TECHNICAL SKILLS

Programming & Scripting: Python (Pandas, NumPy, Scikit-learn, Seaborn), R, Bash, GoLang, PySpark, Hadoop, HDFS, Jira, Linux/Unix

Databases & Data Warehousing: SQL (T-SQL, PostgreSQL, MySQL), Snowflake, MS SQL Server, BigQuery, MongoDB, DynamoDB

ETL & Data Engineering Tools: Apache Airflow, Alteryx, AWS Glue, Databricks.

Cloud Platforms: Azure, Google Cloud Platform (BigQuery, Data Studio), AWS (S3, Lambda, Redshift, EC2)

Data Visualization & Analytics: Alteryx, Tableau, Power BI, Microsoft Excel (Pivot Tables, Power Query), SAP

PROFESSIONAL EXPERIENCE

Samsung Electronics America, Englewood Cliffs, NJ | Data Analyst 3

July 2024- Present

- Coordinated with Supply Chain, Finance, Sales, and Operations teams to define, document, and standardize business-critical metrics supporting forecasting, inventory health, pricing strategy, and operational risk management.
- Developed, published, and continuously improved Amazon QuickSight and Tableau dashboards providing end-to-end visibility into \$1.96B in sales, 23K+ SKUs, supplier/channel performance, forecast accuracy, and inventory health—improving leadership visibility by 97%.
- Worked directly with upstream data owners and external partners to gather, validate, and integrate data from SAP, Salesforce, APIs, and flat files, enabling reliable supply chain data pipelines.
- Built and maintained scalable ETL/ELT pipelines using Python (Pandas, NumPy) and SQL (CTEs), improving processing speed by 40% and reducing data quality issues by 35%.
- Partnered closely with Business Intelligence Engineers to design governed datasets, reusable metrics layers, and durable BI mechanisms optimized for Amazon QuickSight self-service analytics.
- Performed ongoing data validation checks (deduplication, anomaly detection, reconciliation) to ensure published dashboards were accurate, trusted, and actionable for leadership decision-making.
- Conducted ad hoc and one-off analyses to support supply chain leadership with supplier risks, demand shifts, and operational blockers.
- Acted as an analytics subject-matter resource, supporting stakeholders with dashboard usage, metric definitions, and data interpretation.

JerseySTEM, Newark, NJ | Data Analyst

Feb 2024- July 2024

- Worked with cross-functional teams including HR, Operations, and Volunteer Management to analyze workforce data and support initiatives around recruitment, retention, and engagement.
- Automated HR data workflows using **Alteryx, Python and SQL**, transforming datasets across MS SQL Server and PostgreSQL, and significantly improving data processing speed and consistency.
- Performed extensive data validation and cleansing using Pandas and SQL, resolving inconsistencies and enhancing data reliability.
- Developed dynamic Tableau and Power BI dashboards to monitor KPIs such as attrition, training progress, and volunteer engagement, improving visibility for non-technical stakeholders.
- Integrated HR data from Oracle NetSuite, enabling streamlined case tracking, onboarding workflows, and issue resolution processes.
- Communicated technical insights and recommendations to HR leaders and program managers, helping translate analytics into actionable strategies for workforce optimization.
- Supported non-technical stakeholders through dashboard walkthroughs, metric explanations, and data validation, acting as a trusted analytics resource.

Intelliswift Software, Inc., Mumbai, India | Data Analyst & Software Engineer

Sep 2018- Dec 2021

- Designed and maintained Tableau dashboards and BI reporting solutions supporting sales, inventory, and operational visibility across 500+ SKUs.
- Developed **data pipelines** to extract, clean, and integrate data from 50+ web sources (APIs, XML, JSON, CSV), ensuring consistent and reliable data delivery for downstream analytics.
- Analyzed and optimized sales and inventory across 500+ SKUs, improving demand forecasting visibility by 87%.
- Implemented **data validation, deduplication, and error-handling scripts** to improve data quality and minimize processing errors.
- Built and optimized **dashboards and reports** in Tableau, and Smartsheet for operational and executive reporting, enabling data-driven decisions for clients including Nordstrom and Macy's.
- Leveraged **SQL stored procedures** for efficient querying, aggregation, and reporting, improving data retrieval performance by **50%**.
- Participated in **Agile SDLC**, supporting sprint planning, testing A/B, unit, and deployments for data engineering and analytics solutions. Collaborated with cross-functional teams to troubleshoot pipeline failures, enhance data workflows, and support scalability initiatives.

EDUCATION

New Jersey Institute of Technology Newark, NJ | Master of Science, Computer Science

Jan 2022 - Dec 2023

- Coursework:** DSA, Data Analytics, ML/DL, Big Data, Marketing Analytics, Agile Development, Corporate Finance, Cloud Computing.

Mumbai University, Mumbai, India | Bachelor's in computer science

Jun 2015 - May 2018
