Professional Summary

Software Engineer with around 3 years of experience specializing in Backend, Data, Cloud, and AI-integrated solutions. Proven ability to design and build scalable REST APIs, automated ETL pipelines, cloud-native systems, and AI-assisted workflows that support data-driven decision-making. Strong background in Python-based development, analytics, automation scripting, Generative AI, and AWS cloud services, with experience working in Agile teams to deliver secure, high-quality, maintainable, and AI-augmented solutions.

Skills

Programming & Scripting	Python, SQL (MySQL, PostgreSQL), Java, Go, JavaScript, HTML5, CSS3, Generative AI & LLM scripting
Data Analysis & Visualizations	Pandas, NumPy, Excel, Power BI, Matplotlib, Seaborn, AI-assisted data summarization
Data Engineering	ETL Pipelines, PySpark, Data Profiling, Schema Validation, JSON Data Ingestion, Automated data workflows with AI/LLM tools
Databases & Tools	MySQL, PostgreSQL, Jupyter Notebook, VS Code, Linux, Git & GitHub, AI-enabled debugging tools
Web & API Development	RESTful APIs (Django, Flask, Spring Boot), Microservices, React, React Native, Postman, AI-driven API testing & code generation
Cloud & DevOps	AWS (EC2, S3, Lambda, RDS, EKS, API Gateway, Cognito), CI/CD Pipelines, Kafka, Celery + RabbitMQ, AI-assisted monitoring & deployment automation
Project & Agile Management	Agile/Scrum Methodology, Jira (User Stories, Epics, Features), AI tools for project planning and task automation

Professional Experience

Full Stack Developer, Saayam For All — San Jose, CA / Remote *July 2025 – Present*

- Designed responsive frontend features and backend microservices using Spring Boot, Python, and Go, reducing API response time by 30% and integrating automation scripts for repetitive tasks.
- Deployed services on AWS EKS with Kafka-based event streaming, leveraging CI/CD pipelines and AI-assisted monitoring tools, enhancing system scalability and accelerating release cycles by 40%.
- Architected secure, event-driven cloud solutions using AWS Cognito, Lambda, API Gateway, RDS, and MSK, supporting 500+ users while incorporating AI-driven validation, LLM-based data summarization, and anomaly detection for reliable authentication and data processing.
- Enhanced analytics and reporting workflows by validating data from application services and implementing automation scripts, unit tests, and generative AI tools for code generation and report automation, improving BI dashboard accuracy and maintainability by 25%.
- Implemented LLM-powered assistants and AI-driven scripts to accelerate development, automate repetitive tasks, and reduce manual errors.

IT Help desk Support Specialist, Concordia University Chicago—IL, USA *Sep 2023 – Jan 2024*

- Resolved hardware, software, and network issues across campus, handling 50+ tickets weekly, and introduced AI-powered and automated ticket triaging workflows, improving operational efficiency by 30%.
- Supported AIS and Ellucian Banner, troubleshooting 25+ user tickets related to course schedules, accounts, financial aid, and transcripts, while leveraging LLM-assisted scripts and automation to handle repetitive account management tasks, reducing recurring issues by 25%.
- Enhanced access to Blackboard Learn by resolving 20+ LMS support tickets and implementing generative AI scripts for user guidance and automated troubleshooting, increasing successful logins and submissions by 20%.
- Set up and maintained audiovisual equipment for classrooms and events, supporting 15+ AV requests weekly, with automation and AI-based scheduling and diagnostics, improving event readiness by 35%.

Data Analyst, US Tech Solutions—Hyderabad, India / Remote *July 2022 — July 2023*

- Designed and deployed scalable REST APIs using Django and Flask to power internal data services across multiple teams, reducing data access latency by 25%.
- Built a PySpark Data Quality Framework for schema validation and profiling, increasing data reliability and consistency by 90%.
- Automated JSON data ingestion into PostgreSQL using Python scripts, reducing manual data entry by 40% and accelerating ETL pipeline throughput.

- Deployed and maintained data pipelines on AWS EC2 and S3, integrated Celery with RabbitMQ and MySQL to manage background tasks, improving system reliability and reducing processing latency by 30%.
- Implemented comprehensive unit and integration tests in Python and JUnit, achieving 85% code coverage and reducing production bugs, ensuring stable and maintainable data services.

Python Developer Intern, Pantech eLearning — Hyderabad, India / Hybrid

Oct 2021 – May 2022

- Designed and implemented a machine learning project using Python, applying knowledge in graph algorithms, model training, and data processing, which improved model accuracy by 15% over baseline.
- Built and deployed a full-stack application, developing a responsive front-end with HTML, CSS, and JavaScript and managing the back-end database, reducing page load time by 30% and improving user interaction.
- Completed end-to-end machine learning tasks including data preprocessing, model training, and performance evaluation, leading to a 20% boost in workflow automation and hands-on experience in production-ready ML pipelines.

Projects

Deep Neural Framework for Continuous Sign Language Recognition

- Designed a CNN+HSV-based model to translate ASL gestures into text and speech, enabling real-time recognition from video input.
- Built a Django web interface for live gesture processing and output display. (Python, TensorFlow, Keras, OpenCV, Django)

Covid-19 Vaccine Appointment Web Application

- Built a full-stack vaccine booking system with location filters and pre-screening forms using Django and SQL.
- Designed a responsive frontend interface for appointment scheduling. (Django, HTML, CSS, JavaScript, SQL)

Education

Campbellsville University , Louisville, Kentucky	<i>Master of Science in Computer Science (2023 - 2025) - 3.6/4</i>
Osmania University , Hyderabad, India	<i>Bachelor of Engineering in Information Technology (2018- 2022) - 3.8/4</i>

Certifications

- AWS Certified Developer – Associate — **View Credential**
- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional — **View Credential**
- Oracle Cloud Infrastructure 2025 Certified Developer Professional — **View Credential**
- Oracle Cloud Infrastructure 2025 Certified Data Science Professional — **View Credential**
