SUMMARY

Analytical and process-driven Data Analyst with 3+ years of technical experience in data management, automation, and BI reporting. Proficient in SQL, Python, Power BI, Tableau, and Snowflake, with hands-on experience in data quality assurance, ETL optimization, and governance across global business teams. Skilled at building automated pipelines, managing master data, and translating reporting needs into scalable solutions. Passionate about improving operational efficiency, system integration, data-driven decision making in dynamic environments while effectively communicating with stakeholders.

EDUCATION

Illinois Institute of Technology

Aug 2022 - May 2024

Master's, Information Technology and Management - Data Analytics [GPA - 3.9/4.0]

Chicago, USA

Relevant Coursework: Programming for Data Analytics, Advanced Database Management, Data Warehousing, Database Security, Data Mining

University of Mumbai

Sept 2018 – June 2022

Bachelor's, Computer Science Engineering [GPA - 3.7/4.0]

Mumbai, India

Relevant Coursework: Machine Learning, Artificial Intelligence, Advanced System Security, Software Engineering, Cloud Computing

SKILLS

- **Languages & Tools:** SQL, Python, R, Java, C/C++, Advanced Excel (VLOOKUP, Pivot Tables, Macros), DAX, Power Automate, SSRS, Git, Jupyter Notebook
- **BI & Analytics Platforms:** Power BI, Tableau, ThoughtSpot, Spotfire, Microsoft Power Platform, Tabular Editor, Looker, Advanced DAX & Power Query
- **Data & Cloud:** Snowflake, Denodo, Spark SQL, DBT, Microsoft Access, SQL Server, Azure (Data Factory, DevOps), AWS, SAP, Databricks, Pentaho
- **Frameworks & Web:** Django, Flask, HTML, CSS, JavaScript, PHP
- **Methodologies:** Agile, Scrum, SDLC, Data Governance, Predictive Analytics, Data Modeling, Data Quality Assurance, Automation, Pipeline Optimization

EXPERIENCE

GLAXOSMITHKLINE (GSK)

August 2024 – Present

Data Analyst

Philadelphia, USA

- Architected and owned enterprise cloud-based BI solutions, creating a governed single source of truth with standardized KPIs to enable advanced scenario modeling and predictive analytics
- Designed and delivered 20+ enterprise dashboards across Power BI, Tableau, ThoughtSpot, Spotfire, and SSRS supporting 500+ users across cross functional teams like R&D, QA, Supply Chain, and Finance; improved data visibility and increased dashboard engagement by 30%
- Led migration of legacy Spotfire reporting to Power BI as part of BI consolidation initiative. Reverse-engineered complex business rules and custom expressions while enhancing UI/UX and modernizing enterprise reporting architecture
- Wrote complex, performance-optimized SQL queries (CTEs, window functions, joins) and developed Snowflake SQL views. Reduced Power BI refresh times through indexing and query tuning strategies, optimizing warehouse-layer transformations for BI consumption
- Built scalable ETL pipelines using SQL, DBT, and API-based extraction workflows integrating data from SAP, Hyperion, and Planisware into unified analytics-ready models. Implemented structured data validation and QA frameworks reducing discrepancies by 25%
- Led organization-wide self-service analytics enablement using ThoughtSpot; built governed semantic models, trained the AI/NLP agent for natural language querying, and reduced ad hoc reporting requests by 40%
- Managed Dev/UAT/Prod BI lifecycle using Azure DevOps and Git version control. Supported structured release cycles, controlled change management, and versioned deployment of enterprise BI assets, automating build and deployment validation checks across environments
- Leveraged advanced Power BI capabilities including complex DAX scripting, tabular modeling, performance optimization, and custom JavaScript visuals (interactive Gantt charts); automated reporting workflows using Python and Power Automate, decommissioning 20+ dashboards
- Facilitated end-to-end solution delivery including requirement discovery, risk/dependency analysis, user story definition, stakeholder demos, executive walkthroughs, and UAT validation using Agile methodologies, ensuring financial and portfolio reporting accuracy

ILLINOIS INSTITUTE OF TECHNOLOGY

Aug 2023 – April 2024

Graduate Teaching Assistant

Chicago, USA

- Redesigned curriculum for Object-Oriented Systems Analysis & Modeling with focusing on data modeling, databases, and analytics-driven design
- Facilitated hands-on training in SQL, Python, Power BI and Tableau, strengthening student skills in analytical frameworks and data interpretation
- Mentored over 50 students on capstone data projects, guiding them through data wrangling, KPI identification, and building dashboard prototypes
- Created technical documentation and templates to standardize analytical project workflows, improving consistency and scalability across the course
- Facilitated academic research into data-driven systems design, contributing insights for future coursework enhancements and faculty-led publications

PROJECTS

HITFLIX – CONTENT BASED MOVIE RECOMMENDATION SYSTEM

Chicago, USA

- Developed a movie recommendation algorithm using **Python (NumPy, Pandas, Scikit-Learn)** and cosine similarity, optimizing content-based filtering
- Integrated **PostgreSQL** for efficient data storage and querying, while building a dynamic web interface with **Django** for seamless user interaction

FOODEOLOGY – RESTAURANT MANAGEMENT SYSTEM

Chicago, USA

- Automated 80% restaurant operations using **Flask** and **MySQL**, optimizing query performance and data integrity reducing manual errors by 35%
- Designed an intuitive front-end with **HTML, CSS**, and **JavaScript**, incorporating real-time data synchronization and visualization

MOBILE PRICE PREDICTION SYSTEM

Chicago, USA

- Performed data cleaning and preprocessing on 100K+ records; trained **linear regression** models in **R** achieving 94% accuracy
- Visualized trends using **Matplotlib** and performed **correlation analysis** to identify key pricing factors

HONORS

- Research Publication: "**Text Extraction and Text-to-Speech Conversion**" - International Research Journal of Engineering & Technology
- Certifications: **Google Data Analytics**; **Data Analyst with Power BI** ; **Certified SQL Professional**
