

Elizabeth S. Yang

SQL DEVELOPER | DATABASE DEVELOPER | BI & REPORTING ANALYST

LINKEDIN: [WWW.LINKEDIN.COM/IN/ELIZABETH-YANG-15053830A](https://www.linkedin.com/in/elizabeth-yang-15053830A)

PROFESSIONAL SUMMARY

SQL Developer with hands-on experience building production reporting solutions, translating business requirements into SQL logic, and enabling self-service analytics. Strong background partnering with operations and business stakeholders to standardize metrics, create curated datasets, and support data-driven decisions.

Known for combining business-domain knowledge with technical SQL skills to deliver practical, scalable reporting solutions. Currently expanding expertise in Power BI, data modeling, and data warehousing concepts.

PROFESSIONAL EXPERIENCE

United Wholesale Mortgage (UWM) Feb 2019- Feb 2026

Database Developer I

- Developed SQL queries and curated views supporting enterprise reporting and operational analytics
- Translated business requirements into scalable SQL logic for accurate, repeatable reporting
- Designed Power BI datasets enabling self-service reporting across business teams
- Standardized metric definitions to ensure reporting consistency across departments
- Partnered with operations stakeholders to deliver actionable, data-driven insights
- Performed data validation and troubleshooting to resolve reporting discrepancies
- Supported ad-hoc data analysis for business users
- Collaborated with senior developers on Talend jobs and data pipeline processes

Key Achievement:

Designed structured SQL views for closing metrics that enabled Power BI self-service analytics, reducing manual reporting requests and improving data accessibility

Operations / Closing Coordinator

- Developed strong domain expertise in mortgage operations, data flows, and reporting needs
- Created a decision-support tool ("Spousal Rights Chart") that guided specialists on when co-borrowers or spouses were legally required to sign closing documents
- Standardized interpretation of spousal signing requirements, reducing closing errors and compliance risk
- Tool adoption improved decision consistency across operations and remained in use beyond initial launch
- Provided operational insight that supported reporting and analytics initiatives

TECHNICAL SKILLS

SQL & Databases

- T-SQL
- SQL Server (SSMS)
- Query optimization
- Joins, aggregations, subqueries
- View creation
- Data validation & cleansing
- Stored procedure familiarity

BI & Reporting

- Power BI (developing dashboards, datasets, self-service reporting)
- KPI reporting
- Metric standardization
- Business intelligence support
- Self-service analytics enablement

Data & ETL

- Data transformation
- Data modeling fundamentals
- ETL/ELT concepts
- Talend ETL development
- dbt (foundational familiarity)
- Big Query (basic familiarity)

Methodologies

- Agile (Scrum & Kanban)
