Analysis Libraries: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Dplyr, Ggplot2
Databases & Warehousing: SQL, PostgreSQL, MySQL, Oracle SQL, Microsoft SQL Server, Snowflake, Amazon Redshift, Google BigQuery
Programming & Scripting: Python, R, Bash Scripting
ETL & Data Orchestration: Apache Airflow, dbt, SSIS
Project & Diagramming Tools: Microsoft Project, Visio, UML
Version Control & Collaboration: Git, GitHub, Jira, Confluence
Business Intelligence & Visualization: Power BI, Tableau, Excel, Looker, Qlik Sense

WORK EXPERIENCE

Heritage Insurance, Data Analyst	Mar 2024 to Present
- Cleaned and prepared extensive datasets using SQL queries, ensuring data quality and consistency for various analytical processes and comprehensive reporting. - Built dynamic reports and interactive dashboards in Power BI, visualizing key performance indicators to aid operational decision-making across departments. - Conducted in-depth data analysis using Excel, identifying trends in customer behavior and operational metrics to support strategic planning and departmental initiatives. - Wrote Python scripts for automating routine data extraction and validation from source systems, improving efficiency in data preparation for complex analyses. - Supported business intelligence initiatives by developing data models and generating reports on historical transactional data and emerging patterns. - Assisted in gathering and documenting data requirements for new reporting functionalities, collaborating with cross-functional teams to ensure accurate data capture. - Performed ad-hoc data investigations on critical business platforms, utilizing SQL to resolve discrepancies and provide timely insights to stakeholders. - Developed custom visualizations in Tableau to present complex data insights on market trends and business performance, supporting leadership in decision-making. - Monitored data quality within various operational databases, established alerts for anomalies, and implemented validation rules to maintain data integrity. - Contributed to the development of data documentation for new analytical processes, detailing data sources, transformations, and definitions for internal team knowledge.	
mTrade, Business Analyst	May 2022 to Jun 2023
- Identified and resolved data discrepancies within mTrade's core financial databases, crafting complex SQL queries to ensure accurate information retrieval for critical reporting. - Implemented robust data integrity checks for mTrade's financial applications, utilizing advanced SQL knowledge to maintain high standards across diverse financial systems. - Analyzed specific client business needs for mTrade's financial technology solutions, effectively translating these requirements into actionable technical specifications for developers. - Performed comprehensive data cleaning and analysis on large financial datasets using Excel, preparing structured data for further reporting and strategic decision-making processes. - Built interactive Power BI dashboards to visualize key performance indicators related to financial product usage and client engagement within mTrade's platforms. - Designed custom Tableau reports presenting complex trends in market risk data, aiding financial analysts in monitoring and responding to industry shifts for mTrade. - Supported specialized reporting for India-focused financial business initiatives, providing data insights on market performance to inform product development strategies. - Developed Python scripts to automate routine data extraction from various financial sources, enhancing the efficiency of data preparation for comprehensive analytical projects. - Translated intricate data analysis into clear, actionable recommendations for enhancing mTrade's financial product offerings and optimizing operational workflows for clients. - Monitored data quality across multiple financial data streams, identifying anomalies and implementing corrective measures to ensure the reliability of information for mTrade's systems.	

EDUCATION

M.S. in Business Analytics	May 2025
University of North Texas, Denton, TX	GPA: 3.64 / 4.0
