SQL | Power BI | Tableau | Python | Advanced Excel | Data Modeling | Snowflake | Big Query | GCP | Looker Studio | SAP | Jira | Business Intelligence | Dashboarding | Forecasting | Stakeholder Management | Prompt Engineering |

WORK EXPERIENCE

Barnes & Noble College

Jun 2025- Present

Retail Operations Analyst

United States

- Conducted a POS-driven inventory optimization project in Excel, improving stock efficiency by 15% through data-backed replenishment insights and **sales analytic** techniques
- Owned end-to-end reporting automation, identifying gaps in existing metrics and designing Excel dashboards that improved leadership visibility by 20%
- Partnered with store leadership to improve demand forecasting and replenishment decisions, reducing stockouts by 10% and excess inventory while improving service levels by 20%
- Identified root causes of declining customer satisfaction and **recommended process changes** adopted by leadership, resulting in ratings improving by 25%

GENPACT

Nov 2022 - Apr 2024

Business Intelligence Analyst

India

- Delivered performance analysis and insight generation for a \$200B healthcare client (McKesson), ensuring 99% rebate reconciliation accuracy through **communication** and interpersonal skills
- Managed analytics and reporting for 200+ pharmaceutical partners, supporting audit readiness, financial compliance, and executive decision-making, acting as a **liaison** between technical teams and stakeholders
- Led design of churn prediction models, defining features, validating outputs with stakeholders, and translating results into **visual narrative** in executive dashboards
- Automated recurring reports using Excel macros, reducing manual effort by 40%, improving data accuracy, and shortening reporting cycles by 30%

ACCENTURE

Oct 2021 - Oct 2022

Agile Business Analyst

India

- Queried and analyzed 10K+ rows of financial data using SQL to support pricing analysis, revenue tracking, and data-driven business decisions, reflecting **responsibility** for critical data insights
- Developed Tableau and Power BI dashboards to visualize trends, enabling stakeholders to identify performance gaps, monitor KPIs, and make informed business and market decisions.
- Improved revenue forecasting accuracy by 12% through advanced Excel modeling and variance analysis
- Automated recurring **invoicing and reporting processes**, reducing missed charges by 10% and improving operational efficiency

IBM

Mar 2017 - Oct 2021

Business Analyst

India

Delivered client-facing analytics and reporting solutions, translating technical business requirements into data-driven outcomes with integrity and attention to detail

- Managed SAP GL operations and month-end close, reducing close cycle time by 20% through process optimization
- Automated invoicing workflows for Verizon, saving 40+ hours per month and achieving 0% processing errors
- Standardized 3,000+ monthly transactions across regions, reducing discrepancies by 25% and supporting audit initiatives

EDUCATION

Southern Methodist University, Cox School of Business

May 2025

Master of Science, Business Analytics

Dallas, USA

International College for Girls, IIS University

May 2015

Bachelor of Commerce, Business & Administration

Jaipur, India

ANALYTICAL PROJECT

- Customer Analytics (Oracle Capstone): Analyzed B2B sales funnel data using SQL and analytics techniques to improve conversion and retention strategies
- Machine Learning Modeling: Built Python classification models on 26M+ records, performing feature engineering and model evaluation
- Retail Sales Prediction: Forecasted weekly sales and analyzed holiday impact for multi-store retail datasets using Python and Excel
