

Ishaan Kalbhor

kalbhorishaan@gmail.com | +1(305) 954-7696

Google Data Analytics Certified, AWS Certified Cloud Practitioner, GitHub Field Day UCF, Miami Hack Week & University of Miami Horizon Hackathon 1st Place Winner

EDUCATION

Florida International University | Miami, USA

Apr 2025

Master of Science in Computer Science

Coursework: Data Visualisation, Advanced Databases, Databases, Machine Learning, Adv Data Mining

EXPERIENCE

Analyst | **Florida International University** | Miami, USA

Mar 2024 - Oct 2025

- Built optimized SQL queries and structured dashboards to monitor operational KPIs and system trends
- Cleaned, validated, and transformed structured datasets to improve reporting accuracy
- Delivered Tableau and Excel dashboards tracking traffic, conversion, and performance metrics
- Conducted exploratory data analysis to identify trends and resolve data discrepancies

Data Analyst | **Florida International University - College of Medicine** | Miami, USA

Dec 2023 - Jun 2024

- Developed Power BI dashboards and SQL-based variance analysis for cost allocation systems
- Validated high-volume datasets using statistical logic and business rules
- Translated stakeholder requirements into automated SQL reports and data workflows
- Maintained documentation ensuring data integrity and audit readiness

Software Engineer | **Follio** | Remote

Sep 2025 - Present

- Architected document ingestion pipelines converting pdfs/docs into structured SQL-based data systems
- Designed logical database schemas enabling efficient storage, indexing, and retrieval of structured datasets
- Implemented automated validation, logging, and secure data access workflows aligned with production standards

Data Analyst | **KPMG** | Remote

Jan 2022 - Jun 2022

- Developed SQL analyses and Power BI dashboards highlighting operational KPIs
- Standardized reporting logic and validation processes to improve data consistency
- Identified data inconsistencies and implemented corrective reporting solutions

Business Analyst Intern | **H&CO.** | Miami, USA

Mar 2025 - Apr 2025

- Performed SQL-based financial analysis identifying optimization opportunities
- Built Power BI dashboards visualizing KPI trends and performance drivers
- Delivered executive-ready reports summarizing structured insights

AWARD-WINNING PROJECTS

City Emergency Response GIS Portal - Healthcare Analytics, Predictive Modeling, Power BI, HIPAA, SQL

Oct 2025

- Developed a web GIS application using ArcGIS JavaScript API integrating SQL Server spatial data to map incidents, hydrants, and response-time heatmaps
- Automated GeoJSON processing and spatial layer updates with Python, performing validation and testing to ensure accurate real-time mapping

Mimir - 1st Place - Python, Golang, Pandas, TypeScript, Next.js, React, WeviateDB, Google Cloud Platform

Mar 2025

- Developed a high-performance backend in **Golang** implementing **TF-IDF** and **K-Means** for intelligent recommendations
- Built an interactive dashboard (**Next.js, React**) with **REST API** integration and vector-based data retrieval to support scalable cloud deployments ([Demo Link](#))

Stock Market Sentiment Analysis - 1st Place - Python, News API, Hugging Face Transformer, Streamlit

Mar 2025

- Built KPI-style sentiment reporting and optimized data pulls to improve processing speed by **40%**

RelocateWise - Python, Django, Tailwind CSS, OpenAI API, Bootstrap

Jan 2025

- Implemented data validation and interactive dashboards to present complex cost metrics clearly

Safe Sense - 2nd Place - Python, Flask, Firebase, Flutter, TensorFlow

Mar 2024

- Built a monitoring workflow with structured outputs, alerts, and performance metrics visualization

TECHNICAL SKILLS

- **Data Analysis:** SQL (CTEs, Window Functions), Advanced Excel (Pivot Tables, Formulas), Power BI (DAX), Tableau
- **Programming:** Python (Pandas, NumPy), JSON
- **Data Concepts:** Data Cleaning, Validation, ETL, KPI Definition, Exploratory Data Analysis
- **Databases:** MySQL, PostgreSQL, SQL Server
- **Cloud:** AWS, Azure, GCP
