

Gargee Prakash Chaudhari

gargichaudhary166@gmail.com | (469)-922-8751 | <https://www.linkedin.com/in/gargee-prakash-chaudhari/>

EDUCATION

The University of Texas at Dallas

Master's (M.S.) in Information Technology and Management

Courses: *Data Analytics (R), Data Warehouse, Data Visualization, Big Data.*

Aug 2022 – May 2024

3.85/4.0

Savitribai Phule Pune University, India

Bachelor of Engineering (B.E.) in Computer Science

Courses: *Statistics, Data Science, Google Cloud Computing, Machine Learning Applications.*

Jun 2015 - May 2019

3.80/4.0

TECHNICAL SKILLS AND CERTIFICATIONS :

Core Competencies: Data Analytical Skills, Business Intelligence, A/B Testing, Verbal and Written Communication Skills.

Programming Languages: Python, R, SQL, HTML5, CSS, SAS, DAX, MySQL database, SSIS, SSRS, SSAS, PostgreSQL

Data Visualization and Other Tools: Tableau, Power BI, RStudio, MS Excel, SQL Server, MS-SQL, AWS, Snowflake, Alteryx.

Certifications and Other Skills: AWS Certified Cloud Practitioner, Google Data Analytics, Predictive Modeling, Time-series models.

PROFESSIONAL EXPERIENCE

Mresult | Data Analyst II

May 2025- Present

- **Automated** ingestion workflows for 10+ clinical and operational data sources using SQL and Python, reducing manual effort by **60%** and enabling faster, more reliable reporting for commercial and medical affairs teams.
- **Built** optimized SQL views and stored procedures to support Power BI and Looker dashboards, enabling real-time tracking of case progress, dispense activity, and patient program adherence, which improved reporting accuracy
- **Engineered** clean, analysis-ready datasets from complex healthcare data using **Python (Pandas, NumPy)**, improving data reliability for downstream analytics, streamlining model development, ensuring alignment with regulatory reporting standards.
- Designed **Power BI dashboards** to track patient journey, lifecycle metrics, and therapy KPIs, reducing ad-hoc requests by **40%**.
- **Implemented robust data validation checks and ETL transformation logic across patient, provider, and therapy datasets**, increasing overall data accuracy and consistency by ~ 60% and significantly reducing critical errors.
- **Presented** data insights to cross-functional stakeholders, turning analytical trends into strategic recommendations that boosted quarterly planning effectiveness and led to a 25% increase in stakeholder adoption of data-driven decisions.

CrowdDoing | Data Analyst

May 2024 – May 2025

- Automated data collection and transformation workflows using **Alteryx and Python (BeautifulSoup, Scrapy)**, streamlining the extraction and analysis of online reviews and ratings.
- **Conducted impact analysis on medicinal foods** by leveraging **SQL and statistical modeling**, translating complex data into actionable insights that drive innovation in food-based wellness interventions.
- **Designed and implemented predictive recommendation models** using **Python, Alteryx, and machine learning techniques**, improving personalized food and herb recommendations for wellness.
- **Developed interactive Tableau dashboards** to visualize trends in medicinal food efficacy, enabling stakeholders to make data-driven decisions on health and wellness solutions.

Atos | Data Analyst

Dec 2019 - Jul 2022

- Collaborated with cross-functional teams to gather requirements and translate insights into actionable strategies.
- Utilized **SQL** techniques like window functions, stored procedures reducing query processing time and faster data retrieval.
- Spearheaded integration of diverse data streams into **Snowflake**, ensuring unified data ingestion and transformation.
- Automated **ETL** data pipelines on **AWS** using **Python**, reducing data errors by 30% and accelerating financial data analysis.
- Engineered dynamic **Tableau** dashboards to analyze data, identify KPIs and improve credit risk assessment efficiency by 40%.
- Designed an **A/B test** to evaluate the impact of a new credit risk scoring model, resulting in a 12% reduction in default rates.
- Delivered quarterly risk management reports to the executive committee and stakeholders, highlighting critical risk exposures, risk mitigating actions and recommendations, leading to strategic decision-making and data-driven actions.

Acquiescent Technologies Pvt. Ltd. | Data Intern

Jun 2018- Dec 2018

- Leveraged Microsoft **Excel functions (VLOOKUP, INDEX/MATCH, Pivot Table, VBA, macros)** to analyze finance data sets.
- Streamlined loan processing workflow, reducing review time by 22% using **data mining and pattern recognition** techniques.
- Leveraged **Python** scripting to automate loan review procedures, developing algorithms to identify fraudulent patterns and anomalies within applicant data, resulting in a 37% increase in accurate fraud detection rates.
- Developed a 87% accurate **time-series forecasting** prediction model, predicting application volume and processing rates.
- Optimized **SQL** stored procedures and views to automate reports , improving efficiency by 25% over manual methods.
- Implemented **Power BI** dashboards leveraging **DAX, Power Query** to visualize loan risk factors, credit scores, and approval rates, enabling cross-functional teams to monitor performance metrics and identify areas for process improvement.
- Developed and delivered ad hoc **reports** and analyses to support leadership in decision-making, providing valuable insights.
